at the center of this book is the complex and perplexing question of how to design professional preparation programs organizational management practices public policy systems and robust professional associations committed to and capable of maintaining confidence trust and the other hallmarks of responsible professionalism to do this we need to rebuild our understanding of professional responsibility from the ground up we describe how individuals might be prepared to engage in responsible professional service delivery examine promising options for the reform of professional service systems and finally outline a reform strategy for improving practice in education and medicine two essential public services the nexus of the reform problem in professionalism is establishing a more robust and effective working relationship between teachers and their students between health care professionals and their patients and between educators and health professionals professionalism means acceptance of professional responsibility for student and patient outcomes not just acceptance of responsibility for technical expertise but commitment to the social norms of the profession including trustworthiness and responsibility for client wellbeing in the past it may have been sufficient to assume that adequate knowledge can be shaped into standards of professional practice today it is clear that we must take careful account of the ways in which practicing professionals develop internalize and sustain professionalism during their training along with the ways in which this commitment to professionalism may be undermined by the regulatory fiscal technological political and emotional incentive systems that impinge on professional workplaces and professional employment systems

what does professional responsibility entail in an increasingly insecure unpredictable and de regulated world this is the core question addressed in this text the point of departure for the various contributions is that professional responsibility is a way of being in the world that includes a particular mandate to behave in a manner consistent with moral and societal obligations as a professional increasingly however there is a lack of consensus as to what such mandates imply and even more dissensus as to what appropriate exercise of responsibility entails one of the distinctive features of this book is the manner in which it combines normative and empirical dimensions it moves beyond dualistic perspectives to create a more inclusive conversation on professional responsibility in the face of increasing complexity of professional work professional responsibility remains open to further development the book signals direction for the development of professional responsibility and while seeking to give direction to ongoing deliberations avoids the pitfalls of performativity the chapters are grounded in a variety of disciplinary perspectives and traverse various professional boundaries in a self reflexive manner to create more inclusive transformative and generative narratives on professional responsibility this is achieved by focusing on normative dimensions of professional work and combining these with a focus on empirical aspects of professional practice in a variety of setting and recognising the inevitable tensions between personal trust and responsibility and largely depersonalised policies and strategies of quality control when normative and empirical aspects of professional responsibility are situated within their policy environments the concluding narrative moves beyond deconstruction complexity and critique of these considerations to a construction of new imagined horizons of professional responsibility from theoretical conceptual and practical perspectives this text sets out to transform professional responsibility through a re configuration of its constituent elements in imaginative and creative ways and by indicating the real world import of re charting the field
