a variety of imaginative techniques for integrating literature work with language learning

Helping Schoolchildren with Chronic Health Conditions

1987-12-17

in project based learning applied to the language classroom the authors propose a way to develop pbl in the language classrooms taking into account all of the obstacles and specifics involved in teaching a foreign language it is about teaching english as a second or foreign language using project based learning pbl we approach this combination because many people seem to think about implementing pbl in their language classes and ask questions about how to do it but feel that there aren t enough materials based on this methodology in fact most researchers and writers we have come across discuss the applications of pbl in the students mother tongue to subjects such as math history literature social studies and science however there are few published works about the specifics of pbl in foreign language classes besides it seems obvious to us that the main difficulty in developing projects in a second or foreign language lies exactly

on the fact that communication may be hindered when students do not have enough knowledge in the target language

Holiday Worksheets Book 5 (Combined Edition)

1998

a best selling text and self training manual

Getting Unstuck from PTSD

2001

this book is about an ecological interpretive image of the basics essays detailing everyday lived events in classroom life are presented to help readers see beneath the surface ordinariness of these events to uncover and examine the underlying complex and contested meanings they contain readers are invited to imagine what would happen to our understanding of teaching and learning if we stepped away from the image of basics as breakdown under which education labors today an image of fragmentation isolation and the consequent dispensing manipulation and control of the smallest simplest most meaningless bits and pieces of the living inheritances that are entrusted to teachers and learners in schools by involving readers in re thinking the idea of the basics in educational theory and practice this book offers a more generous rigorous difficult and pleasurable image of what this term might mean in the living work of teachers and learners this is a valuable text for practicing teachers

and student teachers interested in re imagining what is basic to their work and the work of their students it also provides examples of interpretive inquiry that will be helpful for graduate students and scholars in the areas of curriculum teaching and learning who are interested in pursuing this form of research and writing the second edition is guided by the view that thinking the world together is a form of ecological thinking adds chapters that take up the ecological aspects of this vision the hermeneutic aspects and curricular aspects in the areas of mathematics reading and writing and social studies included also are chapters on child development information and communications technologies and more proposes a version of the basics that asks teachers to be public intellectuals who think about the world who think about the knowledge we have inherited and to which we are offering our students living breathing access
