this book taught me so much about female desire a must read cherry healey did you know that there is an orgasm gap of around 30 between heterosexual couples when they have sex in mind the gap dr karen gurney a clinical psychologist and certified psychosexologist explores not just this gap but the gaps in our knowledge of so much of the most important new science around sex and desire in this book you will learn that nearly everything that you ve been led to believe about female sexuality isn t actually true and that despite what you might think it is possible to simultaneously feel little to no spontaneous desire and have a happy and mutually satisfying sex life long term exploring the mismatch between ideas about sex in our society and what the science tells us mind the gap also explains how this disconnect lies at the root of many of our sexual problems combining science with case studies practical exercises and tips this is a book for anyone who wants to better understand the mechanics of desire and futureproof their sex life for life

## **MIND THE GAP.**

1994

inequality kills both rich and poor die younger in countries with the greatest inequalities in income countries such as the united states with big gaps between rich and poor have higher death rates than those with smaller gaps such as sweden and japan why in this provocative book richard wilkinson provides a novel darwinian approach to the question wilkinson points out that inequality is new to our species in our two million year history human societies became hierarchical only about ten thousand years ago because our minds and bodies are adapted to a more egalitarian life today s hierarchical structures may be considered unnatural to people at the bottom of the heap the world seems hostile and the stress is harmful if you are not in control you re at risk this is a penetrating analysis of patterns of health and disease that has implications for social policy wilkinson concludes that rather than relying on more police prisons social workers or doctors we must tackle the corrosive social effects of income differences in our society

three young women have to accept the direction their lives are heading are they ready to make the leap that will take them where they want to go

## **Mind the Gap**

2011

this book is about one person s search for truth and wholeness the gap referred to in the title is what fuelled that search the empty space between anticipation and disaster longing and loss idealised belief and reality this journey has involved falling into that gap over and over again before slowly learning to recognise and even befriend it as an inevitable aspect of life if i could backtrack through time and hand this memoir to my twenty year old self he might have avoided some big mistakes then it would resemble a flat pack furniture assembly manual with words replacing the diagrams of course the conscientious flat pack buyer reads those instructions before assembly however for those who designed and built the original item the instructions were written after it was put together possibly following much trial and error one thing has become clear in the end it is only the universal allen key of compassion that can fit all life s pieces together outwardly this particular story moves from teenage rebellion against working class tradition through far left politics philosophical exchanges on london s underground via various cults offering their versions of psycho salvation at a price finally there is arrival a remembering of completeness of that which has been there all along whilst rambling through the bucolic heartland of the wiltshire somerset border

elle's shattered mind stitches back together with an unexpected twist the full memory of her attack meanwhile someone realizes they have played a far more integral role in elle's situation than they knew plus the fifth is revealed the two part arc wraps up setting the stage for the most unexpected twist yet

## Agenda mind the gap

2020-06-18

this volume features a collection of essays by primatologists anthropologists biologists and psychologists who offer some answers to the question of what makes us human i e what is the nature and width of the gap that separates us from other primates the chapters of this volume summarize the latest research on core aspects of behavioral and cognitive traits that make humans such unusual animals all contributors adopt an explicitly comparative approach which is based on the premise that comparative studies of our closest biological relatives the nonhuman primates provide the logical foundation for identifying human univ sals as well as evidence for evolutionary continuity in our social behavior each of the chapters in this volume provides comparative analyses of relevant data from primates and humans or pairs of chapters examine the same topic from a human or primatological perspective respectively together they cover six broad topics that are relevant to identifying potential human behavioral universals family and social organization predation pressure is thought to be the main force favoring group living in primates but there is great diversity in the size and structure of social groups across the primate order research on the behavioral ecology of primates and other animals has revealed that the distribution of males and females in space and time can be explained by sex speci c adaptations that are sensitive to factors that limit their tness access to resources for females and access to potential mates for males
