When the Machine Made Art 2014-04-10 considering how culturally indispensable digital technology is today it is ironic that computer generated art was attacked when it burst onto the scene in the early 1960s in fact no other twentieth century art form has elicited such a negative and hostile response when *the machine made art* examines the cultural and critical response to computer art or what we refer to today as digital art tracing the heated debates between art and science the societal anxiety over nascent computer technology and the myths and philosophies surrounding digital computation taylor is able to identify the destabilizing forces that shape and eventually fragment the computer art movement

"Painting, Politics and the Struggle for the ?ole de Paris, 1944?1964 " 2017-07-05
painting politics and the struggle for the ole de paris 1944 1964 is the first book dedicated to the postwar or nouvelle ole de paris it challenges the customary relegation of the ole de paris to the footnotes not by arguing for some hitherto hidden merit for the art and ideas associated with

this school but by establishing how and why the ole de paris was a highly significant vehicle for artistic and political debate the book presents a sustained historical study of how this school was constituted by the paintings of a diverse group of artists by the combative field of art criticism and by the curatorial policies of galleries and state exhibitions by thoroughly mining the extensive resources of the newspaper and art journal press gallery and government archives artists writings and interviews with surviving artists and art critics the book traces the artists exhibitions and art critical debates that made the ole de paris a zone of aesthetic and political conflict through setting the ole de paris into its artistic social and political context natalie adamson demonstrates how it functioned as the defining force in french postwar art in its defence of the tradition of easel painting as well as an international point of reference for the expansion of modernism in doing so she presents a wholly new perspective on the vexed relationships between painting politics and national identity in france during the two decades following world war ii

Modern: Genius, Madness, and One Tumultuous Decade That Changed Art Forever

2022-04-19 a revelatory fast paced account of the most exciting frenzied and revolutionary decade in art history 1905 to the dawn of world war i in 1914 and the avant garde artists who indelibly changed our visual landscape modern begins on a specific day march 22 1905 at a specific place the salon des indépendants in paris where works of art we recognize as modern were first exhibited drawing on his forty five year fine art career author philip hook illuminates how this new art came to be and how truly shocking it was with hook s expert guidance we witness movement upon movement that burst forth in dizzying succession fauvism expressionism primitivism symbolism cubism futurism and abstract art as hook barnstorms across europe to london germany moscow scandinavia and everywhere modern art was being made his vivid accounts breathe new life into the work and times of picasso matisse modigliani kandinsky malevich klimt schiele munch and nearly two hundred other artists who painted sculpted and exhibited alongside them and whose collective genius was understood and appreciated by few at the time hook reconsiders the decade from a series of fresh angles what was the conventional art against which modernism sought to rebel why were avant garde artists so self obsessed what persuaded a few bold collectors to buy difficult modern art and why did others pay so much money for old masters at the same time modern helps us answer these questions and more and to see how avant garde artists marshaled their genius and oftentimes their madness to create works of such profound consequence they still reverberate today and which taken together made for a movement more influential than even the renaissance

The Contemporary Art Gallery 2016-09-23 everyone who looks at contemporary art is familiar with galleries but visual features of these mysterious temples tend to be taken for granted the basic purpose of this book is to enliven the reader s latent knowledge of galleries including architectural motifs the intended impression that is conveyed to the visitor and human interactions within them the contemporary art world system includes artists studios art galleries homes of collec tors and public art museums to comprehend art one needs to understand these settings and how it travels through them the contemporary art gallery is a store where luxury goods are sold what distinguishes it from stores selling other luxuries upscale clothing jewelry and posh cars is the nature of the merchandise while much has been written about the art this book uncovers the secretive culture of the galleries themselves the gallery is the public site where art is first seen anyone can come and look for free this store a commercial site is where

aesthetic judgments are made art's value is determined in this marketplace by the consensus formed by public opinion professional reviewers and sales the gallery then is the nexus of the enigmatic billion dollar art world and it is that space that is dissected here the first chapter briefly describes the beginnings of the present contemporary art gallery the second presents the experience of gallery going presenting summary accounts of visits to some contemporary galleries the third expands and extends that analysis with detailed close up descriptions and comparative evaluations of many diverse contemporary galleries in order to identify the challenges provided by these marvelous places then the fourth chapter indicates why in the near future due to the proliferation of myriad art fairs and online platforms extant today such galleries might disappear altogether

