Plant-Fire Interactions 2020-03-17 this book provides a unique exploration of the inter relationships between the science of plant environmental responses and the understanding and management of forest fires it bridges the gap between plant ecologists interested in the functional and evolutionary consequences of fire in ecosystems with foresters and fire managers interested in effectively reducing fire hazard and damage this innovation in this study lies in its focus on the physiological responses of plants that are of relevance for

predicting forest fire risk behaviour and management it covers the evolutionary trade offs in the resistance of plants to fire and drought and its implications for predicting fuel moisture and fire risk the importance of floristics and plant traits in interaction with landform and atmospheric conditions to successfully predict fire behaviour and provides recommendations for pre and post fire management in relation with the functional composition of the community the book will be particularly focused on examples from mediterranean environments but the underlying principles will be of broader utility

The Habitat of Australia's Aboriginal Languages 2008-08-22 the languages of aboriginal australians have attracted a considerable amount of interest among scholars from such diverse fields as linguistics political studies archaeology or social history as a result there is a large number of studies on a variety of issues to do with aboriginal australian languages and the social contexts in which they are used there is however no integrative reader that is easily accessible to the non specialist in any of the areas concerned the collection edited by leitner and malcolm fills this gap looking at aborigines and torres strait islanders and their changing habitats from pre colonial times to the present the book covers languages from a structural and functional linguistic perspective moves on to the issue of cultural maintenance and then turns to language policy planning and the educational and legal dimensions among the many themes discussed are the social and linguistic history of language contact after 1788 including the macassans the demographic base of indigenous languages traditional indigenous languages results of language contact such as the modification of traditional languages and the rise of contact languages pidgins creoles esp kriol torres strait creole and aboriginal english the impact of the aboriginal languages on mainstream australian english maintenance shift revival and documentation of indigenous and contact languages language planning language in education language in the media language in the law courts the contributors are leading experts in their fields the book can serve as a reader for university courses but also as a state of the art work and resource for specialists like applied linguists or educational planners

Climate, Fire and Human Evolution 2015-11-04 the book outlines principal milestones in the evolution of the atmosphere oceans and biosphere during the last 4 million years in relation with the evolution from primates to the genus homo which uniquely mastered the ignition and transfer of fire the advent of land plants since about 420 million years ago ensued in flammable carbon rich biosphere interfaced with an oxygen rich atmosphere born on a flammable earth surface under increasingly unstable climates descending from the

warmer pliocene into the deepest ice ages of the pleistocene human survival depended on both biological adaptations and cultural evolution mastering fire as a necessity this allowed the genus to increase entropy in nature by orders of magnitude gathered around camp fires during long nights for hundreds of thousandth of years captivated by the flickering life like dance of the flames humans developed imagination insights cravings fears premonitions of death and thereby aspiration for immortality omniscience omnipotence and the concept of god inherent in pantheism was the reverence of the earth its rocks and its living creatures contrasted by the subsequent rise of monotheistic sky god creeds which regard earth as but a corridor to heaven once the climate stabilized in the early holocene since about 7000 years ago production of excess food by neolithic civilization along the great river valleys has allowed human imagination and dreams to express themselves through the construction of monuments to immortality further to burning large part of the forests the discovery of combustion and exhumation of carbon from the earth s hundreds of millions of years old fossil biospheres set the stage for an anthropogenic oxidation event affecting an abrupt shift in state of the atmosphere ocean cryosphere system the consequent ongoing extinction equals the past five great mass extinctions of species constituting a geological event horizon in the history of planet earth

Forming a Colonial Economy 1994 this broad ranging 1995 book provides a comprehensive account of the development of australia s colonial economy before the gold rushes noel butlin s analysis of the developing economy includes background discussion of eighteenth century british social economic and military history and a detailed demographic analysis of the australian population over a period of sixty years he goes on to explore the role of private investment in the economy and the way in which dependence on the british public purse was replaced by dependence on private british capital inflow a key focus of the book is the extent to which the australian economy was independent or externally driven that is the level of synergism between australia and britain within this framework noel butlin discusses the central issues of human capital and funding and their impact on the formation of the australian economy forming a colonial economy does for the period to the 1840s what noel butlin s previous landmark economic histories have done for australia from the 1860s to the 1890s it is an ambitious and imaginative book that marks the culmination of a life s work
