this selected issues paper reviews the extent to which growth in ethiopia has translated into higher living standards a key feature of the economic strategy has been an explicit commitment to poverty reduction and structural transformation this is underpinned by the vision of a developmental state whereby a proactive public sector leads the development process and the private sector is oriented to support the development goals the paper also identifies key bottlenecks hindering further broadening of growth across key sectors to reduce poverty and highlights the main areas for policy action

The Educational System of the German Democratic Republic

in the first edition of this book published in 1988 shirley engle and i offered a broader and more democratic curriculum as an alternative to the persistent back to the basics rhetoric of the 70s and 80s this curriculum urged attention to democratic practices and curricula in the school if we wanted to improve the quality of citizen participation and strengthen this democracy school practices during that period reflected a much lower priority for social studies fewer social studies offerings fewer credits required for graduation and in many cases the job descriptions of social studies curriculum coordinators were transformed by changing their roles to general curriculum consultants the mentality that prevailed in the nation s schools was back to the basics and the basics never included or even considered the importance of heightening the education of citizens we certainly agree that citizens must be able to read write and calculate but these abilities are not sufficient for effective citizenship in a democracy this version of the original work appears at a time when young citizens teachers and schools find themselves deluged by a proliferation of curriculum standards and concomitant mandatory testing in the 90s virtually all subject areas including united states history geography economic and civics developed curriculum standards many funded by the federal government subsequently the national council for the social studies issued the social studies curriculum standards that received no federal support accountability captured in the no child left behind act passed by congress has become a powerful political imperative that has a substantial and disturbing influence on the curriculum teaching and learning in the first decade of the 21st century

this controversial new study breaks with the tradition of basing political studies on analyses of institutions and political personalities by likening the republic of korea to a laboratory for the clash of political cultures in the late 1940s the americans embarked upon a democratization programme designed to create a western bulwark against the spread of communism in east asia the intervening years have seen the advent and demise of military rule with south korea now having a democratically elected government although the us strategy thus seems successful the political crises of 1995 in fact indicate that many obstacles remain here to the adoption of western style democracy this study argues that socialization in general and political socialization in particular are key factors in any analysis of democracy be it in korea or elsewhere accordingly the work draws on moral education textbooks together with surveys and interviews among members of the urban intellectual elite in this manner the psychological roots of power and authority key concepts to an understanding of good government are explored

democracy is both an obvious and dubious idea here s why democracy is an obvious idea for most of history most governments divided people into the few who rule and the many who obey the few then used the state to advance their own private interests at the expense of the many rulers were less like noble protectors appointed by god and more like intestinal parasites the obvious solution is to eliminate the distinction between those who rule and those who obey make every citizen both a ruler and a subject of that rule this ensures government promotes everyone s interests thus democracy is the best form of government it s too bad it took most of civilized history to realize this and too bad that the world isn t more democratic than it is here s why democracy is a dubious idea government decisions are high stakes it decides matters of war and peace prosperity and poverty freedom or oppression yet we let incompetent people steer the ship of state most voters are ignorant and process what little information they have in biased and irrational ways they fall prey to propaganda and demagogues they are conformists and don t even try to vote their interests democracy is the political equivalent of drunk driving thus democracy is a defective form of government democracy is a method by which the masses shoot themselves in their feet philosophy students often start essays by writing since the dawn of time humanity has pondered in this case these arguments and concerns are old if not dawn of time old we find laypeople pundits social scientists and philosophers making these two arguments today but in ancient athens socrates plato and aristotle said similar things
