excerpt from a manual of the principles of roman law relating to persons property and obligations with a historical introduction this work has been prompted as the result of the experience obtained by the author during a number of years in lecturing to egyptian students the egyptian native codes being based in very large measure upon the french codes a knowledge of the principles of roman law is essential to the student of law in egypt who however suffers from the disadvantage that he has no knowledge of the latin language while it is therefore impossible to expound the subject to him either directly or by way of commentary upon the latin texts it is at the same time necessary to present to the student in language that will be

readily understood a statement of the main principles of the roman law in such a manner as will both compensate for his lack of a classical education and do fair justice to the subject with this object in view the subject is here expounded by a method of divisions and sub divisions each of which is as far as possible self contained on which account indeed there may appear to be at times somewhat of redundancy for the sake of greater simplicity and clearness moreover about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

excerpt from the government class book a manual of instruction in the principles of constitutional government and law the study of the principles of political science is a necessary part of a liberal education in a country where the people govern themselves the science of government is a necessary part of a common school education in the united states the people elect their own law makers and rulers establish their own constitutions and determine even the fundamental principles upon which men shall be governed the danger

of entrusting such power to the ignorant has not failed of illustration in our states and cities having universal suffrage the people must learn to govern themselves for the sake of their own preservation and welfare nor is a knowledge of the principles of legal science less necessary to every citizen the laws of man know as little of mercy as the laws of nature in that law never admits ignorance as an excuse for wrong it is a proof of the essential justice of our system of jurisprudence that so many citizens pass safely through life totally ignorant of the law and relying merely upon their own sense of what should be and yet every day gives proof that ignorance is always dangerous the study of such a work as this will not make a youth a lawyer but it will fix in his mind a system of broad principles which cannot fail to be useful practically about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
