A King Travels 2012-03-25 a king travels examines the scripting and performance of festivals in spain between 1327 and 1620 offering an unprecedented look at the different types of festivals that were held in iberia during this crucial period of european history bridging the gap between the medieval and early modern eras teofilo ruiz focuses on the travels and festivities of philip ii exploring the complex relationship between power and ceremony and offering a vibrant portrait of spain s cultural and political life ruiz covers a range of festival categories carnival royal entries tournaments calendrical and noncalendrical celebrations autos de fe and corpus christi processions he probes the ritual meanings of these events paying special attention to the use of colors and symbols and to the power relations articulated through these

festive displays ruiz argues that the fluid and at times subversive character of medieval festivals gave way to highly formalized and hierarchical events reflecting a broader shift in how power was articulated in late medieval and early modern spain yet ruiz contends that these festivals while they sought to buttress authority and instruct different social orders about hierarchies of power also served as sites of contestation dialogue and resistance a king travels sheds new light on iberian festive traditions and their unique role in the centralizing state in early modern castile

The Worlds of Christopher Columbus 1992 when columbus was born in the mid fifteenth century europe was largely isolated from the rest of the old world africa and asia and ignorant of the existence of the world of the western hemisphere the voyages of christopher columbus opened a period of european exploration and empire building that breached the boundaries of those isolated worlds and changed the course of human history this book describes the life and times of christopher columbus on the 500th anniversary of his first voyage across the atlantic ocean in 1492 since ancient times europeans had dreamed of discovering new routes to the untold riches of asia and the far east what set columbus apart from these explorers was his single minded dedication to finding official support to make that dream a reality more than a simple description of the man this new book places columbus in a very broad context of european and world history columbus s story is not just the story of one man s rise and fall seen in its broader context his life becomes a prism reflecting the broad range of human experience for the past five hundred years respected historians of medieval spain and early america the authors examine columbus s quest for funds first in portugal and then in spain where he finally won royal backing for his scheme through his successful voyage in 1492 and three subsequent journeys to the new world columbus reached the pinnacle of fame and wealth and yet he eventually lost royal support through his own failings william and carla rahn phillips discuss the reasons for this fall and describe the empire created by the spaniards in the lands across the ocean even though neither they nor anyone else in europe know precisely where or what those lands were in examining the birth of a new world this book reveals much about the times that produced these intrepid explorers

A Further Range 1999 the spanish literature discussed in this volume falls into two main categories the work of galician novelist short story writer and critic emilia pardo bazan and the wider context of prose fiction and criticism during the period 1870 to 1935

45/91 1992 european exploration and conquest expanded exponentially in the late fifteenth and sixteenth centuries and as the horizons of imperial experience grew more distant strategies designed to convey the act of witnessing came to be a key source of textual authority from the relación to the captivity narrative the hispanic imperial project relied heavily on the first person authority of genres whose authenticity undergirded the ideological armature of national consolidation expansion and conquest at the same time increasing pressures for religious conformity in spain as across europe required subjects to bare themselves before external authorities in intimate confessions of their faith emerging from this charged context the unreliable voice of the pícaro poses a rhetorical challenge to the authority of the witness destabilizing the possibility of trustworthy representation precisely because of his or her intimate involvement in the narrative in knowing fictions barbara fuchs seeks at once to rethink the category of the picaresque while firmly centering it once more in the early modern hispanic world from which it emerged venturing beyond the traditional picaresque canon fuchs traces mediterranean itineraries of diaspora captivity and imperial rivalry in a corpus of texts that employ picaresque conventions to contest narrative authority by engaging the picaresque not just as a genre with more or less strictly defined boundaries but as a set of literary strategies that interrogate the mechanisms of truth telling itself fuchs shows how self consciously fictional picaresque texts effectively encouraged readers to adopt a critical stance toward the truth claims implicit in the forms of authoritative discourse proliferating in imperial spain
