The Impact Factor of Scientific and Scholarly Journals 2007

2021 scientific communication depends primarily on publishing in journals the most important indicator to determine the influence of a journal is the impact factor since this factor only measures the average number of citations per article in a certain time window it can be argued that it does not reflect the actual value of a periodical this book defines five dimensions which build a framework for a multidimensional method of journal evaluation the author is winner of the eugene garfield doctoral dissertation scholarship 2011

Multidimensional Journal Evaluation 2012-04-26 the present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis regression analysis allows the option of investigating and predicting the numerical relationship between website ranking of scientific journals on the world wide and the value of impact factor of the journals a sample of 57 publishers with 6 272 scientific journals and 50 standalone scientific journals was analyzed during research procedure in this study two different indicators about websites classification on world wide were examined separately for 57 publishers and 50 standalone journals alexa rank and statscrop rank the electronic databases through the internet constitute the main information resources of this study about the impact factors the general conclusion that arises is that the impact factor of electronic scientific journals illustrates a very strong positive correlation with classification of websites on the world wide furthermore it is concluded that the change of web ranking as a function of impact factor is governed by a gaussian function or rational function with lower pearson coefficient and presents non linearly correlation even if there is very strong correlation between impact factor and web rank for electronic journals the prediction of impact factor from web rank is not possible and presents many divergences

Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis 2017-12-15 this book proposes a reference framework and guidelines to help researchers produce a manuscript of high scientific quality in order to meet the requirements of high impact journals and to succeed in their publication endeavours it offers a series of precise guidelines tips and

tricks with a detailed description of the different steps to be taken to achieve a solid publication with a high impact factor as such the book will be of interest to students and researchers alike

Publishing in High Impact Factor Journals 2022-10-21 publish or perish this old adage illustrates the importance of scientific communication essential to research it also represents a strategic sector for each country's competitiveness an often neglected topic scientific communication is of vital importance with new information technologies accelerating and profoundly changing how knowledge is disseminated the necessity of optimally disseminating experts findings has also become crucial to researchers institutes and universities alike which has prompted the recent advent of impact factors for the evaluation and financing of research the goal being for scientific knowledge to be equally distributed to a very broad audience especially to the media entrepreneurs and sociopolitical players this handbook presents the golden rules for publishing scientific articles in order to do away with major recurring errors the author explains how to easily structure an article and offers support for the typical mistakes made by native french speakers publishing in english tips on how to make the style more academic of more general to fit your intended readership and in the book's closing section suggests new publishing techniques of the internet age such as the micro article which allows researchers to focus their findings into a single innovative point the major principles presented can be applied to a broad range of documents such as theses industry reports publicity texts letters of intent cvs resumes blogs and press releases as all of these documents involve presenting information on advances discoveries innovations or changes to our previous knowledge

Scientific Writing for Impact Factor Journals 2013 publish or perish this old adage illustrates the importance of scientific communication essential to research it also represents a strategic sector for each country's competitiveness an often neglected topic scientific communication is of vital importance with new information technologies accelerating and profoundly changing how knowledge is disseminated the necessity of optimally disseminating experts findings has also become crucial to researchers institutes and universities alike which has prompted the recent advent of impact factors for the evaluation and financing of research the goal being for scientific knowledge to be

equally distributed to a very broad audience especially to the media entrepreneurs and sociopolitical players this handbook presents the golden rules for publishing scientific articles in order to do away with major recurring errors the author explains how to easily structure an article and offers support for the typical mistakes made by native french speakers publishing in english tips on how to make the style more academic of more general to fit your intended readership and in the book s closing section suggests new publishing techniques of the internet age such as the micro article which allows researchers to focus their findings into a single innovative point the major principles presented can be applied to a broad range of documents such as theses industry reports publicity texts letters of intent cvs resumes blogs and press releases as all of these documents involve presenting information on advances discoveries innovations or changes to our previous knowledge

