electrical installation technology third edition covers a wide range of subjects about electrical science installations and regulations the book presents chapters tackling general principles and information about electromagnetism inductance static electricity d c and a c circuits and voltage drop and recurrent rating the book describes distribution wiring techniques d c generators and motors a c motors and transformers the importance of power factor improvement earthing and earth leakage protection and testing are also considered the latter part of the book describes communication systems and equipment such as batteries cells call systems alarms and electronics the book concludes with a chapter dealing with important topics under site and office management this book will serve as a textbook for students taking the electrical installation technicians and electrical technicians courses and will also benefit electrical engineers authored by an accredited expert in the field this timely new resource introduces technologies that can be used for advanced smart buildings including renewable power communications indoor positioning security management and control systems this book speaks to the innovation of advanced technology particularly information technology within the building industry today and explores the potential benefits and issues with advanced technology and its applications and presents practical real world case studies this book demonstrates that the penetration of information technology in the building industry is a long term major development that will affect homes offices and other buildings smart technology

will impact the automation and communications in existing and new building systems the entec directory of environmental technology european edition is the only comprehensive reference to cover producers and users of goods and services in these areas of environmental concern water air solid waste hazardous waste noise vibration energy information including up to date names and addresses is featured for more than 20 000 companies from the 20 countries of western europe thousands of products processes and services have been categorized under 865 specific products and service groups never before has such a massive reference to european environmental goods and services been compiled the book will be invaluable to anyone in government industry science and education or the professional arena who would like to utilize european environmental technology this training package contains a guide to the tmap process as developed by the authors a substantial facilitation guide that enables managers to undertake the processes gleaned from the course within their own companies and a disk featuring support material mathematical modelling in science and technology the fourth international conference covers the proceedings of the fourth international conference by the same title held at the swiss federal institute of technology zurich switzerland on august 15 17 1983 mathematical modeling is a powerful tool to solve many complex problems presented by scientific and technological developments this book is organized into 20 parts encompassing 180 chapters the first parts present the basic principles methodology systems theory parameter estimation system identification and optimization of mathematical modeling the succeeding parts discuss the features of stochastic and numerical modeling and simulation languages considerable parts deal with the application areas of mathematical

modeling such as in chemical engineering solid and fluid mechanics water resources medicine economics transportation and industry the last parts tackle the application of mathematical modeling in student management and other academic cases this book will prove useful to researchers in various science and technology fields the department of the navy strives to maintain through its office of naval research onr a vigorous science and technology s t program in those areas considered critically important to u s naval superiority in the maritime environment including littoral waters and shore regions in pursuing its s t investments in such areas onr must ensure that 1 a robust u s research capability to work on long term s t problems in areas of interest to the department of the navy and the department of defense is sustained 2 an adequate supply of new scientists and engineers in these areas is maintained and 3 s t products and processes necessary to ensure future superiority in naval warfare are provided one of the critical areas for the department of the navy is undersea weapons an assessment of undersea weapons science and technology assesses the health of the existing navy program in undersea weapons evaluates the navy s research effort to develop the capabilities needed for future undersea weapons identifies non navy sponsored research and development efforts that might facilitate the development of such advanced weapons capabilities and makes recommendations to focus the navy s research program so that it can meet future needs the objective of this book is to provide single platform for preparation of competitive examinations in food science and technology discipline the book contains about 10 000 objective questions on the subjects such as food chemistry food microbiology food engineering dairy technology fruits and vegetables technology cereals technology meat fish and poultry processing food additives foods and nutrition

bioprocess technology food packaging food analysis functional foods emerging food processing technologies food biochemistry and miscellaneous topics the book also contains subjective keynotes for above mentioned topics this book contains the selected peer reviewed manuscripts presented at the conference on multidisciplinary engineering and technology comet 2019 held at the university kuala lumpur malaysian spanish institute unkl msi kedah malaysia from september 18 to 19 2019 this event presented research being carried out in the field of mechanical manufacturing electrical and electronics for engineering and technology this book also contains the manuscripts from the system engineering and energy laboratory seelab research cluster unkl which is actively doing research mainly focused on artificial intelligence internet of things metal air batteries advanced battery materials and energy material modelling fields this book is the fourth edition of the progress in engineering technology advanced structured materials which provides in depth ongoing research activities among academia of unkl msi advanced concrete technology a thorough grounding in the science of concrete combined with the latest developments in the rapidly evolving field of concrete technology in the newly revised second edition of advanced concrete technology a distinguished team of academics and engineers delivers a state of the art exploration of modern and advanced concrete technologies developed during the last decade the book combines the essential concepts and theory of concrete with practical examples of material design composition processing characterization properties and performance the authors explain in detail the hardware and software of concrete and offer readers discussions of the most recent advances in concrete technology including but not limited to concrete recycling nanotechnology microstructural simulation additive manufacturing

