proceed side by side in an explicit attempt to construct a selective mobile and fragmented border a specific focus is devoted to the diversity of geo strategies the eu is pursuing in its neighbouring countries and regions macro regional strategies and cross border cooperation initiatives as new scales of cooperation and the role of other global players this is a history of 1968 written from a new perspective that of center right student activists in west germany based on oral history interviews and new archival sources it examines the ideas experiences and repertoires of center right students in this age of protest writing these activists back into the history of 1968 and its afterlives including student protest cultural revolt internationalism debates about left wing violence and the terror of the red army faction the memory wars of the 1980s and beyond reveals that this was a broader more versatile and ultimately more consequential phenomenon than the traditionally narrower focus on a left wing minority allows other 68ers demonstrates that we need a more nuanced history of the 1968 generation and of generational conflict during these years student activists comprised individuals from across the political spectrum who often had very different ideas about what kind of a society they envisaged and how to address the shortcomings of west german democracy 1968 was a moment of intense political conflict but it also played out within the student body and nurtured contrasting identities this book shows that the center right involvement in 1968 had real consequences many of the protagonists of this book would go on to pursue high profile political careers and leave their mark on west german political culture other 68ers therefore sheds fresh light on how west germany s center right dealt with the crisis of hegemony and political identity it experienced in the wake of 1968 how it coped with generational change how it transformed and modernized after losing power at the national level for the first time in 1969 and how it managed to re emerge so successfully in the 1980s this book examines china s national security strategy by looking at the three major elements foreign policy energy security and naval power all interactive and major influences on china s future and its relations with the united states a decade and a half into the twenty first century beijing requires reliable access to energy resources the navy to defend that access and foreign policies to navigate safely toward its goals most importantly the people s liberation army navy plan must be able to safeguard china s regional maritime interests especially the sovereignty disputes involving taiwan and the yellow east china and south china seas many chinese naval officers and analysts think the united states is determined to contain china and prevent it from achieving the dominant historical position to which it is entitled this view has been strengthened by washington s shift to asia transfer of naval units to the pacific and the march 2015 maritime strategy released by the u s navy marine corps and coast guard china s relationship with the united states is vital to both countries and to the world the relationship is based on both common and divergent interests in economics military operations and political goals and methods china s international trading economy and ambition for a world class navy require effective foreign diplomacy and participation in global affairs this policy trifecta in large part defines china s posture to the world beijing is approximately halfway toward its mid century goal of deploying a navy capable of defending

china s perceived maritime interests china s priorities follow president xi jinping s definition of national security as comprehensive encompassing politics the military the economy technology the environment and culture what this means for future chinese foreign policy choices as naval modernization and energy security concerns enable different courses of action lies at the center of this book s conclusions this edited collection shows how demographic analysis plays a pivotal role in planning policy and funding decisions in australia drawing on the latest demographic data and methods these case studies in applied demography demonstrate that population dynamics underpin the full spectrum of contemporary social economic and political issues the contributors harness a range of demographic statistics and develop innovative techniques demonstrating how population dynamics influence issues such as electoral representation the distribution of government funding metropolitan and local planning the provision of aged housing rural depopulation coastal growth ethnic diversity and the well being of australia s indigenous community moving beyond simple statistics the case studies show that demographic methods and models offer crucial insights into contemporary problems and provide essential perspectives to aid efficiency equity in public policy and private sector planning together the volume represents essential reading for students across the social sciences as for policy makers in government and private industry the industrialisation of china prompted the biggest commodity boom of modern times soaring prices gave rise to talk of a commodity super cycle and induced a wave of resource nationalism the author who was chief economist at two of the world s largest mining companies describes how this resulted in a transformation of the global mining industry explores how we judge engineering education in order to effectively redesign courses and programs that will prepare new engineers for various professional and academic careers shows how present approaches to assessment were shaped and what the future holds analyzes the validity of teaching and judging engineering education shows the integral role that assessment plays in curriculum design and implementation examines the sociotechnical system s impact on engineering curricula as the price of oil falls bestselling author and economist jeff rubin takes us to the epicentre of the bursting global carbon bubble and dares us to imagine a new engine for growth that does not run on oil for a decade the vision of canada s future as an energy superpower has driven the country s political agenda as well as the fast paced development of alberta s oil sands and the push for more pipelines like keystone xl across the continent to bring that bitumen to market anyone who objects to pipelines and tanker train traffic north or south of the us border is labeled a dreamer or worse an environmentalist someone who puts the health of the planet ahead of the economic survival of their neighbours in the carbon bubble jeff rubin compellingly shows how an economic vision that rests on oil is dead wrong changes in energy markets in the us where domestic production is booming while demand for oil is shrinking are quickly turning the oil dream into an economic nightmare like u s coal stocks the share values of oil sands producers have been drastically reduced by falling fuel prices and are increasingly exposed to the world s efforts to reduce carbon emissions rubin argues that there is a lifeline to a better future the

