this vintage book contains a handbook of watch repair and maintenance for ordnance maintenance personnel published by the american war department in 1945 with useful diagrams and full instructions this volume will be of considerable utility to those with an interest in vintage military watches contents include general introduction functional description inspection general maintenance cleaning and lubricating trouble shooting adjusting and repair pocket and wrist watches characteristics of pocket and wrist watches hamilton pocket watch 16 size 21 jewel railroad grade model 922b et cetera many vintage books such as this are increasingly scarce and expensive we are republishing this volume now in an affordable modern edition complete with a specially commissioned new introduction first published in 1945 this volume presents new methodologies for the design of dimension stone based on the concepts of structural design while preserving the excellence of stonemasonry practice in façade engineering straightforward formulae are provided for computing action on cladding with special emphasis on the effect of seismic forces including an extensive general methodology applied to non structural elements based on the load and resistance factor design format lrd minimum slab thickness formulae are presented that take into consideration stress concentrations analysis based on the finite element method fem for the most commonly used modern anchorage systems calculation examples allow designers to solve several anchorage engineering problems in a detailed and objective manner underlining the key parameters the design of the anchorage metal parts either in stainless steel or aluminum is also presented described as an invaluable reference work classical philology and a tool indispensable for the study of early christian literature religious studies review in its previous edition this new updated american edition of walter bauer s wörterbuch zu den schriften des neuen testaments builds on its predecessor s staggering deposit of extraordinary erudition relating to greek literature from all periods including entries for many more words the new edition also lists more than 25 000 additional references to classical intertestamental early christian and modern literature in this edition frederick w danker s broad knowledge of greco roman literature as well as papyri and epigraphs provides a more panoramic view of the world of jesus and the new testament danker has also introduced a more consistent mode of reference citation and has provided a composite list of abbreviations to facilitate easy access to this wealth of information perhaps the single most important lexical innovation of danker s edition is its inclusion of extended definitions for greek terms for instance a key meaning of episkopos was defined in the second american edition as overseer danker defines it as one who has the responsibility of safeguarding or seeing to it that something is done in the correct way guardian such extended definitions give a fuller sense of the word in question which will help avoid both anachronisms and confusion among users of the lexicon who may not be native speakers of english danker s edition of bauer s wörterbuch will be an indispensable guide for biblical and classical scholars ministers seminarians and translators das werk behandelt archaologie und umwelt im norden des sultanats oman für den zeitraum vom ende der letzten eiszeit bis zum beginn der bronzezeit es stützt sich dabei auf die tubinger ausgrabungen und gelandeforschungen zwischen 1970 und 1988 deren ergebnisse hier abschliessend vorgelegt werden und stellt sie in den zusammenhang der neuen erkenntnisse die in der zwischenzeit für diesen zeitraum in sudost arabien gewonnen sind besonders wichtig ist der nachweis einer vorneolithischen besiedlung ab etwa 9000 bc die neolithisierung erfolgte spätestens am ubergang vom 6 zum 5 vorchristlichen jahrtausend durch die einwanderung von nomadischen rinder schaf und ziegenhirten die verbindungen zum fruchtbaren halbmond gehabt haben mussten bereits im 5 jahrtausend v chr entwickelte diese bevölkerung eine spezifische wirtschaftsform die sich stark auf die einbeziehung von marinen ressourcen stützte zusammen mit der haustierhaltung und der nutzung sonstiger ökologischer nischen erlaubte die fischerei trotz der insgesamt marginalen umweltverhältnisse eine zunehmende sesshaftigkeit breiter raum wird der darstellung der funde und befunde aus jungsteinzeitlichen und akeramisch bronzezeitlichen siedlungsplätzen in der gegend um die omanische hauptstadt musqat gewidmet vergleichend werden siedlungen des gebiets um quriyar behandelt eine ausführlich kommentierte 14c chronologie liefert die zeitliche einordnung der fundstellen topographische und stratigraphische angaben erlauben die einordnung der zahlreichen feuerstein und sonstigen steinartefakte sowie der schmuck und gebrauchsggegenstände aus perlmutt und anderen muschelschalen die sowohl tabellarisch wie in vielen zeichnungen dokumentiert werden ein gesonderter beitrag von stephan scholer stellt mineralogische und geochemische untersuchungen an schmuckobjekten des 4 jahrtausends v chr vor und beurteilt die mögliche herkunft der rohmaterialien der andere schwerpunkt der arbeit ist die auswertung der anthropogenen tierreste sowohl aus den tubinger grabungen wie auch aus den grabungen eines italienischen teams an den fundstellen des ra s al hamra bei musqat tausende von fisch und schildkrotenknochen geben detaillierte hinweise auf den hochspezialisierten nahrungserwerb einer menschengruppe am damaligen rand der menschlichen okumene abschliessend werden die ergebnisse in den rahmen der klimaentwicklung gestellt und mit denen anderer fundstellen verglichen es ergibt sich das faszinierende bild einer eigenständigen entwicklung in einem teilraum der arabischen halbinsel der einerseits durch das wustenhafte hinterland isoliert war andererseits aber durch maritime kontakte die frühe kulturentwicklung des raumes zwischen mesopotamien und dem industal seit der späten steinzeit mit bestimmt hat the quest for a theoretical framework for understanding urban policy making has been a recurring focus of research into local governments civic culture is a means for understanding how municipal policy makers weigh the interests of different groups govern the local community frame local goals engage in decision making and ultimately select and implement public policies while it seems that culture matters in local policy making how to measure culture in a valid and replicable fashion presents a significant challenge which the authors address in this book they present their findings of a large multi city research project to explore the nature of civic culture in cities in the us and canada the focus of their analysis is on three overarching systems of community power system the community value system and the community decision making system the authors address a number of questions around the nature of civic culture and the relationships between the three systemic elements of civic culture to refine and apply a more sophisticated theory of urban policy making originally published in 1921 this book presents a detailed discussion of antiquities must notably stone circles discovered in the area around dunecht house aberdeenshire the text was prepared by the archaeologist and bishop george forrest browne 1833 1930 following an initial invitation to create a basic guide to the discoveries for visitors to dunecht illustrative figures and notes are incorporated throughout this book will be of value to anyone with an interest in archaeology and the prehistory of aberdeenshire while corridor houses such as the house of the tiles at lerna have provoked widespread discussion about the origins of social stratification in greece few settlements of the early bronze age ca 3100 to 2000 b c have been thoroughly excavated this important study integrates the presentation and analysis of the archaeological evidence from a single settlement that flourished on tsoungiza hill in the nemea valley from the final neolithic until the end of the early helladic period the first section details the stratigraphy architecture deposits and ceramics of each of the five major periods represented the second section contains specialist reports on all aspects of material culture including figurines and ornaments textiles and crafts metal analyses chipped and ground stone and faunal and palaeobotanical remains the first reports back from what has until now been an unexplored region of the radiomagnetic spectrum from 30 khz and a wavelength of ten kilometers to about 30 mhz and a wavelength of ten meters three orders of frequency magnitude just below the standard radion astronomy region the 36 tutorials and reviews from an october conference in paris france consider the generation of radio waves propagation and scattering long wavelength radio emission from the solar system and from galactic and extragalactic sources and radio
