the question why should i obey the law introduces a contemporary puzzle that is as old as philosophy itself the puzzle is especially troublesome if we think of cases in which breaking the law is not otherwise wrongful and in which the chances of getting caught are negligible philosophers from socrates to h l a hart have struggled to give reasoned support to the idea that we do have a general moral duty to obey the law but more recently the greater number of learned voices has expressed doubt that there is any such duty at least as traditionally conceived the thought that there is no such duty poses a challenge to our ordinary understanding of political authority and its legitimacy in what sense can political officials have a right to rule us if there is no duty to obey the laws they lay down some thinkers concluding that a general duty to obey the law cannot be defended have gone so far as to embrace philosophical anarchism the view that the state is necessarily illegitimate others argue that the duty to obey the law

can be grounded on the idea of consent or on fairness or on other ideas such as community

it has often occurred to the author that there are two principal defects in the existing treatises on the game of whist the one that the principles of play are in general laid down as so many isolated and arbitrary conventions the reasons upon which such principles are based being seldom if at all and scarcely ever fully stated the other that suitable illustrations by which alone the principles can be brought forcibly home and fixed in the memory are almost entirely wanting the present work is an attempt to supply these deficiencies with regard to the latter the author feels that nothing in point of illustration of principles can be so instructive as a selection of hands played completely through and accompanied by copious explanations the idea it is believed as applied to whist is a new one though a similar plan has long been in use in treatises on chess it has not been deemed necessary to occupy space by detailing the mode of playing and of scoring as this information can be readily acquired at the table the reader is therefore credited with this elementary knowledge and is conducted at once to the general principles which he is advised to consider carefully before proceeding to the hands

the focus of this book is to offer a humane rocesponse to dealing with violence an interpretive analysis is presented in order to think differently about violence in schools and about how a citizenship education of becoming can deal with the unpredictable consequences of violence in its own potentiality it seems to the authors that given the confident onslaught of violence there is nothing left to do but to offer insight into the nature of violence itself and by so doing to search for unexplored ways of humane response and being the authors are not pretending to hold a magic wand that will sanctify schools into the safe zones that they ought to be and as which they should serve in any society this would be both presumptuous and misleading what one is looking and hoping for however is a renewed engagement a slight tilting of the perspective so that something other than how we have always responded to violence perhaps will emerge the authors are confident that such a deconstructive approach to violence in schools through the lens of a reconsidered view of citizenship education can assist them and others to wrestle with its potential for destruction that can be changed into options for co belonging of a non violent if not peaceful kind

law s judgement elucidates and defends a feature of contemporary law that is currently either overlooked or too glibly dismissed as morally troublesome or historically anachronistic that feature is the abstract nature of law s judgement and its three components show that when law judges us it often does so in ignorance of our particular characters and abilities on the one hand and in ignorance of our context and circumstances on the other law s judgement is thus insensitive to all or much that makes us the particular people we are the book explores various connections between this mode of judgement and some of our most important legal and political values it shows that law s abstract judgement is closely related to important juristic conceptions of personhood responsibility and impartiality and that these notions are not without moral significance the book also examines the connections between modern law s judgement and three of our most important political values namely dignity equality and community it argues that if we value particular conceptions of dignity equality and community then we must also value law s judgement illuminating these connections therefore serves a double purpose first it makes a case against those who counsel liberation from law s abstract judgement and second it redirects attention to the task of morally evaluating law s abstract judgement in its own terms