Scientific Writing for Impact Factor Journals 2013-01-01 this synthesis will be of interest to state department of transportation and consulting bridge structural and research engineers the synthesis describes the current state of the practice for determining dynamic impact factors for bridges information for the synthesis was collected by surveying u s and canadian transportation agencies and by conducting a literature search using domestic and foreign sources this report of the transportation research board documents relevant background and recent information with regard to vehicular dynamic load effects on bridges it provides details on the basic concepts of bridge dynamics including identification of the main variables affecting bridge dynamic response in addition current code provisions for accounting for vehicular dynamic load effects for new bridge design and load evaluation of existing bridges are reported including a discussion on the background of the provisions finally a discussion of observed field problems associated with vehicular dynamic load effects as obtained from the survey are included

Dynamic Impact Factors for Bridges 1998 traducción parcial de la introducción en la actualidad la evaluación de la investigaciones es una cuestión que se está replanteando en todo el mundo en algunos casos los trabajos de investigación están generando resultados muy buenos en la mayoría de los casos los resultados son mediocres y en algunos casos negativos por todo esto la evaluación de los resultados de la investigación se convierte en una condición sine qua non cuando el

número de investigadores eran menos eran los propios colegas de profesión quienes evaluaban la investigación con el paso del tiempo el número de investigadores aumentó las áreas de investigación proliferaron los resultados de la investigación se multiplicaron la tendencia continuó y después de la segunda guerra mundial la investigación comenzó a crecer exponencialmente hoy en día incluso en una estimación moderada hay alrededor de más de un millón de investigadores y producen más de dos millón de trabajos de investigación y otros documentos por año en este contexto la evaluación de la investigación es una cuestión de primera importancia para cualquier promoción acreditación premio y beca puede haber decenas o cientos de nominados de entre éstos seleccionar el mejor candidato es una cuestión difícil de determinar las evaluaciones inter pares en muchos casos están demostrando ser subjetivas en 1963 se crea science citation index sci que cubre la literatura científica desde 1961 unos años después eugene garfield fundador del sci preparó una lista de los 50 autores científicos más citados basándose en las citas que recibía el trabajo de un autor por parte de los trabajos de otros colegas de investigación el documento titulado pueden predecirse los ganadores del premio nobel fue publicado en 1968 garfield y malin 1968 en el siguiente año es decir 1969 dos científicos que figuran en la lista por ejemplo derek hr barton y murray gell mann recibieron el codiciado premio esto reivindicó la utilidad del análisis de citas cada año varios científicos pertenecientes al campo de la física química fisiología y medicina reciben el premio nobel de esta manera el análisis de citas se convirtió en una herramienta útil sin embargo el análisis de citas siempre tuvo críticas y múltiples fallas incluso garfield comentó el uso del análisis de citas de los trabajos de evaluación es una tarea difícil existen muchas posibilidades de error garfield 1983 para la evaluación de la investigación se necesitaban algunos otros indicadores el análisis de citas junto con la revisión por pares garantiza el mejor juicio en innumerables casos pero se necesita algo que sea más exacto la llegada de la world wide web brindó la oportunidad pues un buen número de indicadores se están generando a partir de los datos disponibles en la www trad julio alonso arévalo univ salamanca

Research evaluation metrics 2015-04-27 how can one ordinary person change the world you can impact millions in such a compelling that your ideas products and services spread around the globe today people will

be touched by your message become advocates of your ideas and spread them like wildfire impact reveals key strategies used by some of the most influential people in the world these people create measurable and undeniable impact on millions of people and change the world these stories of ordinary people with extraordinary success illustrate vital strategies that enable you to create your own legacy few people know how you can touch millions of lives and have an impact on the way people think and act dream of having that kind of effect on others lives and then put this plan into action right now if you want to make a real difference in peoples lives your ideas products and services must be noticed the news must be spread quickly your projects must be sustainable over time discover very simple actions you can take today to ensure impact on a massive level impact delivers stories of ordinary people who have left their marks on the world be amazed to explore how you can change people s lives today

