r m hare one of the most widely discussed of today s moral philosophers here presents his most important essays on religion and education in which he brings together the theoretical and the practical

Euthanasia, Ethics and Public Policy 2018-10-18

resource added for the psychology includes sociology 108091 courses

Euthanasia 2007-11-20

this timely work is a balanced overview of end of life issues related to euthanasia and assisted suicide except for the oregon death with dignity act there are no u s laws that allow physicians to assist patients in hastening death many who support physician assisted suicide ask why not after all the

netherlands permits both euthanasia and physician assisted suicide and polls suggest that many americans want that choice available to them euthanasia a reference handbook second edition explores that question through a balanced thoughtful discussion of the legal medical and spiritual components of end of life questions what are the potential pitfalls of legalizing assisted suicide how can the expenses of a lingering death impact an uninsured family how would physician assisted suicide impact healthcare costs through its objective exploration of these issues as well as its historical and international perspective this volume helps readers answer the difficult questions related to the end of life

Alzheimer's Disease, Media Representations and the Politics of Euthanasia 2016-04-15

drawing on extensive data including news media reports and commentaries documentaries courts and court reports films websites professional literature and government and non government agencies this book explores the alzheimerisation of the euthanasia debate examining the shift in recent years in public attitudes towards the desirability and moral permissibility of euthanasia as an end of life solution for people living with the disease not just at its end stage but also at earlier stages with attention to media representations and public understandings of alzheimer s disease alzheimer s disease media representations and the politics of euthanasia sheds light on the processes contributing to these changes in public opinion investigating the drivers of vexed political debate surrounding the issue and examining the manner in which both sides of the euthanasia debate mobilise support portray their opponents and make use of media technologies to frame the terms of discourse paving the way for a greater level of intellectual honesty with regard to an issue carrying significant policy implications this book will be of interest to scholars of media and communication social movements and political communication and the sociology of health and medicine as well as researchers and professionals in the fields of palliative and end of life care

Palliative Care Nursing 2008-08-01

it has been a true pleasure to have had the opportunity to peruse the second edition of palliative care nursing this book authored predominately by uk based experts succeeds in presenting sophisticated thoughts in readily accessible language each chapter begins with a summary of key points with both classic and new relevant literature well integrated into the text i have also been particularly impressed with the editors final chapter in which they synthesize a number of crucial issues for the future development of palliative care this second edition makes a significant contribution to both the palliative care literature as well as to nursing literature carol tishelman karolinska institutet stockholm sweden i find palliative care nursing a very attractive book for nurses but also for other disciplines to learn about nursing and to learn about palliative care the book is voluminous informative and educationally well constructed frameworks and models in this book will give nurses the opportunity to make up their own process to offer support and be a carer for the incurably ill person and his her family as a skilled companion this book gives the possibility for nurses to spread one clear voice about palliative care nursing congratulations to all the authors martine de vlieger palliatieve hulpverlening antwerpen v z w university of antwerp belgium this book should be compulsory reading for nurses and other health care workers who are involved in the care of people in the final stages of life it provides a comprehensive account of the major issues clinical professional sociological and political that confront contemporary palliative care while also offering strategies to move forward the real world of palliative care is described and critiqued and the rhetoric is dispensed with this book is a vital resource for nursing practice learning and teaching associate professor peter hudson rn phd director of the centre for palliative care research and education st vincent s hospital and the university of melbourne australia this is an excellent book for anyone completing either an academic qualification or who wants to understand the who what and where of palliative care both in the uk and abroad its detail is balanced with case studies and practical illustrations that bring the academic nature of its writing to life for reference purposes for anyone completing academic work it has to be an absolute must nursing times the second edition of this innovative textbook has been extensively revised and updated to reflect new global developments in palliative care this textbook reviews current research and examines the evidence base for palliative care policy and practice over a third of the

Bioethics 2008-09-01

the 5th edition of bioethics provides nursing students with the necessary knowledge and understanding of the ethical issues effecting nursing practice groundbreaking in its first edition bioethics continues its role as a vital component of nursing education and provides a framework for students to understand the obligations responsibilities and ethical challenges they will be presented with throughout their careers this latest edition responds to new and emerging developments in the field and marks a significant turning point in nursing ethics in that it serves not only to inform but also to revitalise and progress debate on the issues presented

