## **Socio-Philosophical Approach to Education**

2005

this book develops for the readers plato's socrates non formalized philosophical practice of learning through questioning in the company of others in doing so the writer confronts plato's socrates in the words of john dewey as the dramatic restless cooperatively inquiring philosopher of the dialogues whose view of education and learning is unique 1 it is focused on actively pursuing a form of philosophical

understanding irreducible to truth of a propositional nature which defies transfer from practitioner to pupil 2 it embraces the perennial on the wayness of education and learning in that to interrogate the virtues or the good life through the practice of the dialectic is to continually renew the quest for a deeper understanding of things by returning to reevaluating and modifying the questions originally posed regarding the good life indeed socratic philosophy is a life of questioning those aspects of existence that are most question worthy and 3 it accepts that learning is a process guided and structured by dialectic inquiry and is already immanent within and possible only because of the unfolding of the process itself i e learning is not a goal that somehow stands outside the dialectic as its end product which indicates erroneously that the method or practice is disposable for learning occurs only through continued sustained communal dialogue