very climate change that will leave much of the country's carbon unburnable could at the same time make some of Canada's other resource assets more valuable its water and its land in tomorrow's economy he argues Canada won't be an energy superpower but it has the makings of one of the world's great breadbaskets as everything from the corn belt to viniculture heads to higher latitudes and in the global climate that the world's carbon emissions are inexorably creating growing food will soon be a lot more valuable than mining bitumen useful for all commerce competitive examination where objective questions are asked like college lecturer assistant professor ugc net jrf commerce set commerce phd entrance accounts officers pgt commerce m com entrance etc turkey's candidacy for membership of the European Union has had mixed effects on its public policies the initial degree of cohesion between EU and Turkish national policies practices and institutions has varied by the policy field in question leading to a complex amalgam of fit and misfit between the two actors their interaction in different policy areas has had direct influence both on Turkey's accession to the EU and its own national reform process with accession negotiations stalled and Turkey's relationship with the EU increasingly tenuous it is vital to take stock of the extent to which Turkey and the EU are aligned in key policy areas the Europeanization of Turkish public policies a scorecard is the first comprehensive work focusing on the impact of the EU accession process upon Turkey's public policies between 1999 and 2014 complementing the authors earlier volume Europeanization of Turkey polity and politics it brings together leading specialists to provide key analyses of the impact of Europeanization on specific areas of Turkey's public policy each chapter applies a core analytical framework to examine a separate policy field resulting in a consistent and comprehensive volume on Turkey EU relations with its focused structure and extensive coverage concluding with a scorecard enabling informed assessment of the impact of Europeanization on Turkey's public policy areas this book provides a one stop resource for scholars and students alike a timely and informed assessment of the dynamics and outcome of the Europeanization of an EU candidate country's major public policy areas this book represents an essential resource for those interested in EU Turkey relations the effects of Europeanization on Turkey and Turkish politics 2024 25 nta ugc net jrf english solved papers ifrss the standards set by the international accounting standards board iasb are complex and sometimes obscure understanding their implications and applying them appropriately requires something special and that is why international gaap 2015 is the essential tool for anyone applying auditing interpreting regulating studying and teaching international financial reporting it provides expert interpretation and practical guidance for busy professionals and includes in every chapter detailed analysis of how complex financial reporting problems can be resolved appropriately and effectively the international financial reporting group of Ernst Young includes financial reporting specialists from throughout the world complex technical accounting issues are explained clearly in a practical working context that enables immediate understanding of the point at issue international gaap 2015 is the only globally focused work on ifrss it is not constrained by any individual country's legislation or financial reporting regulations and it

