behavioural economics amitai etzioni argues that societies must find a way to balance individual rights and the common good this point of balance may change as new technologies develop the natural and international environments change and new social forces arise some believe the united states may be unduly shortchanging individual rights that need to be better protected specifically should the press be granted more protection or should its ability to publish state secrets be limited should surveillance of americans and others be curtailed should american terrorists be treated differently from others how one answers these questions etzioni shows invites a larger fundamental question where is the proper point of balance between rights and security etzioni implements the social philosophy liberal communitarianism its key assumptions are that neither individual rights nor the common good should be privileged that both are core values and that a balance is necessary between them etzioni argues that we need to find a new balance between our desire for more goods services and affluence particularly because economic growth may continue to be slow and jobs anemic the key question is what makes a good life especially for those whose basic needs are sated who are we where is the boundary between us and everything else are we all multiple personalities and how can we control who we become from distinguished psychologist robert levine comes this provocative and entertaining scientific exploration of the most personal and important of all landscapes the physical and psychological entity we call our self using a combination of case studies and cutting edge research in psychology biology neuroscience virtual reality and many other fields levine challenges cherished beliefs about the unity and stability of the self but also suggests that we are more capable of change than we know transformation levine shows is the human condition at virtually every level physically our cells are unrecognizable from one moment to the next cognitively our self perceptions are equally changeable a single glitch can make us lose track of a body part or our entire body or to confuse our very self with that of another person psychologically we switch back and forth like quicksilver between incongruent sometimes adversarial sub selves socially we appear to be little more than an ever changing troupe of actors and culturally the boundaries of the self vary wildly around the world from the confines of one s body to an entire village the self in short is a fiction vague arbitrary and utterly intangible but it is also interminably fluid and this unleashes a world of potential engaging informative and ultimately liberating stranger in the mirror will change forever how you think about your self and what you might become this volume is currently the only textbook devoted to the study of the self republished in its original form by psychology press in 2007 it carefully documents the changing conceptions and the value accorded the self in psychology over time by the early 21st century with the rise of china economies of east asia and india the prognosis of a strong asia showed promise the indo pacific region essentially western pacific and the indian ocean deservedly came to be recognised as the new centre of gravity in the evolving world economic order asian states have exhibited leadership in a range of significant areas such as economics diplomacy military power science technology innovation and soft power thus adding traction to the notion of asia century of shared prosperity and common destiny under this overarching geo strategic environment it is imperative that the two most populous and growing economic powers india and china move towards achieving consensus co operation and strategic trust

rather than compete and contest however since the tumultuous border war of 1962 there exists a deep distrust of each other's motives across the himalayan barriers to achieve this india and china ought to share their perspectives on the key drivers of divergences and work towards mitigating the same to build strategic trust this book seeks to assess the causes of strategic mistrust in sino india relations and recommend measures for building trust and improving bilateral relations towards that end the ten divergences have been taken as individual chapters with both indian and chinese scholars providing respective perspectives lila corwin berman asks why over the course of the twentieth century american jews became increasingly fascinated even obsessed with explaining themselves to their non jewish neighbors what she discovers is that language itself became a crucial tool for jewish group survival and integration into american life berman investigates a wide range of sources radio and television broadcasts bestselling books sociological studies debates about jewish marriage and intermarriage jewish missionary work and more to reveal how rabbis intellectuals and others created a seemingly endless array of explanations about why jews were indispensable to american life even as the content of these explanations developed and shifted over time the very project of self explanation would become a core element of jewishness in the twentieth century thus begins market leading author david myers discussion of developmental psychology in unit 9 of his new myers psychology for ap second edition with an undeniable gift for writing dr myers will lead your students on a guided tour of psychological science and poignant personal stories dr myers teaches illuminates and inspires four years ago we published this ground breaking text which is correlated directly to the ap course today we build on that innovation and proudly introduce the 2nd ap edition whether you are new to ap psychology or have many years under your belt this uniquely ap book program can help you achieve more this new volume covers studies and reviews published in the period 1975 to 1988 its focus is not on the evaluation of current research but rather it calls attention to available works that might be relevant for those wishing to do further research in a specified area for this reason the editors refer to other reviews of parts of this literature that may provide a somewhat different perspective or that include citations selected on different criteria when a study deals with more than one major variable or effect it may be cited in several chapters
