MEZZANINE VOLUME 4 SPRING 2020

2020-05-29

Abstracts of the 3rd International Conference on Geosciences and the Environment, held in Beijing, China, from 2019 to 2020. The conference was organized by the Chinese Academy of Sciences (CAS) and the Ministry of Natural Resources (MNR). The abstracts cover various topics in geosciences and the environment, including hydrology, planetary science, solar terrestrial science, solid earth science, ocean science, and atmospheric science. The volume is published by Naas.

Advances in Geosciences

2007-07-09

Advances in Geosciences is the result of a concerted effort in bringing the latest results and planning activities related to earth and space science in Asia and the international arena. The volume editors are all leading scientists in their research fields covering six sections: hydrological science (HS), planetary science (PS), solar terrestrial science (ST), solid earth science (SE), ocean science (OS), and atmospheric science (AS). The main purpose is to highlight the scientific issues essential to the study of earthquakes, tsunamis, atmospheric dust storms, climate change, drought, flood, typhoons, monsoons, space weather, and planetary exploration. This volume is abstracted in NASA's Astrophysics Data System (ADS), Harvard.edu, and contents volume 6. Hydrological science (HS) includes stochastic generation of multi-site rainfall occurrences (S. Srikanthan, G. G. S. Pegram), Monte Carlo simulation for calculating drought characteristics (C. Chaleeraktrakoon, S. Noikumsin), regional estimation of floods for ungauged sites (V. T. V. Nguyen) and other papers. Planetary science (PS) includes similarities and differences between Mars and Venus, solar wind interactions (J. G. Trotignin), asteroid compositions, some evidence from polarimetry (A. Cellino et al.), formation of alumina nanoparticles in plasma (M. Kurumada, C. Kaito), from nuclear blasts to cosmic bombardment (K. O'Brien) and other papers. Volume 8 includes solar terrestrial science (ST) with a new perspective on the relationship between substorms and magnetic storms (B. T. Tsurutani, W. D. Gonzalez), comparative measurements of cosmic radiation monitors for aircrew exposure assessment (I. L. Getley et al.), modeling of aircrew radiation exposure from galactic cosmic rays and solar particle events (M. Takada et al.) and other papers. Volume 9 includes solid earth science (SE), ocean science (OS), and atmospheric science (AS) with seismic characteristics of strong deep focal earthquakes and associated phenomena in northeastern Asia (J. Wang et al.), Moho depths in the Indian Ocean based on the inversion of satellite gravity data (D. N. Arabelos et al.), post-earthquake debris management: an overview (R. Sarkar) and other papers. Readership: academics, researchers, and postgraduate students in geosciences. Key features: provides an important source of new and not yet published results from the growing Asian and international geoscience community; presents a unique view of the rapid scientific progresses made by Asian researchers in topics crucial to the future of the global environment; highlights a first-hand description of how the largest scientific population in the world is working together to manage the environmental problems which will determine the economic and social growth of the world itself. Keywords: planetary science, atmosphere, ionosphere, magnetosphere.

The City Of London Volume 4

2015-02-28

The City of London Vol. IV: A Club No More is the fourth and final volume of David Kynaston's epic history of the square mile in the modern era. This lively and informative book takes the story from the post-war era when the city was hemmed in by bombsites and austere chancellors through to very recent times.

developments such as the big bang deregulation of 1986 this is as much a social history as a financial study with interesting discussions of the changing class and complexion of the city and with fascinating details on the early computerisation of the big companies as with earlier volumes kynaston s style is that of an anecdotal storyteller colourful characters dramatic boardroom struggles and heated exchanges between politicians and bankers dominate the pages

Indoles, Volume 25, Part 4

2009-09-15

internationally renowned specialists present a comprehensive survey of the latest advances in this area the biosynthetic and structural relationships of these compounds are summarized and newly discovered alkaloids described discusses versatile biomimetic procedures as well as the pharmacology and clinical applications of monoterpenoid indole alkaloids botanical names of all plants cited have been extensively referenced

The Commonwealth at the Summit: Volume 4

2016-11-24

the commonwealth at the summit volume 4 brings together the full text of declarations statements and communiqués issued by commonwealth heads of government between 2007 and 2015 together these demonstrate the continuing evolution of a shared global vision of the commonwealth and its consolidation as a values based organisation including the watershed decision to adopt the commonwealth charter at perth in 2011 this volume continues a series reaching as far back as 1944 and brings up to date an impressive and inspiring record of solidarity in international cooperation building on the unique diversity of the commonwealth

CONTEMPORARY ISSUES IN MULTIDISCIPLINARY SUBJECTS: VOLUME-4

2017-09-29

during the 18th century letter manuals became the most popular form of conduct literature they were marketed to and used by a wide spectrum of society from maidservants and apprentices through military officers and merchants to gentlemen parents and children this work presents the most influential manuals from both sides of the atlantic

British and American Letter Manuals, 1680-1810, Volume 4

1896

vols for jan 1896 sept 1930 contain a separately page section of papers and discussions which are published later in revised form in the society s transactions beginning oct 1930 the proceedings are limited to technical papers and discussions while civil engineering contains items relating to society activities etc

the holistic pine is india s first independent international monthly lifestyle journal sanskar news authenticity brevity and clarity we experience information overload the moment we search something online especially when this search is regarding courses and careers what guarantee do we have that the information we receive online is genuine or not how many hours should we dedicate to sift through the data available how could we identify the authenticity of information instead of spending hours and hours of time and energy the holistic pine is making it easier for the reader to get authentic information within a short period of time this is one of the reasons educational insitutions are moving massively towards the holistic pine where you get authenticity brevity and clarity there is still another reason most academic journals subscribed by college school libraries do not create readers out of students most students avoid them however the holistic pine is unique in its appeal that s where the holistic pine becomes different it has created a bridge between the magazine culture and journal culture offering in each issue a highly stylised reading material that attracts students and scholars the holistic pine thus becomes an academic asset in educational institutions scholars upsc psc and civil service or ias aspirants and general readers

Proceedings of the American Society of Civil Engineers

1890

in 1997 the u s environmental protection agency epa established regulatory standards to address health risks posed by inhaling tiny particles from smoke vehicle exhaust and other sources at the same time congress and the epa began a multimillion dollar research effort to better understand the sources of these airborne particles the levels of exposure to people and the ways that these particles cause disease to provide independent guidance to the epa congress asked the national research council to study the relevant issues the result was a series of four reports on the particulate matter research program the first two books offered a conceptual framework for a national research program identified the 10 most critical research needs and described the recommended timing and estimated costs of such research the third volume began the task of assessing initial progress made in implementing the research program this the fourth and final volume gauged research progress made over a 5 year period on each of the 10 research topics the national research council concludes that particulate matter research has led to a better understanding of the health effects caused by tiny airborne particles however the epa in concert with other agencies should continue research to reduce further uncertainties and inform long term decisions