ensures an international consistency of approach unavailable elsewhere it shows how difficult practical issues should be approached in the complex global world of international financial reporting where ifrss have become the accepted financial reporting system in more than 100 countries this integrated approach provides a unique level of authoritative material for anyone involved in preparing interpreting or auditing company accounts for regulators academic researchers and for all students of accountancy all aspects of the detailed requirements of ifrs are dealt with on a topic by topic basis each chapter of international gaap 2015 deals with a key area of ifrs and has a common structure for ease of use an introduction to the background issues an explanation of relevant principles a clear exposition of the requirements of ifrs a discussion of the implications in practice and possible alternative solutions available worked examples extracts from real company accounts a full listing of the required disclosures an important part to play in the process of promoting consistent comparable and high quality financial reporting under ifrss a book that not only provides an analysis of the requirements of the standards and the principles that they expound but also presents a unique explanation of how the standards should be interpreted and applied in practice the chairman of trustees of the iasc foundation a standard reference work financial times the definitive guide to financial reporting the times what does sustainable business and net zero carbon emission mean for businesses globally how should companies globally transform into sustainable businesses with net zero carbon emissions this book unpacks the institutional organisational and management challenges in pursuing sustainable business and carbon neutrality for businesses in this book henry k h wang an internationally recognised climate and business expert provides real life cases across different countries and business sectors he outlines potential policy implications and strategy options for companies to consider in their transitions to sustainable business practices he also explores important new global developments in smart cities green transport and carbon solutions and how the adoption of sustainable finance and green investments can accelerate businesses transformation this book will appeal to anyone interested to learn more about the successful planning and execution of sustainable business and net zero carbon neutrality transformations in light of the eurozone crisis and the growth of asian economies have new challenges emerged for the relations between nations in these regions as the asian consumer class grows and its culture globalizes what does this mean for the export of eurocentric values and norms and what does the future hold for the economic political and cultural policies between these two powerful regions this book explores the relationship between european and emerging asian economies as globalization changes the international economic and political landscape reflecting on past interactions and possibilities for the future the book brings together asian and european perspectives from former politicians diplomats and academic experts to examine questions around trade and security rights and climate change identity clashes and the colonial legacy the book is a timely consideration of highly topical questions that will shape international politics in the twenty first century at the crossroads of various disciplines this collective work examines the possibility of a new end user

engagement in ongoing digital technological products and services development it provides an overview of recent research specifically focused on the user s democratic participation and empowerment it also enables readers to better identify the main opportunities of participatory design a concept which encourages the blurring of the role between user and designer this allows people to escape their status as end user and to elevate themselves to the level of creator this book explores new avenues for rethinking the processes and practices of corporate innovation in order to cope with current socio economic and technological changes in so doing it aims to help companies renew industrial models that allow them to design and produce new ranges of technological products and services by giving the user an active role in the development process far beyond the basic role of consumer intended for designers design researchers and scientists interested in innovation and technology management this book also provides a valuable resource for professionals involved in technology based innovation processes this book discusses and analyses fraud and corruption cases from many industries including construction finance pharmaceutical transport retail medical health communication education and military the book is divided into two sections the first part presents case studies that cover several industry sectors including not only well known frauds like bernie madoff wells fargo and the enron case but also recent events such as the theranos elisabeth holmes case the second section of the book includes materials on fraud and corruption such as the full text of the united nations convention against corruption the oecd convention on combating bribery of foreign public officials in international business and the eib s anti fraud policy and whistleblowing policy it also includes examples about current corporate anti corruption policies from companies like apple tesla and coca cola for interested readers the book offers additionally a list of films that realistically cover the topics fraud corruption and whistleblowing the future of international competition law enforcement undertakes an original assessment of the eu s international cooperation agreements in the field of competition law and is uniquely focused on the bilateral sphere often labelled as a mere interim solution awaiting a global agreement description of the product 100 updated with the 2023 paper held on may 14th extensive practice with 3350 mcqs of 15 years of solved papers 1 2 topper s strategy from divya sikarwar uppcs topper 2023 air 1 valuable exam insights with special coverage on up special gs section concept clarity with detailed explanations medellín colombia used to be the most violent city on earth but in recent years allegedly thanks to its social urbanism approach to regeneration it has experienced a sharp decline in violence the author explores the politics behind this decline and the complex transformations in terms of urban development policies in medellín nta csir net jrf compulsory paper general aptitude part a chapter wise solved papers the depletion of south africa s and in some cases the world s natural resources and the degradation of environmental sinks including the atmosphere lakes and rivers and land are continuing at such a rate that natural resource prices are climbing and many critical ecosystem services that underpin human welfare are increasingly threatened the concept of the green economy has gained increasing traction in south african policy discourses over the past few years however

