people about massive success in the world of fiction and you ll typically hear that it s a game
of hazy crystal balls the sales figures of e l james or dan brown seem to be freakish random
occurrences in an unknowable market but what if there were an algorithm that could reveal a
secret dna of bestsellers regardless of their genre what if it knew just from analyzing the
words alone not just why genre writers like john grisham and danielle steel belong on the
lists but also that authors such as junot diaz jodi picoult and donna tarrt had telltale signs of

the code has been cracked and the results bring fresh new insights into how fiction works
and why we read the bestseller code offers a new theory for why fifty shades of grey sold so