and non destructive testing methods this newest edition of advanced concrete technology provides a sustained emphasis on sustainable and novel technologies like new binders 3d printing and other advanced materials and techniques readers will also find a thorough introduction to concrete including its definition and its historical evolution as a material used in engineering and construction in depth explorations of the materials for making concrete and the properties of fresh concrete comprehensive discussions of the material structure of concrete hardened concrete and advanced cementitious composites fulsome treatments of concrete fracture mechanics non destructive testing in concrete engineering and future trends in concrete perfect for undergraduate and graduate students studying civil or materials engineering especially those taking classes in the properties of concrete or concrete technologies as well as engineers in the concrete industry advanced concrete technology 2nd edition will also earn a place in the libraries of civil and materials engineers working in the industry engineering technology and applications contains the contributions presented at the 2014 international conference on engineering technology and applications iceta 2014 tsingtao china 29 30 april 2014 the book is divided into three main topics civil and environmental engineering electrical and computer engineering mechanical engineering considerable attention is also paid to big data cloud computing neural network algorithms and social network services the book will be invaluable to professionals and academics in civil environmental electrical computer and mechanical engineering this book contains a collection of peer reviewed papers from the 2020 conference on multidisciplinary engineering and technology comet 2020 held online on december 15 16 2020 it contains twenty five papers covering energy harvester thermodynamics vibration dynamic

of mechanics manufacturing process computer aided manufacturing cam cfd analysis electronics and microcontroller this book presents recent developments in the areas of engineering and technology focusing on experimental numerical and theoretical approaches in the first part the emphasis is on the emerging area of electromobility and its sub disciplines e g battery development improved efficiency due to new designs and materials and intelligent control approaches in turn the book s second part addresses the broader topic of energy conversion and generation based on classical petrol engines and more modern approaches e g turbines the third and last part addresses quality control and boosting engineering efficiency in a broader sense topics covered include e g modern contactless screening methods and related image processing this easy to read work is a comprehensive review which focuses primarily on catalytic methanol synthesis it includes a historic summary of the development of methanol synthesis technology as well as extensive discussions on statistical experimental design fabrication and operation of laboratory scale systems this unique volume also discusses various new catalysts and processes with special attention to the thermodynamics of methanol synthesis especially in relation to the new liquid phase process the comprehensive and practical approach to chemical and synfuel process development makes it an excellent reference in methanol synthesis reactor design and scale up written as a practical guide to researchers who are involved in hands on process research this book is also a valuable asset to practicing chemical engineers and graduate students interested in reaction engineering thermodynamics catalyst development and process design this textbook explores the science and technologies needed for renewable energy it examines the properties of the earth s atmosphere for transmitting light in from the sun and mediating

outflow of infrared energy from the ground a role that has an effect on the temperature of the earth it begins by explaining how the sun works that is by nuclear fusion and the basic concepts of quantum tunnelling needed are later expanded to allow a competent treatment of semiconductor physics the discipline behind solar cells the book covers wind turbine technology hydroelectric power and pumped hydro energy storage it also talks about the history of the earth s climate and discusses the effects that the present fossil fuel burning leading to large emission of greenhouse gas may have on the future temperature of the earth the sustainable energy discussed in this book will be available in the long term past the remaining availability of carbon energy and is also energy that will not tip the climate into warmer conditions in connection to this the action of the atmosphere is analyzed both for its transmission of sunlight to the surface for use in solar power and in secondary forms such as wind waves and hydroelectricity greenhouse gas impurities such as carbon dioxide are also examined for their effects on the atmosphere building on this analysis prospects for sustainable energy and moderate climate are assessed this edited book provides a platform to bring together researchers academia and industry collaborators to exchange their knowledge and work to develop better understanding about the scope of blockchain technology in business management applications of different sectors such as retail sector supply chain and logistics healthcare sector manufacturing sector judiciary finance and government sector in terms of data quality and timeliness the book presents original unpublished research papers on blockchain technology and business management on novel architectures prototypes and case studies aline leon in the last years public attention was increasingly shifted by the media and world governmentsto the