in much of this discourse it is viewed in a piecemeal way as one part or sector of the economy e.g. an industrial sector dealing with manufacture and installation of renewable energy technologies and energy efficient equipment and appliances in the view of the authors greening the south african economy requires an application of sustainability principles and practices across the full range of primary secondary and tertiary sectors of the economy in an integrated manner the aim of this book is therefore to apply principles of sustainability and green economics to the entire south african socio economic system and its major elements in an integrated and comprehensive manner on the contemporary international law scene there are not many jurists who match the eminence and stature of abdul g koroma who served as distinguished judge of the international court of justice for 18 years this volume of outstanding essays shielding humanity written by renowned judges scholars and practitioners of international law in honour of judge koroma discuss both classical and contemporary topics of significant relevance to the current and future of international law this insightful book provides a comprehensive survey of urban development in hong kong since 1841 pui yin ho explores the ways in which the social economic and political environments of different eras have influenced the city's development from colonial governance wartime experiences high density development and the return to chinese sovereignty in 1997 through to contemporary challenges this book explores forward looking ideas that urban planning can offer to lead the city in the future evaluating the relationship between town planning and social change this book looks at how a local hong kong identity emerged in the face of conflict and compromise between chinese and european cultures in doing so it brings a fresh perspective to urban research providing historical context and direction for the future development of the city hong kong's urban development experience offers not only a model for other chinese cities but also a better understanding of asian cities more broadly urban studies scholars will find this an exemplary case study of a developing urban landscape town planners and architects will also benefit from reading this comprehensive book as it shows how hong kong can be taken to the next stage of urban development and modernisation this book offers the first exploration into the development of social enterprises in the greater china region consisting of hong kong macau taiwan and mainland china by drawing on the research and experience of over a dozen scholars and practitioners from across the area it offers a picture of how a strong state can play an important role as a catalyst in developing the social entrepreneurship sector particularly by legitimizing it it delves into the role and impact of institutions and policy on the development of social enterprises and explains how micro and macro factors might interact in influencing social entrepreneurship structured in two parts policy and cases it reveals the historical development of the social enterprises sector in the chinese context and then illustrates this using cases studies providing an alternative view of social entrepreneurship by highlighting the importance of context in this new sector the book questions whether or not social entrepreneurship is preferable to more conventional models of development sparking new interest and offering fresh insight into social entrepreneurship in the greater china region this book will be useful to students and scholars

of chinese studies business studies and sociology the presented book uppsc uttar pradesh public service commission general studies paper i preliminary examination solved papers is a compilation of previous years examination question papers 2023 2005 aspirants can find all these question papers easily where most of the syllabus is covered in the form of mcqs the solutions are supplemented lucidly with analytical explanations to promote a clearer understanding to various levels of questions depending upon the complexity this book seeks to make the aspirants fully aware about the developments in the papers throughout these years along with preparing them to face the upcoming examination with confidence this book examines how since about 2008 the economy of taiwan has become ever more deeply integrated into the economy of china it goes beyond a consideration of trade and investment flows and discusses also the large population flows the growing integration of the two financial systems and the nature of the deep economic integration at the industry and firm level it considers the impact of growing economic integration on society and politics assesses how china taiwan economic integration is affecting the east asian region more widely and explores the implications for international relations including the united states dominance in the region overall the book presents a comprehensive analysis of all the issues this volume presents eight perspectives on urban space by investigating parkour anxiety in johannesburg young adults in cork city shop windows and resistance tuscan utopias neo bohemian cafés moralising theme parks and the evolution of the hipster in sustainable governance in hybrid organizations the author linne marie lauesen explores how businesses that have succeeded in conducting sustainable governance manage and govern their sustainable performance in other words how they manage to be economically socially and environmentally sustainable in this respect hybrid organizations that are formed as businesses with a mission to be sustainable and to provide services for society such as water companies are a good point of departure water companies are highly regulated whilst working primarily for the betterment of society and on behalf of generations to come for whom clean and plentiful water and the preservation of nature is a must linne marie has dug deep into these types of hybrid organizations in order to reveal which mechanisms of organizational governance for sustainability are at play and how these organizations manage to balance their triple bottom lines in order to survive financially socially and environmentally and make a business out of their conduct balancing these three bottom lines in a sustainable way is explained in a clear and accessible way and the juxtaposition between non profit and for profit water companies will show how this model can be transferred to other business spheres the essays in this book authored by academics from the faculties of law at the university of johannesburg and nelson mandela university respectively emanate from a joint research project and conference arranged by the faculties in 2018 the essays focus on public law issues impacting on governance and accountability in south african law and in international and regional law but with a specific focus on problems afflicting the african continent climate change is a pressing international political issue for which a practical but principled solution is urgently required climate justice in a non ideal world aims to make normative theorising on climate justice more relevant and