The Impact Factor 2012-05-01 management science in engineering mse is becoming increasingly important in modern society in particular the emergence of efficient and innovative management tools has greatly influenced the progress of management science in engineering research as research is critical to the dissemination of cutting edge methods journal evaluation and classification are essential for scientists researchers engineers practitioners and graduate students the goal of this book is to identify the major research categories in mse and to evaluate and classify each mse journal this book was compiled through the combined efforts of members of scientific committees many of whom are editors in chief of the most relevant journals academics researchers from different countries and members of professional societies it will be of interest to scientists researchers practitioners engineers graduate and advanced undergraduate students in the fields of engineering management civil engineering industrial engineering environmental engineering energy engineering information engineering and agricultural engineering

Neoteric Developments in Management Science in Engineering

2023-04-24 新发现的 新发现的 新发现的 21新发现的
新发现的 2021-08 new methods in bibliometrics and alternative metrics provide us with information about research impact at both increasingly granular and global levels here editor elaine lasda and a cast of expert contributors present a variety of case studies that

demonstrate the practical utilization of these new scholarly metrics The New Metrics 2019-08-19 in the last couple of decades high performance electronic and optoelectronic devices based on semiconductor heterostructures have been required to obtain increasingly strict and well defined performances needing a detailed control at the atomic level of the structural composition of the buried interfaces this goal has been achieved by an improvement of the epitaxial growth techniques and by the parallel use of increasingly sophisticated characterization techniques and of refined theoretical models based on ab initio approaches this book deals with description of both characterization techniques and theoretical models needed to understand and predict the structural and electronic properties of semiconductor heterostructures and nanostructures comprehensive collection of the most powerful characterization techniques for semiconductor heterostructures and nanostructures most of the chapters are authored by scientists that are among the top 10 worldwide in publication ranking of the specific field each chapter starts with a didactic introduction on the technique the second part of each chapter deals with a selection of top examples highlighting the power of the specific technique to analyze the properties of semiconductors

Characterization of Semiconductor Heterostructures and Nanostructures 2011-08-11 a how to approach to navigating the strenuous path from dnp plan to completed project you completed your dnp proposal and have approval to proceed what s next how do you move from proposal phase to conduct and complete your project this text is the first to discuss the practical steps to implement and complete the project and will help dnp students to systematically transition from plan to action written by an author with extensive experience helping students with their quality improvement projects the text educates readers on the core components of conducting the clinical scholarly project with a focus on working effectively with clinical staff the book addresses irb approval ethics working with human subjects project planning collecting analyzing and interpreting clinical data disseminating findings and how to complete the project in a timely manner it discusses interprofessional collaboration team building and how to debrief project participants examples of successful scholarly projects and recommendations for project improvement offer additional guidance along with consideration of common problems that many

students face and how to resolve them objectives and review questions are provided in selected chapters key features delivers practical step by step strategies for implementing and completing the dnp project focuses on finding and effectively communicating with team members explains how to collect analyze and interpret clinical data describes how to establish protocol for working with patients offers chapter objectives review questions and case studies demonstrating major content components

Conducting the DNP Project 2019-09-15 publication of a research article can be a defining moment in a researcher s career however the steps involved in turning an initial research question into a published article can be a long and arduous journey to aid in this process professional writing in kinesiology and sports medicine was developed to serve as a comprehensive writing guide for research professionals and students who are looking to improve their academic writing skills dr mark knoblauch and his 15 contributors developed professional writing in kinesiology and sports medicine to focus around the area of manuscript development and presentation while also including chapters that outline the foundational concepts of professional writing developing a research grant and the journal selection process each chapter is written by content experts who bring a wealth of experience not only from their own academic writing but also from having spent countless hours helping students become better more effective writers many textbooks have been written that focus on development of the research manuscript itself but what sets professional writing in kinesiology and sports medicine apart is that it includes so much more to aid writers in their process what you can find inside examination of ancillary aspects associated with academic research such as poster and oral presentations how to choose the most effective journal how to deal with the stress of writing how to write an effective grant professional writing in kinesiology and sports medicine covers those topics and more with the intent of providing a thorough practical writing guide that spans the breadth of the research manuscript development writing and presentation process throughout the textbook sample writings and cases relevant to the fields of kinesiology and sports medicine are used to provide the reader relevant applicable examples to help improve their own writing

