superb execution relies upon rigorous project documentation a project will only be built as well as it is documented this publication focuses on the key documentation needs of the landscape architectural design and construction documentation process that includes both design documentation and construction documentation as well as all that which occurs in the transition from one phase to the other documentation requirements include those components necessary to explore and define design intent logic physical proposals and ultimately the specific components included within construction and bid documents discover how proper documentation facilitates every stage of the design process from pre planning to construction and leads to a highly resolved built outcome understand the principles behind these documentation phases implement best practices specific to each documentation phase and

drawing from title block and cover sheet design to soil plans and plant protection organize keynoting systems cross referencing and interdisciplinary coordination amongst multiple consultants and vendors study sample project documents from a leading landscape architecture firm to better understand the elements and benefits of complete and well coordinated project documentation these standards have been time tested by over 150 designers at the industry leading landscape architecture firm design workshop reflecting a range of project types including parks streetscapes urban spaces and over structure construction this guide shares the methods behind the success to facilitate exceptional built outcomes through principled documentation practices

this book explains the requirements for compliance with fda regulations and iso standards 9001 13485 for documented information controls and presents a methodology for compliance the document control system dcs or documented information control system dics is the foundation of a quality management system it is the first quality system element that must be implemented because the establishment and control of documented processes and information in a quality controlled environment is dependent on the ability to proactively manage access to documents and the movement of documents through the document life cycle a well developed document control system benefits business by improving knowledge retention and knowledge transfer within and across business units improving access to knowledge based information improving employee performance by providing standardized processes and communicating clear expectations improving customer communication and satisfaction by providing documented information from which common understanding can be achieved providing traceability of activities and documentation throughout the organization improving organization of and access to documents and data sample documents are included in the appendixes of this book to help clarify explanations and a full set of formatted

procedures and document templates are available for download to get you off to an even faster start this book provides a process based approach that can be used for controlling all forms of documented information that are required to be managed under the quality management system