applicable to political realities and public policy the motivation behind this edited collection is that normative theorising has something to offer even in an imperfect world mired by partial compliance and unfavourable circumstances in the last years a lively debate has sprung up in political philosophy about non ideal theory and there has also been an upsurge of interest in the various normative issues raised by climate change such as intergenerational justice transnational harm collective action or risk assessment however there has been little systematic discussion of the links between climate justice and non ideal theory even though the former would seem like a paradigm example of the relevance of the latter the aim of this edited volume is to address this in doing so the volume presents original work from leading experts on climate ethics including several who have participated in climate policy the first part of the book discusses those facets of the debate on climate justice that become relevant due to the shortcomings of current global action on climate change the second part makes specific suggestions for adjusting current policies and negotiating procedures in ways that are feasible in the relatively short term while still decreasing the distance between current climate policy and the ideal the chapters in the third and final part reflect upon how philosophical work can be brought to bear on the debates in climate science communication and politics 2023 24 nta ugc net jrf teaching research aptitude 82 sets

Ships and Offshore Structures XIX

2015-09-03

this three volume work presents the proceedings from the 19th international ship and offshore structures congress held in cascais portugal on 7th to 10th september 2015 the international ship and offshore structures congress issc is a forum for the exchange of information by experts undertaking and applying marine structural research the aim of

Expertisation and Democracy in Europe

2017-11-27

expertisation and democracy in europe provides a much needed account of the role and re organisation of expertise and expert knowledge in europe and the european union in a broad range of policy spheres contributing to the debate triggered by the recent crises it brings novel perspectives to debates on technocracy and our understanding of the relations between knowledge experts and democracy the book explores and assesses new and old linkages between knowledge expertise and democracy and expands and deepens the current debates by addressing questions such as what is the role of expertise in europe how is knowledge of different kinds embedded in and decisive for democratic practice in contemporary democracies how are we to assess recent transformations of the expert citizens and government civil society relationships from the perspective of democracy and which paths are viable in the years to come finally the book engages with and gives flesh to the notion of expertisation not only as a broad political and societal diagnosis but also as a multidimensional and deeply contested process that unfolds in concrete practices and institutional settings this text will be of key interest to scholars and students of european studies european and european union politics democracy public policy international relations sociology gender studies and media studies

New Perspectives on Corporate Social Responsibility

2015-04-14

providing a timely contribution to the ongoing questions surrounding topics which are by definition subject to varying stakeholder interpretations this book addresses the missing link between theoretical csr concepts and everyday management practice it acts as a guide to awaken managers to the advantages of

adopting a csr mindset when developing sustainable business strategies the book consists of three parts 1 a theoretical realm which establishes the key concepts and rationale for the adoption of a sustainable csr approach 2 a practical realm which addresses putting csr and sustainability into business practice 3 an educational realm which proposes how to incorporate the concepts into teaching and training

Neighbourhood Policy and the Construction of the European External

Borders

2015-11-25

this book looks both backward and forward with regard to the european union s political strategies towards its neighbouring countries by bringing together the perspectives of critical geopolitics policy studies and border studies it presents a comprehensive review of the european neighbourhood policy and how it impacts the ongoing construction of the eu s external frontiers is the eu committed to promoting integration in a wider european space or is a fortress europe emerging where the strengthening of internal cohesion is coupled with the militarisation of its external borders the book aims to problematize this question by showing how the eu s external policies are based on a mixture of openness and closure inclusion and exclusion cooperation and securitisation the european neighbourhood policy is a controversial strategy where regionalization and bordering homogenisations and differentiations centrifugal and centripetal forces proceed side by side in an explicit attempt to construct a selective mobile and fragmented border a specific focus is devoted to the diversity of geo strategies the eu is pursuing in its neighbouring countries and regions macro regional strategies and cross border cooperation initiatives as new scales of cooperation and the role of other global players