Professional Writing in Kinesiology and Sports Medicine 2024-06-01

vehicle bridge interaction happens all the time on roadway bridges and this interaction performance carries much useful information on one hand while vehicles are traditionally viewed as loads for bridges they can also be deemed as sensors for bridges structural response on the other hand while bridges are traditionally viewed as carriers for vehicle weight they can also be deemed as scales that can weigh the vehicle loads based on these observations a broad area of studies based on the vehicle bridge interaction have been conducted in the authors research group understanding the vehicle and bridge interaction can help develop strategies for bridge condition assessment bridge design and bridge maintenance as well as develop insight for new research needs this book documents fundamental knowledge new developments and state of the art applications related to vehicle bridge interactions it thus provides useful information for graduate students and researchers and therefore straddles the gap between theoretical research and practical applications

Highway Vehicle-bridge Coupled Vibrations: Numerical Simulations And Applications 2020-09-23 after a brief account of the recent trends in science indicators research the authors propose a coherent system of scientometric indicators these indicators are based on the publication performance of each country in 8 science fields and reflect the versatility of the impact of the publication activity in the country in question the special aim of the indicator system is to characterize and compare the contribution of research intensive medium sized and small countries to the world s overall scientific research activity indicator values for 32 such countries are reported and evaluated relations to other economic social and science indicators are discussed this book is intended both as a data source and an analytic tool for specialists engaged in science policy science management science indicators research scientometrics and other areas of science as well as a tool for practising research scientists

Scientometric Indicators 1985 this book offers a design research methodology intended to improve the quality of design research its academic credibility industrial significance and societal contribution by enabling more thorough efficient and effective procedures

Recent Advances in Dermatology 2021-12-31 legal academics in europe publish a wide variety of materials including books articles and essays in an assortment of languages and for a diverse readership as a

consequence this variety can pose a problem for the evaluation of academic legal research this thought provoking book offers an overview of the legal and policy norms methods and criteria applied in the evaluation of academic legal research from a comparative perspective

Research Methodology 2019-01-30 the papers presented are refereed and from all over the world they reflect the breadth and depth of the field of biomedical and health informatics covering topics such as health information systems knowledge and data management education standards consumer health and human factors emerging technologies sustainability organizational and economic issues genomics and image and signal processing as this volume carries such a wide collection it will be of great interest to anyone engaged in biomedical and health informatics research and application

Evaluating Academic Legal Research in Europe 2019 by means of multidisciplinary research on urban and rural planning construction engineering environmental engineering and engineering sociology this book conducts pioneering research on the construction theory construction methods evaluation technology and application of demonstration projects in china s green villages and towns the book is divided into three parts and eleven chapters part i is about the theory and development of green village and town construction including the theory and innovation the evolution and development the patterns and mechanisms and the community of green village and town construction part ii is about the planning and construction methods of green villages and towns including the plan compilation the environmental infrastructure construction and the construction and renovation of green buildings in villages and towns part iii is about the evaluation of the planning and construction of green villages and towns including the evaluation of plans the evaluation of environmental infrastructure construction the evaluation of green building construction and the comprehensive evaluation of the planning and construction of green villages and towns today 564 million farmers live in 28 500 towns and 2 452 million villages in china in 2018 alone 820 million m2 of new houses were built in rural areas this proves that china s green village and town construction has great significance and can provide enlightenment to developing countries and even to the world the book describes new theories new perspectives and new methods of green village and town sustainable construction in china for overseas experts and readers