conceptsof saving energy reducingpollution protectingthe vironment and developing long term energy supply solutions in parallel research funding relating to alternative fuels and energy carriers is increasing on both tional and international levels why has future energy supply become such a matter of concern the reasons are the problems created by the world s current energy supply s tem which is mainly based on fossil fuels in fact the energystored in hydrocarb based solid liquid and gaseous fuels was is and will be widely consumed for internal combustion engine based transportation for electricity and heat generation in residential and industrial sectors and for the production of fertilizers in agric ture as it is convenient abundant and cheap however such a widespread use of fossil fuels by a constantly growing world population from 2 3 billion in 1939 to 6 5 billion in 2006 gives rise to the two problems of oil supply and environmental degradation the problemrelated to oil supply is caused by the fact that fossil fuels are not newable primary energy sources this means that since the rst barrel of petroleum has been pumped out from the ground we have been exhausting a heritage given by nature heavy duty electric vehicles from concept to reality presents a step by step design and development guide for heavy duty electric vehicles it also offers practical insights based on the commercial application of an electric city bus heavy duty electric vehicle design is challenging due to a lack of clear understanding of the government policies r d directions and uncertainty around the performance of various subsystems in an electric powertrain therefore this book discusses key technical aspects of motors power electronics batteries and vehicle control systems and outlines the system integration strategies necessary for design and safe operation of electric vehicles in practice this comprehensive book serves as a guide to engineers and decision makers involved in

electric vehicle development programs and assists them in finding the suitable electric powertrain solution for a given heavy duty vehicle application offers an overview of various standards and regulations that guide the electric vehicle design process and a comprehensive discussion on various government policies and incentive schemes propelling the growth of heavy electric vehicle markets across the world provides a comparative evaluation of different electric drivetrain concepts and a step by step power calculation guide for heavy duty electric powertrain explains material selection and manufacturing methods for next generation batteries discusses key elements and design rules for creating a robust high voltage energy storage system appropriate packaging and its support systems including charging network includes a concise description of torque mapping power management and fault handling strategies for inverter drive and control systems features case studies to better understand complex topics like charging system requirements and vehicle control system diagnostics this is the first edition of a unique new plastics industry resource who s who in plastics polymers it is the only biographical directory of its kind and includes contact affiliation and background information on more than 3300 individuals who are active leaders in this industry and related organizations the biographical directory is in alphabetical order by individual name after each individual name current affiliation and contact information is provided this includes job title full name of affiliation e g business university association research institute business address and electronic contacts telephone fax e mail and site home addresses and contacts are also provided for most of the entries in the biographical summary section for each individual the following information is provided date

experience including company or other organization names positions held and time periods also included in this section are the number of patents awarded articles and book chapters authored and conference sessions chaired other information includes titles of books edited or written by the individual listing of conferences where the person had a leadership position and listing of memberships and positions held in professional organizations finally professional and civic awards are listed indexes provide listings of individuals by company or other organization name and also by geographical location who s who in plastics polymers is now published in a limited edition of 1 000 copies this edition will not be reprinted to be sure of receiving your copy please act now information on ordering follows sample pages on the reverse please note this is a short discount publication access both contact and company information on all 4950 european manufacturers distributors and agents for 550 electronics components and sub assembly product classifications throughout west and east europe in one comprehensive volume applications sourcing of specific product types through local distributors or manufacturers location of new regional channels of distribution or identification of new european business partners competitor tracking sales lead generation entries include key names executives full address telephone and fax details size indications including number of employees products manufacturers represented and agency status

Electrical Installation Technology 2016-06-24 electrical installation technology third edition covers a wide range of subjects about electrical science installations and regulations the book presents chapters tackling general principles and information about electromagnetism inductance static electricity d c and a c circuits and voltage drop and recurrent rating the book describes distribution wiring techniques d c generators and motors a c motors and transformers the importance of power factor improvement earthing and earth leakage protection and testing are also considered the latter part of the book describes communication systems and equipment such as batteries cells call systems alarms and electronics the book concludes with a chapter dealing with important topics under site and office management this book will serve as a textbook for students taking the electrical installation technicians and electrical technicians courses and will also benefit electrical engineers

