Factory and Industrial Management

1898

in recent years major social forces such as ageing populations social trends migration patterns and the globalization of economies have reshaped social welfare policies and practices across the globe multinational corporations ngos and other international organizations have begun to influence social policy at a national and local level among the many ramifications of these changes is that globalizing influences may hinder the ability of individual nation states to effect policies that are beneficial to them on a local level with contributions from thirteen countries worldwide this collected work represents the first major comparative analysis on the effect of globalization on the international welfare state the welfare state in post industrial society is divided into two major sections the first draws from a number of leading social welfare researchers from diverse countries who point to the nation state as case studies highlighting how it goes about establishing and revising social welfare provisions the second portion of the volume then moves to a more global perspective in its analysis and questioning of the impact of globalization on citizenship ageing and marketization the welfare state in post industrial society seeks to encourage debate about the implications of the most pressing social welfare issues in nation states and integrate analyses of policy and practice in particular countries struggling to provide social welfare support for their needy populations

Industrial Management

1896

in 1923 24 henry frugès a bordeaux industrialist commissioned le corbusier and pierre jeanneret with a small workers housing estate in lège and a garden city in pessac comprising 130 to 150 houses with shops these two housing schemes fitted neatly into the architects research on standardisation and the machine à habiter and provided a useful laboratory for gauging public opinion with regard to mass production techniques in housing estates one of the most striking features of the cité frugès was the use of polychromy on the exterior facades to in le corbusier s own words sculpt the space through the physical quality of colour bring forward some volumes while making others recede in short compose with colour in the same way as we have composed with form this is how architecture is transformed into urbanism historical documents and drawings make this handy sized volume an invaluable guide for visitors and a practical introduction for all architectural enthusiasts

Industrial Management

1896

the onset of the global crisis has emphasised the persistence of substantial differences in development and social progress within the euro area the specific case of countries located in the southern periphery region has come to the centre stage due to the harsh economic conditions that all these countries have experienced in the recent past in the aftermath of the american subprime credit bubble these countries high indebtedness raised doubts as to their ability to sustain public finances with the financial crisis developing and gaining momentum due to the fragilities presented in the economy to varying degrees of severity all of these economies have since been forced to introduce strong fiscal tightening programmes in order to achieve fiscal consolidation which have translated into recession and rising unemployment this book undertakes a comprehensive analysis of the causes of the crisis in southern european countries showing that the achilles heel of these economies is rooted in the dismal evolution of productivity and in a specialisation pattern excessively based on the so called traditional low and low medium tech industries which yield low margins declining export shares and ultimately withering international competitiveness such evidence suggests that the southern european periphery industrial growth model has reached its limits demanding a multidimensional policy approach capable of overcoming the magnitude and complexity of the present crisis without denying the need to adjust public and private balance sheets it is argued that finding a sustainable path out of the present problems requires addressing the challenges of productivity growth and competitiveness in the long term

Aperçu Des Moyens de Formation Pour Le Développement Industriel

1988

first published in 1990 this book presents an original and comprehensive overview of australian economic thought the authors stress by way of introduction the many important innovative contributions australian economists have made to thought worldwide as the argument develops the work of major figures is discussed in detail in addition to the role of different journals and economic societies

Chemical News and Journal of Industrial Science

1862

this book explains in fascinating detail how economic and social transformations in pre 1600 japan led to an industrious revolution in the early modern period and how the fruits of the industrious revolution are what have supported japan since the eighteenth century improving living standards and leading to the formation of the work ethic of modern japan the arrival of the sengoku period in the sixteenth century saw the emergence and domination of government by the warrior class it was tokugawa ieyasu who unified the realm yet this unity did not give rise to an autocratic state as the shogun was recognized merely as a main pillar of the warrior class economically however from the fourteenth century currency payments for shōen nengu taxes paid to the proprietor became standard and currency circulation began primarily in the central region under tokugawa rule organized domestic coinage of currency began opening the way to establishing a national economic society also agricultural land was surveyed through cadastral surveys known as kenchi land values were converted in terms of rice so the expected rice yields for each village were assessed and the lords used this as a benchmark for imposing taxes in the sixteenth and seventeenth centuries japan experienced a great transition and conditions for peasants agriculture and farming villages underwent great changes inefficient traditional agriculture using peasants in a state of servitude was transformed into highly efficient small sized farming operations which relied on family labor as production yields increased due to labor intensive agriculture the profits obtained by the peasants improved their living standards the stem family system became the norm through which work ethics and even literacy were transmitted this very change was the result of the industrious revolution in japan the book thus presents the framework of the facts of pre industrial japanese history and depicts pre modern japan from a macroscopic point of view showing how the industrious revolution came about it is certain to be of great interest to economists and historians alike

Industrial Relations

1989

this book presents the proceedings of the 3rd conference on computer science electronics and industrial engineering csei 2021 held in ambato in october 2021 with participants from 10 countries and guest speakers from chile colombia brasil spain portugal and united states featuring 20 peer reviewed papers it discusses topics such as the use of metaheuristics for non deterministic problem solutions software architectures for supporting e government initiatives and the use of electronics in e learning and industrial environments it also includes contributions illustrating how new approaches to these converging research areas are impacting the development of human societies around the world as such it is a valuable resource for scholars and practitioners alike

Industrial Art Education. A Lecture Delivered in Philadelphia, April 23, 1875

2024-03-08

this groundbreaking anthology is the first to focus exclusively on the history of industrial design with essays written by some of the greatest designers visionaries policy makers theorists critics and historians of the past two centuries this book traces the history of industrial design industrialization and mass production in the united states and throughout the world

Monographs of the Industrial Education Association

1889

rapid and intensive changes in the information landscape cause changes in social relationships and consequently in relations between generations within their social role libraries should work actively to reduce age segregation and isolation and build cohesive society through intergenerational services and programmes the authors speak about the intergenerational dialogue in libraries theories research and practice and about reading as a link between generations thus offering to libraries strategies for establishing social cohesion

Factory and Industrial Management

1919

this book addresses the specialized topic of input output models for sustainable industrial systems while these models are well established tools for economic analysis their underlying mathematical structure is also applicable to the analysis and optimization of a wide range of systems that are characterized by linear interdependencies among their components this means that input output models can be used for diverse networks such as processes within industrial plants industrial plants in a supply chain or departmental units within an organization the models can also be readily extended to interactions between man made systems and the environment e g flows of natural resources and or pollutants furthermore model variants with excess degrees of freedom can be formulated to allow optimization and decision making to be integrated within the framework this book examines how input output models can be applied to sustainable industrial systems each major variant is discussed separately in a dedicated chapter and representative case studies and supporting lingo code are also included
