Cybersecurity is a paramount concern in both Internet of Things (IoT) and Cyber Physical Systems (CPS) due to the interconnected and often critical nature of these systems. The integration of AI/ML into the realm of IoT and CPS security has gained significant attention and momentum in recent years. The success of AI/ML in various domains has sparked interest in leveraging these technologies to enhance the security, resilience, and adaptability of IoT and CPS. Secure and smart cyber-physical systems provides an extensive exploration of AI/ML-based security applications in the context of IoT and CPS. Features presents cutting edge topics and research in IoT and CPS includes contributions from leading worldwide researchers. Focuses on CPS architectures for secure and smart environments. Explores AI/ML and blockchain approaches for providing security and privacy to CPS including smart grids, smart cities, and smart healthcare. Provides comprehensive guidance into the intricate world of software development for medical devices. Covers a blueprint for the emergence of 6G communications technology in Industry 5.0 and federated learning based secure financial services. This book covers state of the art problems, existing solutions, and potential research directions for CPS researchers, scholars, and professionals in both industry and academia. Without a doubt, millions of investors don't feel entirely comfortable researching their own stock selections. They invest in 401(k) plans, mutual funds, and even individual stocks with only bare bones investigation. Turning to so-called investment gurus on financial news shows and headlines in newspapers for their information. Describes the characteristics of students with mild disabilities and clearly explains the best teaching practices for inclusive education. Behavior management, social skill instruction, and modifying classroom instruction for students with mild disabilities. Traditional views of the conventional military balance in the central region emphasize a comparison of

the number of major weapon systems each side has in its inventory or of the number of military personnel or formations these traditional statements of the balance dramatically tend to favor the warsaw pact in this paper the author addresses some of the overlooked dimensions in the conventional military balance 1 the reliability of allies 2 the role of surprise 3 the contribution of logistic support and 4 the role of command control communication and electronic warfare of these four the first two might be called scenario related variables while the last two are generally called force multipliers the effect each might have in wartime is uncertain and not easily factored into the balance analytically the author gives a brief indication of how one might attempt to do so or what results are generally obtained when those attempts have been made