Electronics Administration and Supply 1970 authored by an accredited expert in the field this timely new resource introduces technologies that can be used for advanced smart buildings including renewable power communications indoor positioning security management and control systems this book speaks to the innovation of advanced technology particularly information technology within the building industry today and explores the potential benefits and issues with advanced technology and its applications and presents practical real world case studies this book demonstrates that the penetration of information technology in the building industry is a long term major development that will affect homes offices and other buildings smart technology will impact the automation and communications in existing and new building systems

Advanced Technology for Smart Buildings 2016-07-31 the entec

directory of environmental technology european edition is the only comprehensive reference to cover producers and users of goods and services in these areas of environmental concern water air solid waste hazardous waste noise vibration energy information including up to date names and addresses is featured for more than 20 000 companies from the 20 countries of western europe thousands of products processes and services have been categorized under 865 specific products and service groups never before has such a massive reference to european environmental goods and services been compiled the book will be invaluable to anyone in government industry science and education or the professional arena who would like to utilize european environmental technology

Entec Directory Of Environmental Technology European Edition

1993-05-21 this training package contains a guide to the tmap process as developed by the authors a substantial facilitation guide that enables managers to undertake the processes gleaned from the course within their own companies and a disk featuring support material

Technical Abstract Bulletin 2000 mathematical modelling in science and technology the fourth international conference covers the proceedings of the fourth international conference by the same title held at the swiss federal institute of technology zurich switzerland on august 15 17 1983 mathematical modeling is a powerful tool to solve many complex problems presented by scientific and technological developments this book is organized into 20 parts encompassing 180 chapters the first parts present the basic principles methodology systems theory parameter estimation system identification and optimization of mathematical modeling the succeeding parts discuss the features of stochastic and numerical modeling and simulation languages considerable parts deal with the application areas of

mathematical modeling such as in chemical engineering solid and fluid mechanics water resources medicine economics transportation and industry the last parts tackle the application of mathematical modeling in student management and other academic cases this book will prove useful to researchers in various science and technology fields

Technology Management Assessment Procedure 1977 the department of the navy strives to maintain through its office of naval research onr a vigorous science and technology s t program in those areas considered critically important to u s naval superiority in the maritime environment including littoral waters and shore regions in pursuing its s t investments in such areas onr must ensure that 1 a robust u s research capability to work on long term s t problems in areas of interest to the department of the navy and the department of defense is sustained 2 an adequate supply of new scientists and engineers in these areas is maintained and 3 s t products and processes necessary to ensure future superiority in naval warfare are provided one of the critical areas for the department of the navy is undersea weapons an assessment of undersea weapons science and technology assesses the health of the existing navy program in undersea weapons evaluates the navy s research effort to develop the capabilities needed for future undersea weapons identifies non navy sponsored research and development efforts that might facilitate the development of such advanced weapons capabilities and makes recommendations to focus the navy s research program so that it can meet future needs

The Electrical Review 2014-05-09 the objective of this book is to provide single platform for preparation of competitive examinations in food science and technology discipline the book contains about 10 000 objective questions on the subjects such as food chemistry food

microbiology food engineering dairy technology fruits and vegetables technology cereals technology meat fish and poultry processing food additives foods and nutrition bioprocess technology food packaging food analysis functional foods emerging food processing technologies food biochemistry and miscellaneous topics the book also contains subjective keynotes for above mentioned topics

Mathematical Modelling in Science and Technology 1963 this book contains the selected peer reviewed manuscripts presented at the conference on multidisciplinary engineering and technology comet 2019 held at the university kuala lumpur malaysian spanish institute unkl msi kedah malaysia from september 18 to 19 2019 this event presented research being carried out in the field of mechanical manufacturing electrical and electronics for engineering and technology this book also contains the manuscripts from the system engineering and energy laboratory seelab research cluster unkl which is actively doing research mainly focused on artificial intelligence internet of things metal air batteries advanced battery materials and energy material modelling fields this book is the fourth edition of the progress in engineering technology advanced structured materials which provides in depth ongoing research activities among academia of unkl msi