Euthanasia, Death with Dignity and the Law 2001-10-09

concentrating on the rights and responsibilities of patients and health care professionals biggs law u of kent britain discusses medical decision making at the end of life she explores what decisions may legitimately be taken when and by whom choice is a central theme especially when a person s ideal choice might be to die sooner than would be considered natural by professional and emotional care givers distributed in the us by isbs annotation copyrighted by book news inc portland or

A Concise History of Euthanasia 2007

this deeply informed history traces the controversial record of mercy killing a source of heated debate among doctors and laypeople alike dowbiggin examines evolving opinions about what constitutes a good death taking into account the societal and religious values placed on sin suffering resignation judgment penance and redemption he also examines the bitter struggle between those who stress a right to compassionate and effective end of life care and those who define human life in terms of either biological criteria utilitarian standards a faith in science humane medical treatment the principle of personal autonomy or individual human rights considering both the influence of technological and behavioral changes in the practice of medicine and the public s surprising lack of awareness of death s many clinical and biological dimensions this book raises profound personal and collective questions on the future of euthanasia

Debating Euthanasia 2011-12-02

in this new addition to the debating law series emily jackson and john keown re examine the legal and ethical aspects of the euthanasia debate emily jackson argues that we owe it to everyone in society to do all that we can to ensure that they experience a good death for a small minority of patients who experience intolerable and unrelievable suffering this may mean helping them to have an assisted death in a liberal society where people s moral views differ we should not force individuals to experience deaths they find intolerable this is not an argument in favour of dying on the contrary jackson argues that legalisation could extend and enhance the lives of people whose present fear of the dying process causes them overwhelming distress john keown argues that voluntary euthanasia and physician assisted suicide are gravely unethical and he defends their continued prohibition by law he analyses the main arguments for relaxation of the law including those which invoke the experience of jurisdictions which permit these practices and finds them wanting relaxing the law would he concludes be both wrong in principle and dangerous in practice not least for the dying the disabled and the disadvantaged

Euthanasia of a Mission 2002-05-30

Henry Venn, secretary of the London-based Church Missionary Society from 1840 to 1872, coined the term "Euthanasia of a Mission" to describe the vital process whereby a foreign mission becomes progressively indigenous and independent. His vision of church autonomy was first implemented in Sierra Leone, and the author examines this experiment in detail to uncover the nature of early efforts at constructing an African Christian identity separate from foreign influence and control through a detailed analysis of the crises and controversies evoked by African interpretation and appropriation of Venn's vision. The author illustrates the complex interaction of foreign missionary action, indigenous Christian response, and socioeconomic factors in the problematic transition from mission to national church. Venn's ideas had far-reaching influence on the growth of African nationalism, political consciousness, and nation building. His experiment led to local efforts to merge with the foreign missionary efforts and to an eventual takeover of leadership and mission responsibilities by native Africans. Hanciles chronicles the initial missionary efforts in Sierra Leone, the growth of the mission, the problems that arose, and the emergence of Ethiopianism, a movement which promoted the idea of African nationalism. The book argues that in the West African region, at least, Venn's experiment precipitated some of the most profound ecclesiastical crises of the 19th century and unleashed powerful forces of change that continue to this day by focusing on the African factor in the intensely problematic transition from mission to national church. This work contributes to the ongoing reappraisal of the significance of African Christianity as a major stream of Christian history.

Euthanasia and Law in Europe 2008-05-21

This book is a successor to J. Griffiths' *A Good and Holy Weavers: Euthanasia and Law in the Netherlands* (Amsterdam University Press, 1998), which was widely praised for its thoroughness, clarity, and accuracy. The new book emphasizes recent legal developments and new research and has been expanded to include a full treatment of Belgium, where since 2002 euthanasia has also become legal. The book also includes descriptions written by local specialists of the legal situation and what is known about actual practice in a number of other European countries: England and Wales, France, Italy, Scandinavia, Spain, Switzerland. The book strives for as complete and dispassionate a description of the situation as possible. It covers in detail the substantive law applicable to euthanasia, physician-assisted suicide, withholding and withdrawing treatment, use of pain relief in potentially lethal doses, palliative and terminal sedation, and termination of life without a request, in particular in the case of newborn babies. The process of legal development that has led to the current state of the law, the system of legal control, and its operation in practice, the results of empirical research concerning actual medical practice, a concluding part deals with some general questions that arise out of the material presented: Is the legalisation of euthanasia an example of the decline of law, or should it, on the contrary, be seen as part and parcel of the increasing juridification of the doctor-patient relationship? Does the Dutch experience with legalised euthanasia support the idea of a slippery slope toward a situation in which life, especially of the more vulnerable members of society, is less effectively protected? Is it possible to explain and to predict when a society will decide to legalise euthanasia?

