# All about Geography 2014

this thirteen edition of human geography retains the organization and structure of its earlier versions like them it seeks to introduce its users to the scope and excitement of geography and its relevance to their daily lives and roles as informed citizens we recognize that for many students human geography may be their first or only work in geography and this their first or only textbook in the discipline for these students particularly we seek to convey the richness and breadth of human geography and to give insight into the nature and intellectual challenges of the field of geography itself our goals are to be inclusive in content current in data and relevant in interpretations these goals are elusive because of the time lapse between world events and the publication of a book events inevitably outpace analysis we therefore depend on a continuing partnership with classroom instructors to incorporate and interpret current events and emerging geographic patterns

the aim of this book is to introduce students to a wide range of important and exciting work in human geography the primary audience is students in colleges and universities we decided to write this book because many of the standard texts are too big and increasingly too expensive to provide the accessible and affordable base most of us need for our human geography courses the overly large and expensive

books available now have grown into to use henry james's

description of many nineteenth century novels loose and baggy monsters there is room for a more interesting and subtle book than the standard texts this briefer and more accessible alternative is written in a more familiar style that can be augmented by other resources we can use as metaphor the attempts on the big himalayan peaks in the 1970s the attempts were increasingly organized as large teams with many climbers and elaborate systems of camps and base camps then in the late 1970s a number of climbers dispensed with the large teams and sought to climb alone or with one other climber less burdened by organizational weight they were much more successful in reaching the summits in quick direct assaults this book adapts a similar ethic of light and fast that affords more flexibility to instructors than a traditional textbook not an exact metaphor to be sure but close enough to give you a sense of the book s character and mission