Pictures of Nothing 2023-10-17 an illuminating exploration of the meaning of abstract art by acclaimed art historian kirk varnedoe what is abstract art good for what's the use for us as individuals or for any society of pictures of nothing of paintings and sculptures or prints or drawings that do not seem to show anything except themselves in this invigorating account of abstract art since jackson pollock eminent art historian kirk varnedoe the former chief curator of painting and sculpture at the museum of modern art asks these and other questions as he frankly confronts the uncertainties we may have about the nonrepresentational art produced in the past five decades he makes a compelling argument for its history and value much as e h gombrich tackled representation fifty years ago in art and illusion another landmark a w mellon lectures volume realizing that these lectures might be his final work varnedoe conceived of them as a statement of his faith in modern art and as the culminating example of his lucidly pragmatic and philosophical approach to art history he delivered the lectures edited and reproduced here with their illustrations to overflowing crowds at the national gallery of art in washington in the spring of 2003 just months before his death with brilliance passion and humor varnedoe addresses the skeptical attitudes and misunderstandings that we often bring to our experience of abstract art resisting grand generalizations he makes a deliberate and scholarly case for abstraction showing us that more than just pure looking is necessary to understand the self made symbolic language of abstract art proceeding decade by decade he brings alive the history and biography that inform the art while also challenging the received wisdom about distinctions between abstraction and representation modernism and postmodernism and minimalism and pop the result is a fascinating and ultimately moving tour through a half century

The Book Made Art 1986 i was in high spirits all through my unwise teens considerably puffed up after my drawings began to sell with that pride of independence which was a new thing to daughters of that period the reminiscences of mary hallock foote mary hallock made what seems like an audacious move for a nineteenth century young woman she became an artist she was not alone forced to become self supporting by financial panics and civil war thousands of young women moved to new york city between 1850 and 1880 to pursue careers as professional artists many of them trained with masters at the cooper union school of design for women where they were imbued with the unity of art ideal an aesthetic ideology that made no distinction between fine and applied arts or male and female abilities these women became painters designers illustrators engravers colorists and art teachers they were encouraged by some of the era s best known figures among them tribune editor horace greeley and mechanic philanthropist peter cooper who blamed the poverty and dependence of both women and workers on the separation of mental and manual labor in industrial society the most acclaimed artists among them owed their success to new york s conspicuously egalitarian art institutions and the rise of the illustrated press yet within a generation their names accomplishments and the aesthetic ideal that guided them virtually disappeared from the history of american art art work women artists and democracy in mid nineteenth century new york recaptures the unfamiliar cultural landscape in which spirited young women daring social reformers and radical artisans succeeded in reuniting art and industry in this interdisciplinary study april f masten situates the aspirations and experience of these forgotten women artists and the value of art work itself at the heart of the capitalist transformation of american society

Intimate Geometries 2016-10-11 paint made flesh examines the ways in which european and american painters have used oil paint and the human body to convey enduring human vulnerabilities among them anxieties about desire appearance illness aging war and death in the tradition of great figure painting stretching back to rembrandt and titian the 34 artists in the exhibition working in the years since world war ii exploit oil paint s visual and tactile properties to mirror those of the body while exploring the body s capacity to reflect the soul drawn from

private and public collections and arranged by chronology and nationality the 43 paintings in the exhibition reflect a wide range of styles strong colors and vigorous brushwork associated with German expressionism give crude life to figures by artists ranging from the San Francisco Bay area painters to a younger generation including Markus Lüpertz and Susan Rothenberg candid depictions of flesh by British painters Francis Bacon and Lucian Freud suggest psychological pain at the margins of society while Paint as Skin betrays the inner feelings of Jenny Saville's swollen females