New Directions in the Ethics of Assisted Suicide and Euthanasia 2023-03-03

This book provides novel perspectives on the ethical justifiability of assisted dying. In the revised edition of *New Directions in the Ethics of Assisted Suicide and Euthanasia*, going significantly beyond traditional debates about the value of human life, the ethical significance of individual autonomy, the compatibility of assisted dying with the ethical obligations of medical professionals, and questions surrounding intention and causation, this book promises to shift the terrain of the ethical debates about assisted dying. The novel themes discussed in the revised edition include the role of markets, disability, gender, artificial intelligence, medical futility, race, and transhumanism. Ideal for advanced courses in bioethics and healthcare ethics, the book illustrates how social and technological developments will shape debates about assisted dying in the years to come.

Brain Science Under the Swastika 2020-04

whether euthanasia or assisted suicide should be legalized is one of the most pressing and profound questions facing legislators health care professionals their patients and all members of society regrettably the debate is too often characterized by rhetoric rather than reason this book aims to inform the debate by acquainting anyone interested in this vital question with some of the major ethical legal clinical and theological issues involved the essays it contains are authoritative in that they have been commissioned from some of the world s leading experts balanced in that they reflect divergent viewpoints including a vigorous debate between two eminent philosophers and readable in that they should be readily understood by the general reader

Euthanasia Examined 2011-03-29

the fate of nazi euthanasia victims exerts influence on their descendants in the generations to follow the euthanasia killings were supposedly intended to further the german race both through the elimination of hereditary diseases and the eradication of people who did not fit into a society of aryan superiority in this study to break through the taboo concerning euthanasia victims and issues of shame anger and excepting decentering with art making is used throughout this study also reveals the subjective journey of the researcher a descendant of an euthanasia victim the findings demonstrate how the atrocities expressed as intergenerational trauma is uncovered in the repressed conscious and unconscious of the descendants

LIFE Worthy of Life: Voices of Descendants of Euthanasia Victims 2013-10-02

this book addresses key historical scientific legal and philosophical issues surrounding euthanasia and assisted suicide in the united states as well as in other countries and cultures euthanasia was practiced by greek physicians as early as 500 bc in the 20th century legal and ethical controversies surrounding assisted dying exploded many religions and medical organizations led the way in opposition citing the incompatibility of assisted dying with various religious traditions and with the obligations of medical personnel toward their patients today these practices remain highly controversial both in the united states and around the world comprising contributions from an international group of experts this book thoroughly investigates euthanasia and assisted suicide from an interdisciplinary and global perspective it presents the ethical arguments for and against assisted dying highlights how assisted dying is perceived in various cultural and philosophical traditions for example south and east asian cultures latin american perspectives and religions including islam and christianity and considers how assisted dying has both shaped and been shaped by the emergence of professionalized bioethics readers will also learn about the most controversial issues related to assisted dying such as pediatric euthanasia assisted dying for organ transplantation and suicide tourism and examine concerns relating to assisted dying for racial minorities children and the disabled

Euthanasia and Assisted Suicide 2017-01-26

as medical technology advances and severely injured or ill people can be kept alive and functioning long beyond what was previously medically possible the debate surrounding the ethics of end of life care and quality of life issues has grown more urgent in this lucid and vigorous new book craig paterson discusses assisted suicide and euthanasia from a fully fledged but non dogmatic secular natural law perspective he rehabilitates and revitalises the natural law approach to moral reasoning by developing a pluralistic account of just why we are required by practical rationality to respect and not violate key demands generated by the primary goods of persons especially human life important issues that shape the moral quality of an action are explained and analysed intention foresight action omission action consequences killing letting die innocence non innocence and person non person paterson

defends the central normative proposition that it is always a serious moral wrong to intentionally kill an innocent human person whether self or another notwithstanding any further appeal to consequences or motive