The Other '68ers

2015-06-02

this is a history of 1968 written from a new perspective that of center right student activists in west germany based on oral history interviews and new archival sources it examines the ideas experiences and repertoires of center right students in this age of protest writing these activists back into the history of 1968 and its afterlives including student protest cultural revolt internationalism debates about left wing violence and the terror of the red army faction the memory wars of the 1980s and beyond reveals that this was a broader more versatile and ultimately more consequential phenomenon than the traditionally narrower focus on a left wing minority allows other 68ers demonstrates that we need a more nuanced history of the 1968 generation and of generational conflict during these years student activists comprised individuals from across the political spectrum who often had very different ideas about what kind of a society they envisaged and how to address the shortcomings of west german democracy 1968 was a moment of intense political conflict but it also played out within the student body and nurtured contrasting identities this book shows that the center right involvement in 1968 had real consequences many of the protagonists of this book would go on to pursue high profile political careers and leave their mark on

west german political culture other 68ers therefore sheds fresh light on how west germany's center right dealt with the crisis of hegemony and political identity it experienced in the wake of 1968 how it coped with generational change how it transformed and modernized after losing power at the national level for the first time in 1969 and how it managed to re emerge so successfully in the 1980s

China's Quest for Great Power

2016-02-23

this book examines china's national security strategy by looking at the three major elements foreign policy energy security and naval power all interactive and major influences on china's future and its relations with the united states a decade and a half into the twenty first century beijing requires reliable access to energy resources the navy to defend that access and foreign policies to navigate safely toward its goals most importantly the people's liberation army navy plan must be able to safeguard china's regional maritime interests especially the sovereignty disputes involving taiwan and the yellow east china and south china seas many chinese naval officers and analysts think the united states is determined to contain china and prevent it from achieving the dominant historical position to which it is entitled this view has been strengthened by washington's shift to asia transfer of naval units to the pacific and the march 2015 maritime strategy released by the u s navy marine corps and coast guard china's relationship with the united states is vital to both countries and to the world the relationship is based on both common and divergent interests in economics military operations and political goals and methods china's international trading economy and ambition for a world class navy require effective foreign diplomacy and participation in global affairs this policy trifecta in large part defines china's posture to the world beijing is approximately halfway toward its mid century goal of deploying a navy capable of defending china's perceived maritime interests china's priorities follow president xi jinping's definition of national security as comprehensive encompassing politics the military the economy technology the environment and culture what this means for future chinese foreign policy choices as naval modernization and energy security concerns enable different courses of action lies at the center of this book's conclusions

Demography for Planning and Policy: Australian Case Studies

2015-05-12

this edited collection shows how demographic analysis plays a pivotal role in planning policy and funding

decisions in australia drawing on the latest demographic data and methods these case studies in applied demography demonstrate that population dynamics underpin the full spectrum of contemporary social economic and political issues the contributors harness a range of demographic statistics and develop innovative techniques demonstrating how population dynamics influence issues such as electoral representation the distribution of government funding metropolitan and local planning the provision of aged housing rural depopulation coastal growth ethnic diversity and the well being of australia s indigenous community moving beyond simple statistics the case studies show that demographic methods and models offer crucial insights into contemporary problems and provide essential perspectives to aid efficiency equity in public policy and private sector planning together the volume represents essential reading for students across the social sciences as for policy makers in government and private industry

The Remaking of the Mining Industry

2015-09-16

the industrialisation of china prompted the biggest commodity boom of modern times soaring prices gave rise to talk of a commodity super cycle and induced a wave of resource nationalism the author who was chief economist at two of the world s largest mining companies describes how this resulted in a transformation of the global mining industry

The Carbon Bubble

2015-03-10

as the price of oil falls bestselling author and economist jeff rubin takes us to the epicentre of the

bursting global carbon bubble and dares us to imagine a new engine for growth that does not run on oil for a decade the vision of canada s future as an energy superpower has driven the country s political agenda as well as the fast paced development of alberta s oil sands and the push for more pipelines like keystone xl across the continent to bring that bitumen to market anyone who objects to pipelines and tanker train traffic north or south of the us border is labeled a dreamer or worse an environmentalist someone who puts the health of the planet ahead of the economic survival of their neighbours in the carbon bubble jeff rubin compellingly shows how an economic vision that rests on oil is dead wrong changes in energy markets in the us where domestic production is booming while demand for oil is shrinking are quickly turning the oil dream into an economic nightmare like u s coal stocks the share values of oil sands producers have been drastically reduced by falling fuel prices and are increasingly exposed to the world s efforts to reduce carbon emissions rubin argues that there is a lifeline to a better future the very climate change that will leave much of the country s carbon unburnable could at the same time make some of canada s other resource assets more valuable its water and its land in tomorrow s economy he argues canada won t be an energy superpower but it has the makings of one of the world s great breadbaskets as everything from the corn belt to viniculture heads to higher latitudes and in the global climate that the world s carbon emissions are inexorably creating growing food will soon be a lot more valuable than mining bitumen

