hindu nationalism is transforming india as an increasingly dominant ideology and political force but it is also a global phenomenon with sections of india s vast diaspora drawn to or actively supporting right wing hindu nationalism indians overseas can be seen as an important even inextricable aspect of the movement this is not a new dynamic diasporic hindutva hindu ness has grown over many decades this book explores how and why the movement became popular among india s diaspora from the second half of the twentieth century it shows that hindutva ideology and its plethora of organisations have a distinctive resonance and way of operating overseas the movement and its ideas perform significant particular functions for diaspora communities with a focus on britain edward t g anderson argues that transnational hindutva cannot simply be viewed as an export this phenomenon has evolved and been shaped into an important aspect of diasporic identity a way for people to connect with their homeland he also sheds light on the impact of conservative indian politics on british multiculturalism migrant politics and relations between various minoritised communities to fully understand the hindutva movement in india and identity politics in britain we must look at where the two come together