Medinfo 2007 2007 this volume contains papers presented at the 11th scientific meeting of the ifip working group on reliability and optimization of structural systems the purpose of working group 7 5 is to promote modern structural system reliability and optimization theory and its applications stimulate research development and application assist and advance research and development further the dissemination and exchange of information and encourage education the main themes include structural reliability methods and applications engineering risk analysis and decision making new optimization techniques and various applications in civil engineering

Green Village and Town Construction in China 2021-05-27 this book presents a guide for research methodology and scientific writing covering various elements such as finding research problems writing research proposals obtaining funds for research selecting research designs searching the literature and review collection of data and analysis preparation of thesis writing research papers for journals citation and listing of references preparation of visual materials oral and poster presentation in conferences and ethical issues in research besides introducing library and its various features in a lucid style the latest on the use of information technology in retrieving and managing information through various means are also discussed in this book the book is useful for students young researchers and professionals

Reliability and Optimization of Structural Systems 2004-07-01 first published in 1987 this book offers a full comprehensive guide into the literature on analytical chemistry carefully compiled and filled with a vast repertoire of journals papers and references this book serves as a useful reference for students of chemistry and other practitioners in their respective fields

Research Methodology and Scientific Writing 2021-03-28 this book contributes to the current discussion in society politics and higher education on innovation capacity and the financial and non financial incentives for researchers the expert contributions in the book deal with implementation of incentive systems at higher education institutions in order to foster innovation on the other hand the book also discusses the extent to which governance structures from economy can be transferred to universities and how scientific performance can be measured and evaluated this book is essential for decision makers in knowledge intensive organizations and higher educational institutions dealing with

the topic of performance management

Literature Of Analytical Chemistry 2019-06-04 the first edition of this book titled the clinician s guide to medical writing has become a standard in its field and remains an indispensable reference for any clinician academic physician or health professional who wishes to hone their writing skills however since its publication in 2004 significant changes have taken place in the way medical professionals communicate with each other and the world medical writing a guide for clinicians and academicians 2e retains all of the fundamental writing advice of the first edition and has been expanded to include two brand new chapters how to write a research protocol including why a research project needs a written protocol elements of the research protocol and common problems how to write a grant proposal including sections on government and private grant funding sources what you need to know about grant writing and elements of a successful grant proposal new information is also included throughout the book on becoming a successful writer medical tables and figures conflict of interest and disclosures how to review a scientific article statistical analysis pay to publish journal publishing electronic submission of manuscripts issues in medical publishing and the future of medical writing and publication new appendices address commonly encountered research and statistical terms and memorable aphorisms regarding writing medical and otherwise

Grassland conservation in asia: Sustainability under climate change 2023-06-08 this book will get librarians writing by dispelling the myths surrounding scholarly writing by providing practical tools and advice though the authors have extensive experience as scholars this book is written in a friendly approachable non intimidating manner

Incentives and Performance 2014-11-07 investigators their home institutions and funding agencies play significant roles in the development and outcomes of scientific projects submitting a proposal to a funding agency is only one dimension of a multivariable and complex funding process and understanding this is a good first step toward unlocking the puzzle behind why some research proposals receive awards while others are declined the handbook of scientific proposal writing offers researchers and research administrators a broad perspective on the process of initiating and conducting funded scientific research projects written for students and researchers in all fields and

disciplines this reference offers a holistic approach to conceiving and then converting new ideas into effective proposals it focuses on the technical aspects of writing proposals rather than the fund raising issues chapters provide full coverage of the scientific method including information on how scientific research should be conducted providing the tools necessary to organize ideas and obtain the funds needed to effectively manage projects the handbook of scientific proposal writing includes 56 figures and 25 tables to help convey key ideas more than 150 citations that provide pointers to additional sources for further reading examples to help the reader ease through more abstract concepts end of chapter questions to stimulate further examination and comprehension

Medical Writing 2011-08-17 topics in dynamics of bridges volume 3 proceedings of the 31st imac a conference and exposition on structural dynamics 2013 the third volume of seven from the conference brings together contributions to this important area of research and engineering the collection presents early findings and case studies on fundamental and applied aspects of structural dynamics including papers on vibration monitoring damping damage detection health monitoring dynamic behavior dynamic modeling human induced vibration