We are Made of Grass, Soil, Trees, and Flowers 2021-11-30 drawing on unpublished documents and oral histories an illustrated examination of an iconic artwork of an artist who has made a lifework of tactical evasion one wintry day in 1983 alongside other street sellers in the East Village David Hammons peddled snowballs of various sizes he had neatly laid them out in graduated rows and spent the day acting as obliging salesman he called the evanescent and unannounced street action Bliz Aard Ball Sale thus inscribing it into a body of work that from the late 1960s to the present has used a lexicon of ephemeral actions and self consciously black materials to comment on the nature of the artwork the art world and race in America and although Bliz Aard Ball Sale has been frequently cited and is increasingly influential it has long been known only through a mix of eyewitness rumors and a handful of photographs its details were as elusive as the artist himself even its exact date was unrecorded like so much of the artist's work it was conceived it seems to slip between our fingers to trouble the grasp of the market as much as of history and knowability in this engaging study Elena Filipovic collects a vast oral history of the ephemeral action uncovering rare images and documents and giving us singular insight into an artist who made an art of making himself difficult to find and through it she reveals Bliz Aard Ball Sale to be the backbone of a radical artistic oeuvre that transforms such notions as art commodity performance and even race into categories that shift and dissolve much like slowly melting snowballs

in u s a manufactured for the publishers by american book stratford press inc new york this book has been set in caledonia type with bodoni bold headings printed on text paper manufactured by p h glatfelter co wove rrr and warren s cumberland dull papers bound in interlaken winco cloth first printing 1949 second printing 1952 designed by sidney solomon to my mother the science of aesthetics was originally based on classical art even a contemporary philosopher of art like croce never departs from the data of the graeco roman and renaissance tradition modern art however has made a decisive break with that tradition and considerable confusion has been caused by the application to its products of criteria of judgment derived from a past historical phase even in our private unprofessional approach to modern art we come unconsciously armed with such prejudices what therefore was necessary was a complete revision of aesthetics on the basis of the ample material produced by the modern movement in art and this mr allen leepa has now provided the material in question consists primarily of the works of art themselves and these in significant selection mr leepa has subjected to a thorough functional analysis but he realises that the explanation of art does not end with its formal dissection the function of art as he says is to express emotional meanings in the organized patterns of a medium and he has ventured on the much more difficult task of defining the nature of that psychological process at this point formal analysis is of no avail and what we fall back on is the artist's own description of his activity luckily modern artists have been surprisingly communicative and mr leepa has not failed to take advantage of the statements which from time to time artists like picasso matisse klee and mondrian have made he has been aided in his understanding of what they mean which is not always clear by foreword his own practice as a painter which has saved him from some of the simplifications which an outsider might be tempted to make for the sake of a neat system admirable for example is the way in which he insists in chapter x on the mutual interaction of medium and idea in the process of creation we are far too apt to think of the work of art as the illustration of a preconceived idea instead of an organic growth in which idea only played the part of germ or seed particular attention should be given to all that mr leepa has to say on the subject of abstract art for which the average critic has hitherto reserved his most obstinate resistance in its various forms and there is a wide divergence of aim within the so called abstract movement this type of art does of course make the most decisive break with the classical or humanist tradition it is to be observed however that it is precisely this type of art which lends itself to the formulation of a coherent aesthetic and though mr leepa quite rightly insists on its individualistic and subjective nature the final result would seem to be the discovery of archtypal forms of the widest social significance the last point i would like to select for emphasis from a book so replete with interest is the firm way in which mr leepa insists on the social significance of his subject this he does most directly in his brilliant analysis of picasso's guernica but nowhere in this book will those who would like to regard the modern movement in art as a reactionary or escapist activity find any support for their prejudice we may freely condemn the age we live in and deplore its social iniquities but it is precisely because he is the last man to have any illusions in this respect that the artist i

□□ 1956 the avant garde is perhaps the most important and influential concept in the history of modern culture for over a hundred years it has governed critical and historical assessment of the quality and significance of an artist or a work of art in any medium if these have been judged to be avant garde then they have been worthy of consideration if not then by and large they have not and neither critics nor historians have paid them much attention in short modern art is and has been whatever the avant garde has made or has said it is but very little attempt

has been made to explore why the avant garde carries so much authority or how it came to do so what is more the term remains a difficult one to define and is often used in a variety of ways what is the relation between the avant garde that is the social entity the club and avant garde qualities in a work of art or design or architecture or any other cultural product what does avant gardism mean moreover now that contemporary art seems to have broken all taboos and is at the centre of a billion pound art market is there still an avant garde if so what is the point of it and who are the artists concerned in this very short introduction david cottington explores the concept of the avant garde and examines its wider context through the development of western modernity capitalist culture and the global impact of both about the series the very short introductions series from oxford university press contains hundreds of titles in almost every subject area these pocket sized books are the perfect way to get ahead in a new subject quickly our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable
