Nonproject Use of Project Lands and Water for the City of Virginia Beach Water Supply Project, Gaston and Roanoke Rapids Project, Brunswick County 1995

this report is a first of its kind work to provide evidence on how cities investments in innovation and data use can pay off in powerful ways for residents it offers analysis on the different ways local governments build capacity at the strategic and technical level from organisational structure and strategy to resource allocation and outcome evaluation

The City: Land use, structure, and change in the Western city 2002

in an era of big data and smart cities this book is an innovative and creative contribution to our understanding of urban energy use societies have basic data needs to develop an understanding of energy flows for planning energy sustainability however this data is often either not utilized or not available using california as an example the book provides a roadmap for using data to reduce urban greenhouse gas emissions by targeting programs and initiatives that will successfully and parsimoniously improve building performance while taking into account issues of energy affordability this first of its kind methodology maps high detail building energy use to understand patterns of consumption across buildings neighborhoods and socioeconomic divisions in megacities the book then details the steps required to replicate this methodology elsewhere and shows the importance of openly accessible building energy data for transitioning cities to meet the climate planning goals of the twenty first century it also explains why actual data not modeled or sampled is critical for accurate

analysis and insights finally it acknowledges the complex institutional context for this work and some of the obstacles utility reluctance public agency oversight funding and path dependencies this book will be of great value to scholars across the environmental sectors but especially to those studying sustainable urban energy as well as practitioners and policy makers in these areas

Report on Land Use Zoning Survey, the City of Seattle 1938

over the next 20 years most low income countries will for the first time become more urban than rural understanding demographic trends in the cities of the developing world is critical to those countries their societies economies and environments the benefits from urbanization cannot be overlooked but the speed and sheer scale of this transformation presents many challenges in this uniquely thorough and authoritative volume 16 of the world s leading scholars on urban population and development have worked together to produce the most comprehensive and detailed analysis of the changes taking place in cities and their implications and impacts they focus on population dynamics social and economic differentiation fertility and reproductive health mortality and morbidity labor force and urban governance as many national governments decentralize and devolve their functions the nature of urban management and governance is undergoing fundamental transformation with programs in poverty alleviation health education and public services increasingly being deposited in the hands of untested municipal and regional governments cities transformed identifies a new class of policy maker emerging to take up the growing responsibilities drawing from a wide variety of data sources many of them previously inaccessible this essential text will become the benchmark for all involved in city level research policy planning and investment decisions the national research council is a private non profit institution based in washington dc providing services to the us government the public and the scientific and engineering communities the editors are members of the council s panel on urban population dynamics

Innovation and Data Use in Cities A Road to Increased Well-being **2021-12-21**

drawing upon the smart experiences of world class cities in north america canada and europe this book provides the evidence to show how entrepreneurship based and market dependent representations of knowledge production are now being replaced with a community of policy makers academic leaders corporate strategists and growth management alliances with the potential to liberate cities from the stagnation which they have previously been locked into by offering communities the freedom to develop polices with the leadership and strategies capable of reaching beyond the idea of creative slack a process of reinvention whereby cities become smarter in using intellectual capital to not only meet the efficiency requirements of wealth creation but to become centres of creative slack the political leadership capable of not only being economically innovative or culturally creative but enterprising in opening up reflexively absorbing and discursively shaping the democratic governance of such developments the democratic governance to sustain such developments drawing together the critical insights from papers from a collection of leading international experts on the transition to smart cities this book proposes to do what has recently been asked of those responsible for creating smarter cities that is provide the definitional components critical insights and institutional means by which to get beyond the all too often self congratulatory tone cities across the world strike when claiming to be smart and by focussing on the critical role master plans and design codes play in supporting the sustainable development of communities this book was published as a special issue of urban technology

Transportation Controls to Reduce Automobile Use and Improve

Air Quality in Cities 1974

this is a book about the reality of place in america the events and influences that led to the america we recognize today it is a book about the growth of american cities and their suburbs during the twentieth century about institutions and metropolitan governance about real estate development and finance about housing and the lack of it about the emergence and perhaps the eventual debilitation of cities and suburbs alike incorporating the thinking of visionary city planners and land use economists the author presents a lucid primer on the economics of land its development and usage and on how things actually get done in the real estate industry

Energy Use in Cities 2020-09-25

mixed use development is about retaining or creating a mix of different uses in cities or neighbourhoods the trend in uk development has been towards specialisation and areas with single uses increasing the mix of uses is thought to reduce the need to travel lower the likelihood of crime improve the ambience and attractiveness of areas and contribute to the sustainability of cities