How to Write and Get Published 2019-04-22 the huge interest in social networking applications friendster com for example has more than 40 million users led to a considerable research interest in using this data for generating recommendations especially recommendation techniques that analyze trust networks were found to provide very accurate and highly personalized results the main contribution of this thesis is to extend the approach to trust based recommendations which up to now have been made for unlinked items such as products or movies to linked resources in particular documents therefore a second type of network namely a document reference network is considered apart from the trust network this is for example the citation network of scientific publications or the hyperlink graph of webpages recommendations for documents are typically made by reference based visibility measures which consider a document to be the more important the more often it is referenced by important documents these two networks as well as further networks such as organization networks are integrated in a multi layer network this architecture allows for combining classical measures

for the visibility of a document with trust based recommendations giving trust enhanced visibility measures moreover an approximation approach is introduced which considers the uncertainty induced by duplicate documents these measures are evaluated in simulation studies the trust based recommender system for scientific publications sprec implements a two layer architecture and provides personalized recommendations via a web interface

Handbook of Scientific Proposal Writing 2011-10-25 this collection of essays written by a number of respected sport management scholars addresses many of the challenges and issues facing today s sport management academic programs it is intended to begin a professional and scholarly discussion to identify the best or at least the most logical paths to follow for sport management programs and the industry with which they are so closely aligned contributors invited to participate based on their recognized areas of expertise address specific topics using their own unique voices and writing styles in the ebook version essays link to video introductions by the authors and to online discussion forums where readers can respond to the issues presented in the essays from the preface the field of sport management stands at an academic crossroads the essays in this book address the following and other emerging questions should our successful field of study continue to model other disciplines and perpetuate their successes as well as their shortcomings or should we determine our own specific model for academic success how are we doing in preparing future sport managers to perform in the industry and on the global stage where do we belong in the scheme of academe the book s goal is to generate discussion among sport management professors industry professionals who serve as adjunct faculty and participate on sport management program advisory boards doctoral students who intend to teach in sport management programs and others who explore and critique higher education in general

Topics in Dynamics of Bridges, Volume 3 2014-07-08 this volume encloses research articles that were presented at the evolve 2014 international conference in beijing china july 1 4 2014 the book gathers contributions that emerged from the conference tracks ranging from probability to set oriented numerics and evolutionary computation all complemented by the bridging purpose of the conference e g complex networks and landscape analysis or by the more application oriented

perspective the novelty of the volume when considering the evolve series comes from targeting also the practitioner s view this is supported by the machine learning applied to networks and practical aspects of evolutionary algorithms tracks providing surveys on new application areas as in the networking area and useful insights in the development of evolutionary techniques from a practitioner s perspective complementary to these directions the conference tracks supporting the volume follow on the individual advancements of the subareas constituting the scope of the conference through the computational game theory local search and optimization genetic programming evolutionary multi objective optimization tracks

PULP Guide: Where to publish, Information on academic journals relevant to law and accredited by the Department of Education of South Africa (Second Edition) 2002 research publications have always been key to building a successful career in science yet little if any formal guidance is offered to young scientists on how to get research papers peer reviewed accepted and published by leading scientific journals with what editors want philippa j benson and susan c silver two well respected editors from the science publishing community remedy that situation with a clear straightforward guide that will be of use to all scientists benson and silver instruct readers on how to identify the journals that are most likely to publish a given paper how to write an effective cover letter how to avoid common pitfalls of the submission process and how to effectively navigate the all important peer review process including dealing with revisions and rejection with supplemental advice from more than a dozen experts this book will equip scientists with the knowledge they need to usher their papers through publication

Health Services Reports 2002 this comprehensive and practical book covers the basics of grammar as well as the broad brush issues such as writing a grant application and selling to your potential audience the clear explanations are expanded and lightened with helpful examples and telling quotes from the giants of good writing these experienced writers and teachers make scientific writing enjoyable
