from the year 2014 in the subject politics international politics topic european union grade 1 5 london school of economics european institute course

mphil phd programme language english abstract this paper assesses the dynamics of eu imf interaction over the course of european monetary unification thereby it adds to a growing body of literature on the external dimension of eu policy making to illustrate how eu imf relations have changed over the last 20 years the paper first finds that member states remain the primary but not the only actors second it provides a descriptive account of eu imf relations in the observed period both in its institutional and functional dimension its main finding is that institutional and functional interaction have not developed in parallel i e that the increase in day to day engagement between the imf and the eu through the activities of surveillance lending and technical assistance in particular as a result of the sovereign debt crisis in the euro zone has not corresponded to formalization of eu fund relations
