Wheat Varieties and the Energy Retention of Broiler Chickens 1997

studies were conducted with indian river hybro broiler chicks and oregon agricultural experiment station dwarf and normal white leghorn hens to improve the utilization of white western wheat chick studies were primarily concerned with characterizing the growth inducing properties of an antibiotic fermentation residue vigofac which had shown a greater growth response with wheat than corn base rations in the adult study evaluations were made as to the effect of feeding vigofac and safflower oil on various performance parameters of wheat fed hens in both the chick and adult bird studies the feeding value of wheat was evaluated relative to corn the vigofac research with chicks was divided into 1 nature of activity 2 mode of activity and 3 comparative growth effects results of the nature of the activity confirmed that the growth inducing activity of vigofac which consists of an extract and a carrier component was found solely in the extract no activity was found when vigofac was ashed which indicates that it is probably organic in nature results suggest that the carrier while not active might stabilize the activity of the extract since experiments showed the activity of the extract was destroyed by boiling for 60 minutes while that of vigofac extract and carrier was not affected by autoclaving for 30 minutes at 15 psi and 121 c soaking vigofac for 96 hours in acidic 0.1n hydrochloric acid and basic 0.1n or 1.0n sodium hydroxide solutions appeared to enhance its activity soaking it for a similar period in water or 95 percent ethanol resulted in no improvement it was concluded that the above enhanced activity was not due to fermentation since water soaking should not have impaired fermentation comparatively the activity of zinc bacitracin 275 ppm also was not adversely affected by autoclaving and was improved following soaking in the same acidic and basic solutions in two respects the activity of vigofac appeared to be dissimilar from that

of distillers dried solubles dds as mentioned vigofac activity was found to be organic in nature whereas dds has been reported to include inorganic activity as well also no active vigofac fractions were found following a fractionation procedure used to isolate such fractions from dds it was found that phenolic acids reported as active isolates of dds have inconsistent growth promoting activity when fed individually or collectively research showed that vigofac appears to promote growth primarily by inducing increased feed consumption energy analyses of droppings showed that it likely increases the utilization of wheat energy but not that of corn which may account for the greater growth promotion noted when it is supplemented to wheat than when added to corn it did not alter intestine thyroid or pancreas weights relative to body weight comparatively zinc bacitracin 275 ppm also improved wheat energy and zinc bacitracin and five percent herring meal feeding caused a significant reduction in relative intestinal weight herring meal feeding also resulted in reduced relative thyroid weight in addition to vigofac the fermentation products fermacto 500 pryferm h b liquid streptomyces solubles unf 40 and solulac as well as the antibiotic zinc bacitracin promoted growth to a greater extent when added to a wheat than to a corn base ration results showed that the variable growth response associated with fermentation products such as vigofac may be due to the presence of antibiotics which induce a somewhat overlapping response growth responses though not completely additive were greatest when vigofac herring meal and zinc bacitracin were fed simultaneously rather than individually in view of the fact that vigofac appears to stimulate growth primarily through increased feed consumption and because where zinc bacitracin and vigofac were compared together they differed appreciably only in their effect on intestinal weight the effect of vigofac thus appears to be more closely related to that of a growth promotant as are antibiotics rather than as a source of unidentified nutrients the laying hen performance variables namely egg production feed consumption feed per dozen eggs egg weight shell thickness body weight albumen height haugh units yolk color shell weight yolk weight and albumen weight were

measured at periodic intervals over a 280 day period for dwarf hens receiving either corn or wheatbase diets as well as for their normal half sisters receiving a cornbase diet where wheat was substituted for corn on a unit for unit basis wheat fed dwarf hens consumed significantly more feed per day and produced eggs that were significantly smaller which contained significantly lighter colored yolks than did corn fed dwarfs eggs of the wheat fed layers were found equal in size to those of the corn fed when two percent safflower oil was substituted in the wheat base ration for animal fat it was concluded that the increase in egg size for the wheat group was due to the additional dietary linoleic acid supplied by the safflower oil despite the fact that the yolk color was significantly lighter for the wheat fed hens it was not objectionably light due to xanthophyll contributed by alfalfa meal the dietary addition of vigofac did not improve laying hen performance relative ranges of the dwarf treatments to the normals were as follows egg production 72.7 to 76.3 percent feed consumption 69.7 to 72.4 percent feed per dozen eggs 93.6 to 97.3 percent and egg weight 92.9 to 93.8 percent

Improvement of White Western Wheat for Chickens Through Application of Dietary Additives 1972

one of eight traditional stories for young readers with bright and colourful illustrations and simple text in large type

The Little Red Hen and the Wheat 2003

wheat and rice in disease prevention and health reviews the wide range of studies focusing on the health benefits and disease prevention associated with the consumption of wheat and rice the two most widely consumed whole grains this book

provides researchers clinicians and students with a comprehensive definitive and up to date compendium on the diverse basic and translational aspects of whole grain consumption and its protective effects across human health and disease it serves as both a resource for current researchers as well as a guide to assist those in related disciplines to enter the realm of whole grain and nutrition research overall studies have shown that a decrease in the amount of whole grains in the modern diet is related to a corresponding increase in health problems that are attributed to this all too common dietary imbalance the resulting health issues associated with an over processed diet which provides inadequate levels of nutrients from whole grains may include obesity diabetes high blood lipids chronic inflammatory states and an excess of oxidative stress strength and endurance may also suffer as a result of these nutrient deficiencies followed by declines in energy and immunity saves researchers and clinicians time in quickly accessing the latest details on a broad range of nutritional and epidemiological issues provides a common language for nutritionists nutrition researchers epidemiologists and dietitians to discuss how the action of wheat and rice protect against disease and modify human health preclinical clinical and population studies help nutritionists dieticians and clinicians map out key areas for research and further clinical recommendations

