The Egg of Columbus 2012-02-06

the matter dealt with in this work is the hardest and most difficult subject anyone can touch it attempts to explain the ways to make money in markets by the use of strange natural but true cycles a tiny little bit of the surface is here but scratched when we consider that some writers hav used up 20 000 pages such as swedenborg did athenaeus used for the same about 3 000 pages one old greek text in my possession used 18 pages to cover the laws of course every reader will realize quickly as soon as he has completed his first reading that the 20 000 page work of swedenborg covers everything of life that possesses a cycle of any kind or description while we for practical trading require but the very common major moves to make money in the markets it would be a different story if we would want to get things down so close that each of the 400 or 500 contracts traded at this time during a trading day would be specified to the moment as well as to the exact eighth price this actually is possible and in this direction i am a present working on my own research you might gasp at this statement but you soon will stop when you are through with this work because you will have to catch you own breath to digest do not think for a moment that there were not people living ages ago who were much smarter and wiser than anyone living today i have my wisdom that little which i have from them and don t owe the present generation a nickel s worth of thanks the present generation actually held me back many years having to wade through their works first until hard thinking put me on the right trail george bayer carmel california january 2 1942

Turning Four Hundred Years of Astrology to Practical Use and Other Matters 2006

trading the financial markets is extremely difficult but with the right approach traders can achieve success nobody knows this better than authors larry pesavento and leslie jouflas both traders and educators of traders who have consistently used pattern recognition to capture profits from the markets in trade what you see pesavento and jouflas show traders how to identify patterns as they are developing and exactly where to place entry and exit orders while some patterns derive from the techniques of wall street s earliest traders and other patterns reflect pesavento s emphasis on the geometry of market movements and fibonacci numbers filled with hard won knowledge gained through years of market experience trade what you seeoutlines both a practical and sophisticated approach to trading that will be of interest to both novice and seasoned traders alike larry pesavento is a forty year veteran trader he operates a site