Assisted Suicide and Euthanasia 2017-09-29

euthanasia ethics and the law argues that the law governing the ending of life in england and wales is unclear confused and often contradictory it shows that the rules are in competition because the ethical principles underlying them are so diverse and conflicting this book covers topics including the diane pretty litigation lord joffe s assisted dying for the terminally ill bill the advent of death tourism and the real status of involuntary and passive euthanasia in english law

Euthanasia, Ethics and the Law 2007-11-20

after assessing the strengths and weaknesses of arguments for assisted suicide and euthanasia gorsuch builds a nuanced novel and powerful moral and legal argument against legalization one based on a principle that surprisingly has largely been overlooked in the debate the idea that human life is intrinsically valuable and that intentional killing is always wrong at the same time the argument gorsuch develops leaves wide latitude for individual patient autonomy and the refusal of unwanted medical treatment and life sustaining care permitting intervention only in cases where an intention to kill is present

Euthanasia 1978

this revealing volume explores recent historical perspectives on the modern euthanasia and assisted suicide debate and the political arenas in which it has unfolded emotional public responses to widely publicized right to die and euthanasia cases such as those revolving around dr jack kevorikian and terri schiavo highlight their volatile mix of medical ethical religious legal and public policy issues the euthanasia assisted suicide debate explores how this debate has evolved over the past 100 years as judicial approaches legislative responses and prosecutorial practices have shifted as a result of changes in medical technology and consumer sophistication emphasizing the period from the 1950s forward the book offers an unbiased examination of the origins of the modern medical euthanasia and assisted suicide debates the involvement of physicians the history and significance of medical technology and practice and the role of patients and their families in the ongoing controversy this illuminating exploration of concepts issues and players will help readers understand both sides of the debate as viewed by participants

The Future of Assisted Suicide and Euthanasia 2009-04-12

this volume is devoted to exploring a subject which on the surface might appear to be just a trending topic in fact it is much more than a trend it relates to an ancient permanent issue which directly connects with people s life and basic needs the recognition and protection of individuals dignity in particular the inherent worthiness of the most vulnerable human beings the content of this book is described well enough by its title human dignity of the vulnerable in the age of rights certainly we do not claim that only the human dignity of vulnerable people should be recognized and protected we rather argue that since vulnerability is part of the human condition human vulnerability is not at odds with human dignity to put it simply human dignity is compatible with vulnerability a concept of human dignity which discards or denies the dignity of the vulnerable and weak is at odds with the real human condition even those individuals who might seem more skilled and talented are fragile vulnerable and limited we need to realize that human

condition is not limitless it is crucial to re discover a sense of moderation regarding ourselves a sense of reality concerning our own nature some lines of thought take the opposite view it is sometimes argued that humankind is or is called to be powerful and that the time will come when there will be no vulnerability no fragility no limits at all human beings will become like god or what believers might think god to be this perspective rejects human vulnerability as in intrinsic evil those who are frail or weak who are not autonomous or not able to care for themselves do not possess dignity in this volume it is claimed that vulnerability is an inherent part of human condition and because human dignity belongs to all individuals laws are called to recognize and protect the rights of all of them particularly of those who might appear to be more vulnerable and fragile

The Euthanasia/Assisted-Suicide Debate 2012-09-20

shelter medicine for veterinarians and staff second edition is the premier reference on shelter medicine divided into sections on management species specific animal husbandry infectious disease animal cruelty shelter programs behavior and spay neuter the new edition has been reformatted in a more user friendly design with briefer chapters and information cross referenced between chapters maintaining a herd health approach new and expanded chapters address issues of husbandry infectious disease management behavior forensics population management forensic toxicology animal cruelty and hoarding enrichment in shelters spay neuter and shelter design now in full color this fully updated new edition delivers a vast array of knowledge necessary to provide appropriate and humane care for shelter animals veterinarians veterinary technicians and shelter professionals will find this to be the go to resource on the unique aspects of shelter medicine that help facilitate operating a modern efficient and humane shelter

the freehof institute of progressive halakhah the freehof institute of progressive halakhah is a creative research center devoted to studying and defining the progressive character of the halakhah in accordance with the principles and theology of reform judaism it seeks to establish the ideological basis of progressive halakhah and its application to daily life the institute fosters serious studies and helps scholars in various portions of the world to work together for a common cause it provides an ongoing forum through symposia and publications including the quarterly newsletter halakhah published under the editorship of walter jacob in the united states the foremost halakhic scholars in the reform liberal and progressive rabbinate along with some conservative and orthodox colleagues as well as university professors serve on our academic council this collection on essays is the product of the fourth symposium held in montreal during june 1993