Ground-water-use Trends in the Twin Cities Metropolitan Area, Minnesota, 1880-1980 1983

this volume offers a selection from the papers presented at the 2005 annual symposium on arabic linguistics held at the university of illinois at urbana champaign the papers cover a variety of topics in arabic linguistics ranging from the lexicon phonology syntax and computational linguistics

Bulletin Index-digest System. Service 4: Excise Taxes 2013-10-31

from products we use to clothes we wear and spaces we inhabit we rely on colour to provide visual appeal data codes and meaning color and design addresses how we understand and experience colour and through specific examples explores how colour is used in a spectrum of design based disciplines including apparel design graphic design interior design and product design through highly engaging contributions from a wide range of international scholars and practitioners the book explores colour as an individual and cultural phenomenon as a pragmatic device for communication and as a valuable marketing tool color and design provides a comprehensive overview for scholars and an accessible text for students on a range of courses within design fashion cultural studies anthropology sociology and visual and material culture its exploration of colour in marketing as well as design makes this book an invaluable resource for professional designers it will also allow practitioners to understand how and why colour is so extensively varied and offers such enormous potential to communicate

Cities Transformed 1893

climate change is one of the inescapable themes of current times climate change confronts society in issues as diverse as domestic and international political debate and negotiation discussion in the media and public opinion land management choices and decisions and concerns about environmental social and economic priorities now and for the future climate change also spans spatial temporal and organisational scales and has strong links with nature society relationships environmental dynamics and vulnerability understanding the full range of possible consequences of climate change is essential for informed decision making and debate this book provides a collection of chapters that span environmental social and economic aspects of climate change together the chapters provide a diverse and contrasting series that highlights the need to analyze review and

debate climate change and its possible impacts and consequences from multiple perspectives the book also is intended to promote discussion and debate of a more integrated inclusive and open approach to climate change and demonstrates the value of geography in addressing climate change issues this book was originally published as a special issue of annals of the association of american geographers

The Lawyer and Credit Man 2013-09-13

contains all the formal opinions and accompanying orders of the federal power commission in addition to the formal opinions there have been included intermediate decisions which have become final and selected orders of the commission issued during such period

Creating Smart-er Cities 1942

identifies and describes specific government assistance opportunities such as loans grants counseling and procurement contracts available under many agencies and programs

Journal of the Senate, Legislature of the State of California 2015-06-11

over the last half century historic preservation has been on the rise in american cities and towns from urban renewal and gentrification projects to painstaking restoration of victorian homes and architectural landmarks in this book nancy r hiller brings together individuals with distinctive styles and perspectives to talk about their passion for preservation they consider the meaning of place and what motivates those who work to save and

care for places the role of place in the formation of identity the roles of individuals and organizations in preserving homes neighborhoods and towns and the spiritual as well as economic benefits of preservation richly illustrated historic preservation in indiana is an essential book for everyone who cares about preserving the past for future generations

Urban Economics and Land Use in America: The Transformation of Cities in the Twentieth Century 1975

japan is one of the most crowded countries on earth with three fourths of its population now living in cities tokyo is easily the most populous city on the planet and yet though closely packed its citizens dwell together in relative peace in america inner city violence often attributed in part to overcrowding is frequently emphasized as one of the great social problems of the day what might we learn from japan s situation that could be applied to our own as we approach the twenty first century in this collection an interdisciplinary group of international scholars seek to understand and explain the process and characteristics shaping the modern japanese city with frequent comparisons to the american city they consider such topics as urban landscapes the quality of life in the suburbs spatial mixing of social classes in the city land use planning and control environmental pollution and images of the city in japanese literature the only book on the subject the japanese city surveys the important literature and highlights the current issues in urban studies the numerous photographs maps tables and graphs combined with the high quality of the contributions offer a comprehensive look at the contemporary japanese city contributors william burton david l callies roman cybriwsky kuniko fujita theodore j gilman richard child hill p p karan robert kidder cotton mather and kohei okamoto

An Epidemiologic Study of Heroin Use Patterns and Trends in Four Cities on the Mexican-American Border 2002

climate change is believed to be a great challenge to built environment professionals in design and management an integrated approach in delivering a sustainable built environment is desired by the built environment professional institutions the aim of this book is to provide an advanced understanding of the key subjects required for the design and management of modern built environments to meet carbon emission reduction targets in design and management of sustainable built environments an international group of experts provide comprehensive and the most up to date knowledge covering sustainable urban and building design management and assessment the best practice case studies of the implementation of sustainable technology and management from the bre innovation park are included design and management of sustainable built environments will be of interest to urban and building designers environmental engineers and building performance assessors it will be particularly useful as a reference book for undergraduate and postgraduate students in the built environment field
