this is the first volume to consider the popular literary category of early readers books written and designed for children who are just beginning to read independently it argues that early readers deserve more scholarly attention and careful thought because they are for many younger readers their first opportunity to engage with a work of literature on their own to feel a sense of mastery over a text and to experience pleasure from the act of reading independently using interdisciplinary approaches that draw upon and synthesize research being done in education child psychology sociology cultural studies and children s literature

the volume visits early readers from a variety of angles as teaching tools as cultural artifacts that shape cultural and individual subjectivity as mass produced products sold to a niche market of parents educators and young children and as aesthetic objects works of literature and art with specific conventions examining the reasons such books are so popular with young readers as well as the reasons that some adults challenge and censor them the volume considers the ways early readers contribute to the construction of younger children as readers thinkers consumers and as gendered raced classed subjects it also addresses children s texts that have been translated and sold around the globe examining them as part of an increasingly transnational children s media culture that may add to or supplant regional ethnic and national children s literatures and cultures while this collection focuses mostly on books written in english and often aimed at children living in the us it is important to acknowledge that these early readers are a major us cultural export influencing the reading habits and development of children across the globe

indonesia suffered an explosion of religious violence ethnic violence separatist violence terrorism and violence by criminal gangs

the security forces and militias in the late 1990s and early 2000s by 2002 indonesia had the worst terrorism problem of any nation all these forms of violence have now fallen dramatically how was this accomplished what drove the rise and the fall of violence anomie theory is deployed to explain these developments sudden institutional change at the time of the asian financial crisis and the fall of president suharto meant the rules of the game were up for grabs valerie braithwaite s motivational postures theory is used to explain the gaming of the rules and the disengagement from authority that occurred in that era ultimately resistance to suharto laid a foundation for commitment to a revised more democratic institutional order the peacebuilding that occurred was not based on the high integrity truth seeking and reconciliation that was the normative preference of these authors rather it was based on non truth sometimes lies and yet substantial reconciliation this poses a challenge to restorative justice theories of peacebuilding