Technical Translations 1961 advanced concrete technology a thorough grounding in the science of concrete combined with the latest developments in the rapidly evolving field of concrete technology in the newly revised second edition of advanced concrete technology a distinguished team of academics and engineers delivers a state of the art exploration of modern and advanced concrete technologies developed during the last decade the book combines the essential concepts and theory of concrete with practical examples of material

design composition processing characterization properties and performance the authors explain in detail the hardware and software of concrete and offer readers discussions of the most recent advances in concrete technology including but not limited to concrete recycling nanotechnology microstructural simulation additive manufacturing and non destructive testing methods this newest edition of advanced concrete technology provides a sustained emphasis on sustainable and novel technologies like new binders 3d printing and other advanced materials and techniques readers will also find a thorough introduction to concrete including its definition and its historical evolution as a material used in engineering and construction in depth explorations of the materials for making concrete and the properties of fresh concrete comprehensive discussions of the material structure of concrete hardened concrete and advanced cementitious composites fulsome treatments of concrete fracture mechanics non destructive testing in concrete engineering and future trends in concrete perfect for undergraduate and graduate students studying civil or materials engineering especially those taking classes in the properties of concrete or concrete technologies as well as engineers in the concrete industry advanced concrete technology 2nd edition will also earn a place in the libraries of civil and materials engineers working in the industry

Telegraphic Journal and Monthly Illustrated Review of Electrical Science 1975 engineering technology and applications contains the contributions presented at the 2014 international conference on engineering technology and applications iceta 2014 tsingtao china 29 30 april 2014 the book is divided into three main topics civil and environmental engineering electrical and computer engineering mechanical engineering considerable attention is also paid to big data

cloud computing neural network algorithms and social network services the book will be invaluable to professionals and academics in civil environmental electrical computer and mechanical engineering

Technical Information Indexes 1984 this book contains a collection of peer reviewed papers from the 2020 conference on multidisciplinary engineering and technology comet 2020 held online on december 15 16 2020 it contains twenty five papers covering energy harvester thermodynamics vibration dynamic of mechanics manufacturing process computer aided manufacturing cam cfd analysis electronics and microcontroller

Personnel Qualification Standard for LPH-2 Class Engineering, Qualification Section 8, Electrical 1972 this book presents recent developments in the areas of engineering and technology focusing on experimental numerical and theoretical approaches in the first part the emphasis is on the emerging area of electromobility and its sub disciplines e g battery development improved efficiency due to new designs and materials and intelligent control approaches in turn the book s second part addresses the broader topic of energy conversion and generation based on classical petrol engines and more modern approaches e g turbines the third and last part addresses quality control and boosting engineering efficiency in a broader sense topics covered include e g modern contactless screening methods and related image processing

Electrical Times 1989 this easy to read work is a comprehensive review which focuses primarily on catalytic methanol synthesis it includes a historic summary of the development of methanol synthesis technology as well as extensive discussions on statistical experimental design fabrication and operation of laboratory scale systems this unique volume also discusses various new catalysts and processes with special

attention to the thermodynamics of methanol synthesis especially in relation to the new liquid phase process the comprehensive and practical approach to chemical and synfuel process development makes it an excellent reference in methanol synthesis reactor design and scale up written as a practical guide to researchers who are involved in hands on process research this book is also a valuable asset to practicing chemical engineers and graduate students interested in reaction engineering thermodynamics catalyst development and process design

Scientific and Technical Aerospace Reports 1963-07 this textbook explores the science and technologies needed for renewable energy it examines the properties of the earth's atmosphere for transmitting light in from the sun and mediating outflow of infrared energy from the ground a role that has an effect on the temperature of the earth it begins by explaining how the sun works that is by nuclear fusion and the basic concepts of quantum tunnelling needed are later expanded to allow a competent treatment of semiconductor physics the discipline behind solar cells the book covers wind turbine technology hydroelectric power and pumped hydro energy storage it also talks about the history of the earth's climate and discusses the effects that the present fossil fuel burning leading to large emission of greenhouse gas may have on the future temperature of the earth the sustainable energy discussed in this book will be available in the long term past the remaining availability of carbon energy and is also energy that will not tip the climate into warmer conditions in connection to this the action of the atmosphere is analyzed both for its transmission of sunlight to the surface for use in solar power and in secondary forms such as wind waves and hydroelectricity greenhouse gas impurities such as carbon dioxide are also examined for their effects on the

atmosphere building on this analysis prospects for sustainable energy and moderate climate are assessed