Wheat and Rice in Disease Prevention and Health

2014-01-22

the economical production of beef cattle in most sections of the united states depends largely upon the investment in the durable convenient and practical buildings as well as upon the care feeding and management of the herd barns suitable for the successful growing and fattening of beef cattle need not be elaborate nor overexpensive any unnecessary outlay of money invested in them adds to the overhead

expense appearance however should not be neglected since well proportioned and well designed barns may be constructed at very little if any additional expense such barns add materially to the sale value of a farm property page ii

Wartime Feed Mixtures for Chickens 1943

who does all the work to produce the loaf of bread from planting to baking the other animals or the little red hen

Standard Varieties of Chickens 1928

for use in schools and libraries only the little red hen asks her friends to help her plant water and harvest the grain of wheat she found and they refuse but they are more than eager to eat the bread she made from it and they make sure not to make the same mistake twice

The Little Red Hen and the Grains of Wheat 1966

the little red hen finds none of her lazy friends willing to help her plant harvest or grind wheat into flour but all are eager to eat the cake she makes from it

The Little Red Hen and the Ear of Wheat 2001-04

little red hen finds some grains of wheat but when she ask the cat the dog and the goose to help her plant them they are all too busy when little red hen has finally grown the wheat harvested it turned it into flour and baked the bread the others are

only to willing to help her eat it but will she let them

The Little Red Hen 1998

two hundred recipes plus tips and advice for those dealing with food allergies or sensitivities when you have medical issues with dairy wheat and gluten most ready made foods are not an option so this cookbook offers two hundred recipes for soups starters light lunches egg dishes pasta and pizzas fish meat poultry and game salads vegetables and vegetarian dishes desserts breads cookies and cakes all of which are milk cream butter cheese yogurt wheat gluten and lactose free you ll also find helpful information about your forbidden ingredients where they are likely to turn up and what alternatives to use from an expert on food allergies and intolerances and the author of the everyday wheat free and gluten free cookbook

The Little Red Hen and the Grains of Wheat 2005

none of her animal friends will help the little red hen plant and care for the grains of wheat she finds but they are willing to eat the bread she bakes from it

Cooking Gluten, Wheat and Dairy Free 2013-02-19

serves up one hundred fifty recipes that follow the author s proven plan for losing weight and beating disease by avoiding the consumption of wheat products

Chicken Raising Made Easy 2010-12

wheat is a true story of the memories of a boy who grew up on a small indiana farm just as world war ii began dawn to dark labor year round instilled in him the middle of three sons of a hard driving conservative lutheran a work ethic he applied the remainder of his life he continues to work hard but now it means raising millions of dollars for community projects in brown county indiana newkirk founded the brown county community foundation in 1992 served as its volunteer ceo for five years and through it helped bring into being the brown county community ymca the award winning brown county public library and the brown county career resource center newkirk also was the founder of the rotary club of brown county wheat will be an inspiration to those who think new opportunities are illusions and fulfillment in everyday life not theirs to achieve

The Effect of Wheat Cultivar and Enzyme Supplementation on Nutrient Availability and Performance of Poultry [microform] 2003

beyond the wheat field is a story about a woman who returns to room 6 her mother s bedroom at the nursing home two years after her mother s death seeking healing her past comes unraveled as memory after memory pour out into the room hard things that began in the wheat field down the street from her home she grew up in it led her down a path of addiction broken relationships and abuse she had tucked them all safely in the dark places of her mind never wanting to face them ever again but through the deep prayers of her mother and a god that never let up she finds healing and freedom

Charlie the Chicken 1997

this early guide to poultry husbandry is a fascinating read for any poultry keeper or historian of the breed and contains much information and anecdote that is still useful today contents include how chickens use their feed general principles of feeding chickens nutritive requirements of chickens effect of feed on flesh and eggs deficiency diseases and vices selecting feedstuffs practical points in feeding chickens use of milk and home grown grain many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive we are republishing these classic works in affordable high quality modern editions using the original text and artwork

Bulletin 1897

chicken little becomes frightened when he is hit on the head by a grain of wheat and tells all his friends that the sky is falling

A Digest of Metabolism Experiments in which the Balance of Income and Outgo was Determined 1897

it is ten years since volume 1 of the world wheat book was completed and the intervening years have seen many changes in the world economy in agriculture in the countries where wheat is grown and major developments in the techniques of wheat breeding this second volume therefore updates but does not replace the first volume by adding to the countries discussed giving an update on agronomy and cropping practices and reviewing the technological advances in wheat breeding techniques the

opening chapters summarise the history of wheat growing the development of wheat breeding and the current status of breeding in the countries covered the next set of chapters looks at agronomy and cropping practices in a wide range of wheat growing regions across the world the third set of chapters records the latest advances in wheat breeding looking at concepts and strategies as well as current and developing techniques the fourth set reviews the developing end uses the final group of chapters examines specific biotic and abiotic threats from viruses insect pests and diseases this book is subtitled a history of wheat breeding it would be even more accurate to say that it records and discusses the continuing history of wheat breeding as stated by pierre pagesse chairman of groupe limagrain in his preface the future of wheat rests in our hands and in those who succeed us let us try to do this together in a visionary and determined manner
