is a fact of life for professors at many
institutions in addition to pedagogy instructors
of these courses must also be concerned with legal
ethical financial technological personnel and
management issues virtually all introductory
courses are large ones as are the popular
intermediate courses at large institutions
typically little or no training or instruction is
provided to new professors about how to manage
large classes successfully this book is a valuable
resource for any college teacher adjunct or full
time facing a large class it will also be useful
for college administrators who might want to issue
it to teachers especially adjuncts assigned to
large classes for the first time a distillation of
years of experience by the author who started his
college teaching career in 1969 in teaching large
classes and in coaching other professors to do the
same this guide is concise and user friendly it
employs teaching as acting as a common theme with
many practical examples covering all of the major
aspects of organizing managing and teaching a
