at the core of this book lies the question how to approach medicines risks and communication as a researcher or anybody planning and evaluating a communication intervention or wanting to understand communication events in private and the media with a view to tackle current shortcomings of communication systems and processes for improved implementation patient satisfaction and health outcomes a multilayered approach is presented this combines multiple data types and methods to obtain a wider and deeper understanding of the major parties and their interactions as well as the healthcare social and political contexts of information flows how they interfere and which impact they have illustrated with real life experiences of safety concerns with medicines worldwide active experts discuss the methods and contributions their disciplines can offer with considerations on terminologies tabulated overviews on communication types and outcomes a patient centred vision and plain language for non medical readers the book creates a platform for multidisciplinary collaborations amongst researchers as well as practitioners from communications healthcare the social sciences and pharmacovigilance importantly it advocates for an active role of patients and highlights the achievements and aspirations of patient organisations finally the book suggests establishing an inclusive discipline of humanities and epidemiology of medicinal product risk communication to realise full research potential the authors are driven by the curiosity for communication as the most human behaviour and as good health is amongst the basic human needs medicinal product risk communication is an exciting research field of high global relevance

Communicating about Risks and Safe Use of Medicines 2024-03-20

this is a major update for me the epub production techniques have changed quite a bit both for fixed layout and for reflowable epubs many of the changes i ve been waiting for with epub production have been implemented indesign now stands at the top of the heap for book production in general and epub production in particular you do not need to know code though understanding

how html and css works will aid your conceptual understanding i was lukewarm about fxl until i realized that the new fixed layout epubs would show gradient paragraph rules gradient strokes and fills in tables and much more the only major things we re missing are justification and hyperlinked test does not work in fxl the exported epubs upload flawlessly to the ibooks store and kobo writing life finally the 21st century book publishing software we need is within our grasp there s still more to come but this version is very good
