the writing principles and patterns guide is intended primarily for teacher and student use in all academic courses in which a student writes for an assessment this guidebook establishes the fundamental commonalities of good sentence construction paragraph construction and paper construction this guide begins with sentences the building blocks of great writing beyond helping students to learn how to fix grammatically incorrect sentences the guide encourages students to experiment with new sentence structures choose between the semicolon and the colon when joining sentences and develop a sophisticated understanding of how appositives and sentence structure variety enhance a reader s reception of ideas on the page as the guide progresses to more challenging subjects like close reading by sound devices or conceding to the counterargument there are starters for students to use in the development of these skills starters are sentences that contain the rhetorical move that is new to the beginning writer cutting and pasting starter sentences and filling in the blank with the content specific to the paragraph and paper allows students to hone their understanding and application of a given writing principle the writing principles and patterns guide also helps students learn how to craft different types of paragraphs from close reading paragraphs to compare and contrast paragraphs to persuasive paragraphs students can review models for how to make these specific rhetorical moves and

learn how they add value in a paper students should ask themselves what types of paragraphs does this paper need what type of paragraph at this point of the paper best serves the advancement of my thesis and what type of paragraph do the language of the passage and the ideas in the passage demand the ultimate goal is for students to move in and out of paragraph types from paragraph to paragraph and even employ multiple writing patterns within one paragraph readers of this guide who apply the multiple writing patterns to their papers will gain a facility with how and when to best employ specific writing patterns throughout a paper finally this guide provides model papers in a variety of specific writing patterns and mixed pattern papers providing beginning writers with model papers to emulate will prove useful most emerging analytical writers have never read a model analysis paper so they are often writing creative nonfiction papers and analysis papers without a sense of what rhetorical moves make a paper compelling to read reading a specific writing pattern as a writer of that specific writing pattern is essential in the development of a writer this guide allows writers to assess the paper prompt determine which writing patterns should emerge in their paper and read an excellent mixed pattern paper before drafting their own version there is a helpful aphorism if you don't know where you are going all roads take you there reading model papers allows writers to know what they want their paper to be and the roads that will get them there for they can emulate the rhetorical moves that made the model paper compelling