Keywords Index to U.S. Government Technical Reports 1988-06 this edited book provides a platform to bring together researchers academia and industry collaborators to exchange their knowledge and work to develop better understanding about the scope of blockchain technology in business management applications of different sectors such as retail sector supply chain and logistics healthcare sector manufacturing sector judiciary finance and government sector in terms of data quality and timeliness the book presents original unpublished research papers on blockchain technology and business management on novel architectures prototypes and case studies

Technical Reports Awareness Circular : TRAC. 2000-07-09 aline leon in the last years public attention was increasingly shifted by the media and world governments to the concept of saving energy reducing pollution protecting the environment and developing long term energy supply solutions in parallel research funding relating to alternative fuels and energy carriers is increasing on both national and international levels why has future energy supply become such a matter of concern the reasons are the problems created by the world's current energy supply system which is mainly based on fossil fuels in fact the energy stored in hydrocarbon based solid liquid and gaseous fuels was and will be widely consumed for internal combustion engine based transportation for electricity and heat generation in residential and industrial sectors and for the production of fertilizers in agriculture as it is convenient abundant and cheap however such a widespread use of fossil fuels by a constantly growing world population from 2.3 billion in 1939 to 6.5 billion in 2006 gives rise to the two problems of oil supply and environmental degradation the problem related to oil

supply is caused by the fact that fossil fuels are not newable primary energy sources this means that since the first barrel of petroleum has been pumped out from the ground we have been exhausting a heritage given by nature

An Assessment of Undersea Weapons Science and Technology 1994

heavy duty electric vehicles from concept to reality presents a step by step design and development guide for heavy duty electric vehicles it also offers practical insights based on the commercial application of an electric city bus heavy duty electric vehicle design is challenging due to a lack of clear understanding of the government policies and directions and uncertainty around the performance of various subsystems in an electric powertrain therefore this book discusses key technical aspects of motors power electronics batteries and vehicle control systems and outlines the system integration strategies necessary for design and safe operation of electric vehicles in practice this comprehensive book serves as a guide to engineers and decision makers involved in electric vehicle development programs and assists them in finding the suitable electric powertrain solution for a given heavy duty vehicle application offers an overview of various standards and regulations that guide the electric vehicle design process and a comprehensive discussion on various government policies and incentive schemes propelling the growth of heavy electric vehicle markets across the world provides a comparative evaluation of different electric drivetrain concepts and a step by step power calculation guide for heavy duty electric powertrain explains material selection and manufacturing methods for next generation batteries discusses key elements and design rules for creating a robust high voltage energy storage system appropriate packaging and its support systems including charging network includes a concise description of

torque mapping power management and fault handling strategies for inverter drive and control systems features case studies to better understand complex topics like charging system requirements and vehicle control system diagnostics

Publications of the National Institute of Standards and Technology ...

Catalog 1977 this is the first edition of a unique new plastics industry resource who s who in plastics polymers it is the only biographical directory of its kind and includes contact affiliation and background information on more than 3300 individuals who are active leaders in this industry and related organizations the biographical directory is in alphabetical order by individual name after each individual name current affiliation and contact information is provided this includes job title full name of affiliation e g business university association research institute business address and electronic contacts telephone fax e mail and site home addresses and contacts are also provided for most of the entries in the biographical summary section for each individual the following information is provided date and place of birth education and educational achievements work experience including company or other organization names positions held and time periods also included in this section are the number of patents awarded articles and book chapters authored and conference sessions chaired other information includes titles of books edited or written by the individual listing of conferences where the person had a leadership position and listing of memberships and positions held in professional organizations finally professional and civic awards are listed indexes provide listings of individuals by company or other organization name and also by geographical location who s who in plastics polymers is now published in a limited edition of 1 000 copies this edition will not be reprinted to be sure of receiving your copy please act now information on

ordering follows sample pages on the reverse

Index of Technical Publications 2015-05-02 please note this is a short discount publication access both contact and company information on all 4950 european manufacturers distributors and agents for 550 electronics components and sub assembly product classifications throughout west and east europe in one comprehensive volume applications sourcing of specific product types through local distributors or manufacturers location of new regional channels of distribution or identification of new european business partners competitor tracking sales lead generation entries include key names executives full address telephone and fax details size indications including number of employees products manufacturers represented and agency status
