The fascinating new novel from Chris Beckett, the Arthur C. Clarke Award-winning author, *Tomorrow*. I'm going to begin my novel. A would-be author has taken time out from life in the city to live in a cabin by a river and write a novel, and not just any novel, a novel that will avoid all the pitfalls and limitations of other novels, a novel that will include everything. At first these new surroundings are so idyllic that it's hard to find the motivation to get started, and then in all its brutality the outside world intervenes, ranging constantly backwards and forwards in time and space. *Tomorrow* becomes a restless search for meaning in a precarious and elusive world.

already renowned for his science fiction and scientific nonfiction arthur c clarke became the world s most famous science fiction writer after the success of 2001 a space odyssey he then produced novels like rendezvous with rama and the fountains of paradise that many regard as his finest works gary westfahl closely examines clarke s remarkable career ranging from his forgotten juvenilia to the passages he completed for a final novel the last theorem as westfahl explains clarke s science fiction offered original perspectives on subjects like new inventions space travel humanity s destiny alien encounters the undersea world and religion while not inclined to mysticism clarke necessarily employed mystical language to describe the fantastic achievements of advanced aliens and future humans westfahl also contradicts the common perception that clarke s characters were bland and underdeveloped arguing that these reticent solitary individuals who avoid conventional relationships represent his most significant prediction of the future as they embody the increasingly common lifestyle of people in the twenty first century

nobody knows better than bruce sterling how thin the membrane between science fiction and real life has become a state he correctly depicts as both thrilling and terrifying in this frisky literate clear eyed sketch of the next half century like all of the most interesting futurists sterling isn't just talking about machines and biochemistry what he really cares about are the interstices of technology with culture and human history kurt andersen author of turn of the century visionary author bruce sterling views the future like no other writer in his

first nonfiction book since his classic *The Hacker Crackdown* Sterling describes the world our children might be living in over the next fifty years and what to expect next in culture geopolitics and business time calls Bruce Sterling one of America's best known science fiction writers and perhaps the sharpest observer of our media choked culture working today in any genre tomorrow now is as Sterling wryly describes it an ambitious sprawling effort in thundering futurist punditry in the pulsing vein of the futurists I've read and admired over the years H.G. Wells Arthur C. Clarke and Alvin Toffler Lewis Mumford Reyner Banham Peter Drucker and Michael Dertouzos this book asks the future two questions what does it mean and how does it feel taking a cue from one of William Shakespeare's greatest soliloquies Sterling devotes one chapter to each of the seven stages of humanity birth school love war politics business and old age as our children progress through Sterling's Shakespearean life cycle they will encounter new products new weapons new crimes new moral conundrums such as cloning and genetic alteration and new political movements which will augur the way wars of the future will be fought here are some of the author's predictions human clone babies will grow into the bitterest and surliest adolescents ever microbes will be more important than the family farm consumer items will look more and more like cuddly squeezable pets tomorrow's kids will learn more from randomly clicking the internet than they ever will from their textbooks enemy governments will be nice to you and will badly want your tourist money but global outlaws will scheme to kill you loudly and publicly on their jihad tvs the future of politics is blandness punctuated with insanity the future of activism belongs to a sophisticated urbane global network that can make money the Disney World version of al Qaeda tomorrow now will change the way you think about the future and our place in it
