2021-02-05

computer aided design of user interfaces vi gathers the latest experience of experts research teams and leading organisations involved in computer aided design of user interactive applications this area investigates how it is desirable and possible to support to facilitate and to speed up the development life cycle of any interactive system requirements engineering early stage design detailed design development deployment evaluation and maintenance in particular it stresses how the design activity could be better understood for different types of advanced interactive ubiquitous computing and multi device environments

how could privacy play a key role in protecting digital identities how could we merge privacy law policies regulations and technologies to protect our digital identities in the context of connected devices and distributed systems in this book the author addresses major issues of identity protection and proposes a service oriented layered framework to achieve interoperability of privacy and secure distributed systems the framework is intended to distill privacy related digital identity requirements business interoperability into a set of services which in turn can be implemented on the basis of open standards technical interoperability the adoption of the proposed framework in security projects and initiatives would decrease complexities and foster understanding and collaborations between business and technical stakeholders this work is a step toward implementing the author s vision of delivering cyber security as a set of autonomous multi platform hosted services that should be available upon user request and on a pay per use basis

see how the principles of service science govern the dynamics driving the adoption of cloud computing in the industry cloud as service shows you how the evolution of enterprise computing platforms to application specific cloud platforms ascps have aligned to business needs you ll also learn processes for developing and building ascps you ll gain insight into how executives managers and technologists are utilizing cloud services cloud service providers equipment manufacturers and software and application vendors participating in cloud supply chains for business the appeal of cloud computing must go beyond the notion of convenient on demand access of networked pooled access to computing resources industry leaders have learned to apply cloud computing to become more nimble cost effective and customer engaging as they strive for competitive advantage regardless of size these companies define and build cloud platforms customized for their needs rather than using someone else s this book shows you how to use a holistic end to end view of platform planning platform development supply chains and operations to collapse platform development times to a fraction of the original time you ll see that strategies for selling to the cloud market are essentially incomplete and that in order to be successful businesses must become cloud service businesses themselves incorporating cloud technologies in their engineering it sales and marketing and delivery processes what you ll learn historical perspective to provide insight into the dynamics driving cloud evolution today state of the art in it requirements and cloud solutions the value of user experience ux driven design principles the crucial roles of service brokers and service assurance managers the landscape of emerging cloud services and what they mean to your enterprise service portals and enterprise service buses who this book is for cios ctos data center architects solution architects and application engineers educational institutions building a systems integration curriculum developers who want to understand how their work fits in the cloud ecosystem
