relationships with one another that were cautious distant sometimes secretive and often explosive making extensive use of the letters of wife martha ogle forman maddox places the experiences of rose hill s inhabitants enslaved and free within the context of the cultural economic and political history of the state piecing together the scattered information in these documents she offers readers fascinating insights into life and labor on the plantation from grueling daily work schedules to menus for elaborate dinners and teas her account includes comparative analyses of family structures and social practices within the forman family and in the community of enslaved workers individual sections profile thirty eight of the fifty enslaved people at rose hill identifying as far as possible that person s primary work responsibilities family connections and history at the plantation thus giving each a recognized place in the larger history of plantation slavery in the upper south maddox s discussion of rose hill extends to the places around it where the slave culture of the plantation found confirmation and support churches law courts social gatherings agricultural fairs and societies the parlors and sitting rooms of the eastern shore elite the people of rose hill is a fascinating look at the intersection of the constricted world of the plantation with the larger world of early america excerpt from the peoples of the world vol 1 being a popular description of the characteristics condition and customs of the human family entering into a consideration of the matter a little more fully we find that even colour which at first strikes us as the most remarkable difference is as linnaeus long ago declared of comparatively little moment as a specific character as has been so repeatedly pointed out a black face is common to races very widely apart the moors of senegal are among the highest of the superior peoples of the world the bushmen of the cape colony about the lowest yet the first is as swarthy as the neighbouring negroes whilst the last is of the colour of coffee with milk to use a french naturalist s familiar simile the skin of a negro is moreover of exactly the same structure anatomically as that of a flaxen haired norseman and in the mucous layer of very dark complexioned whites the pigment cells which give the colour to the skin of black people are developed in exactly the same way in other words there is a gradation in what has been technically called melanism freckles are simply spots of the same nature as that blackness which owing to the same cause has in the course of time suffused the entire face of the swarthy barbarians of so many parts of the world though at the same time sunshine and warmth are not the sole determining causes of colour otherwise the indians of central america would be as black as the west african negroes though even there the heat has some effect since the queen charlotte islanders who live off the northern coast of british columbia are among the fairest skinned of their race while the indians from mexico southward are among the darkest of all the american families of men there are also endless gradations in the hair of man the wool of the negro the lanky horse tail locks of the north american indian and the fine silky hair of the caucasian races have each some peculiarities links connecting them are not difficult to find but as ethnologists from the time of prichard to that of quatrefages have pointed out there is an infinitely greater variety displayed in a short time after certain of the lower animals are transferred from their original home to a locality where they come under different physical surroundings and influences for example the wool of the sheep will in some hot countries be replaced by short smooth hair while in the high plains of the andes the wild boars are said to acquire a kind of wool and numerous similar changes attributed to climate and the influence of surroundings may be found described in works treating of this department of anthropology about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at
