this is a new release of the original 1923 edition

The Adventures of a Nature Guide

2013-10

excerpt from the adventures of a nature guide the people of the united states have within the past generation created national parks state parks city parks and made wild life reservations recognizing their higher values to people for their uses in education recreation and hopefulness i wish that every park had a nature guide and that every wild place might early become a park there now are a number of cabinet positions each with a secretary to

control and direct its work but is it not time to have a directory of parks and recreation something for all time and for all people instead of one man directing this there should be a number a board of directors who are directly responsible to the public this should be a department separate from and independent of all cabinet positions and should outrank them about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