The Europeanization of Turkish Public Policies

2015-05-20

turkey s candidacy for membership of the european union has had mixed effects on its public policies the initial degree of cohesion between eu and turkish national policies practices and institutions has varied by the policy field in question leading to a complex amalgam of fit and misfit between the two actors their interaction in different policy areas has had direct influence both on turkey s accession to the eu and its own national reform process with accession negotiations stalled and turkey s relationship with the eu increasingly tenuous it is vital to take stock of the extent to which turkey and the eu are aligned in

key policy areas the europeanization of turkish public policies a scorecard is the first comprehensive work focusing on the impact of the eu accession process upon turkey s public policies between 1999 and 2014 complementing the authors earlier volume europeanization of turkey polity and politics it brings together leading specialists to provide key analyses of the impact of europeanization on specific areas of turkey s public policy each chapter applies a core analytical framework to examine a separate policy field resulting in a consistent and comprehensive volume on turkey eu relations with its focused structure and extensive coverage concluding with a scorecard enabling informed assessment of the impact of europeanization on turkey s public policy areas this book provides a one stop resource for scholars and students alike a timely and informed assessment of the dynamics and outcome of the europeanization of an eu candidate country s major public policy areas this book represents an essential resource for those interested in eu turkey relations the effects of europeanization on turkey and turkish politics

China-Taiwan Rapprochement

in sustainable governance in hybrid organizations the author linne marie lauesen explores how businesses that have succeeded in conducting sustainable governance manage and govern their sustainable performance in other words how they manage to be economically socially and environmentally sustainable in this respect hybrid organizations that are formed as businesses with a mission to be sustainable and to provide services for society such as water companies are a good point of departure water companies are highly regulated whilst working primarily for the betterment of society and on behalf of generations to come for whom clean and plentiful water and the preservation of nature is a must linne marie has dug deep into these types of hybrid organizations in order to reveal which mechanisms of organizational governance for sustainability are at play and how these organizations manage to balance their triple bottom lines in order to survive financially socially and environmentally and make a business out of their conduct balancing these three bottom lines in a sustainable way is explained in a clear and accessible way and the juxtaposition between non profit and for profit water companies will show how this model can be transferred to other business spheres

Urban Assemblage

the essays in this book authored by academics from the faculties of law at the university of johannesburg and nelson mandela university respectively emanate from a joint research project and conference arranged by the faculties in 2018 the essays focus on public law issues impacting on governance and accountability in south african law and in international and regional law but with a specific focus on problems afflicting the african continent

Sustainable Governance in Hybrid Organizations

climate change is a pressing international political issue for which a practical but principled solution is urgently required climate justice in a non ideal world aims to make normative theorising on climate justice more relevant and applicable to political realities and public policy the motivation behind this edited collection is that normative theorising has something to offer even in an imperfect world mired by partial compliance and unfavourable circumstances in the last years a lively debate has sprung up in political philosophy about non ideal theory and there has also been an upsurge of interest in the various

normative issues raised by climate change such as intergenerational justice transnational harm collective action or risk assessment however there has been little systematic discussion of the links between climate justice and non ideal theory even though the former would seem like a paradigm example of the relevance of the latter the aim of this edited volume is to address this in doing so the volume presents original work from leading experts on climate ethics including several who have participated in climate policy the first part of the book discusses those facets of the debate on climate justice that become relevant due to the shortcomings of current global action on climate change the second part makes specific suggestions for adjusting current policies and negotiating procedures in ways that are feasible in the relatively short term while still decreasing the distance between current climate policy and the ideal the chapters in the third and final part reflect upon how philosophical work can be brought to bear on the debates in climate science communication and politics
