hinds takes offers a fresh perspective on the social political and  
economic disturbances now affecting our world this book looks at those  
disturbances not as separate problems but rather as the coherent  
symptoms of a deep technological revolution that is changing the shape  
of society on the scale of the industrial revolution the connectivity  
revolution the basis of the new economy analyzing the resistance to  
change that erupted violently in response to that last major economic  
upheaval hinds shows how communism nazism and fundamentalism owe their  
triumphs not to the prevalence of poverty or oppression but to the  
rigidity of societies threatened by profound social changes prompted  
by rapid technological progress demonstrating that their rigidity was  
caused by the same kind of state intervention in the economy that is  
now being proposed to stop globalization he argues persuasively that  
only a horizontal flexible society can smoothly manage change in such  
a way that the pain of transformation and therefore the risk of giving  
birth to new varieties of destructive regimes is minimized