Shelter Medicine for Veterinarians and Staff 2013-01-04

physician assisted suicide what are the issues offers a detailed discussion of recent supreme court rulings that have had an impact on the contemporary debate in the united states and elsewhere over physician assisted suicide two rulings by the u s supreme court have altered the contemporary debate on physician assisted suicide washington v glucksberg 1997 and vacco v quill 1997 in these cases the supreme court ruled that state laws could prohibit assisted suicide and therefore physician assisted suicide these rulings mark the apex of over two decades of unprecedented litigation regarding end of life care and signal the beginning of a new clinical ethical and legal debate over the extent of an individual s rights to control the timing manner and means of his her death the debate over suicide and assisting suicide is ancient and contentious and intertwined with questions about the permissibility of voluntary active euthanasia or mercy killing responses to these issues can be divided into those who defend physician assisted suicide and many of these other activities and those who object but those who object may do so on principled grounds in that they regard these activities as wrong in all cases or non principled in that they believe there are more prudent less disruptive or more efficient policies the authors in this book sort out these

responses and look at the assumptions underlying them several of these authors give startling new interpretations that a culture gap deeper and wider than that in the abortion debate exists

Death and Euthanasia in Jewish Law 1995-06-30

this element overviews developments and issues in dutch euthanasia practice following an outline of the history of the dutch euthanasia act and a survey of the most critical trends and figures some current issues are explored in depth euthanasia and incompetency euthanasia by nonphysicians and euthanasia for those who consider their lives completed this element is intended for a general readership including undergraduate students in law medicine or ethics this title is also available as open access on cambridge core

Physician-Assisted Suicide: What are the Issues? 2001-11-30

no one really wants to die or do they from classical times to our post modern era of medical high tech societies have struggled with the thorny issue of euthanasia and what it entails who shall be entitled to a good death and in what form shall it arrive this book provides the reader with insight and enlightenment on the medical philosophical social cultural and existential aspects of good death amid our digitized individualized and ageing society hampered by rising health care costs but unchained from one standardized level of care

Euthanasia as Privileged Compassion 2024-06-30

the oxford textbook of palliative nursing remains the most comprehensive treatise on the art and science of palliative care nursing available dr betty rolling ferrell and dr judith a paice have invited 162 nursing experts to contribute 76 chapters addressing the physical psychological social and spiritual needs pertinent to the successful palliative care team organized within 7 sections this new edition covers the gamut of principles of care from the time of initial diagnosis of a serious illness to the end of a patient s life and beyond this fifth edition features several new chapters including chapters on advance care planning organ donation self care global palliative care and the ethos of palliative nursing each chapter is rich with tables and figures case examples for improved learning and a strong evidence based practice to support the highest quality of care the book offers a valuable and practical resource for students and clinicians across all settings of care the content is relevant for specialty hospice agencies and palliative care programs as well as generalist knowledge for schools of nursing oncology critical care and pediatric developed with the intention of emphasizing the need to extend palliative care beyond the specialty to be integrated in all settings and by all clinicians caring for the seriously ill this new edition will continue to serve as the cornerstone of palliative care education

Euthanasia 2011-09-15

Evil will indeed flourish when good men remain silent and yet sometimes all that it takes to bring dark practices to light is for a single man to speak out this book tells the story of john anderson an unassuming and decent living 85 year old retired school teacher who lives outside london depressed by years of living in a toxic social environment and under a government whose policies are openly hostile to the elderly he finally decides to die by euthanasia euthanasia clinics claim to offer the sick and elderly a dignified death free from pain at a time and place of their choosing but john discovers that beneath the calm and rosy veneer of the clinics there lies a living hell which he is determined to expose the scenario portrayed here is surely just a page in mankind's history book away from reality
