King of the Cold War crisis film *Dr. Strangelove* became a cultural touchstone from the moment of its release in 1964. The duck and cover generation saw it as a satire on nuclear issues and Cold War thinking. Subsequent generations removed from the film's historical moment came to view it as a quasi-documentary about an unfathomable secret world. Sean M. Maloney uses *Dr. Strangelove* and other genre classics like *Fail-Safe* and *The Bedford Incident* to investigate a curious pop-cultural contradiction: nuclear crisis films repeatedly portrayed the failures of the Cold War's deterrent system, yet the system worked. What does this inconsistency tell us about the genre? What does it tell us about the deterrent system? For that matter, blending film analysis with Cold War history, Maloney looks at how the celluloid crises stack up against reality or at least as much of reality as we can reconstruct from these films with confidence. The result is a daring intellectual foray that casts new light on *Dr. Strangelove*, one of the Cold War era's defining films.
