and how to see this is the perfect introduction to some of humanity's greatest minds and their landmark books this book is a study of the literary strategies which the first professional philosophers used to market their respective disciplines philosophers of fourth century bce athens developed the emerging genre of the protreptic literally turning or converting simply put protreptic discourse uses a rhetoric of conversion that urges a young person to adopt a specific philosophy in order to live a good life the author argues that the fourth century philosophers used protreptic discourses to market philosophical practices and to define and legitimize a new cultural institution the school of higher learning the first in western history specifically the book investigates how competing educators in the fourth century produced protreptic discourses by borrowing and transforming traditional and contemporary voices in the cultural marketplace they aimed to introduce and promote their new schools and define the new professionalized discipline of philosophy while scholars have typically examined the discourses and practices of plato isocrates and aristotle in isolation from one another this study rather combines philosophy narratology genre theory and new historicism to focus on the discursive interaction between the three philosophers each incorporates the discourse of his competitors into his protreptics appropriating and transforming the discourses of their competition these intellectuals created literary texts that introduced their respective disciplines to potential students excerpt from an introduction to philosophy as there cannot be said to be a beaten path in philosophy and as introductions to the subject differ widely from one another it is proper that i
