controlling factor for these powers lies within you and i fear and faith the force of destruction vs the power of creation including a powerful look into two of the most influential men of all time martin luther king's 1965 address from montgomery alabama the center of much racial conflict at the time and the location of the well publicized bus boycott a decade earlier is often considered by historians to be the culmination of the civil rights era in american history in his momentous speech king declared that segregation was 'on its deathbed' and that the movement had already achieved significant milestones although the civil rights movement had won many battles in the struggle for racial equality by the mid 1960s including legislation to guarantee black voting rights and to desegregate public accommodations the fight to implement the new laws was just starting in reality king's speech in montgomery represented a new beginning rather than a conclusion to the movement a fact that king acknowledged in the address after the dream black and white southerners since 1965 begins where many histories of the civil rights movement end with king's triumphant march from the iconic battleground of selma to montgomery timothy j minchin and john salmond focus on events in the south following the passage of the 1964 civil rights act and the 1965 voting rights act after the dream examines the social economic and political implications of these laws in the decades following their passage discussing the empowerment of black southerners white resistance accommodation and acceptance and the nation's political will the book also provides a fascinating history of the often overlooked period of race relations

frequently drawn to saints martyrs and questions of religion why has joan of arc fascinated some of the most important thinkers of the twentieth century in a book that faces crucial issues in both critical and feminist inquiry francoise meltzer uses the story of joan as a guide for reading the postmodern nostalgia for a body that is intact and transparent she argues that critics who place excessive emphasis on opposition and difference remain blind to their nostalgia for the pre cartesian idea that the body and mind are the same engaging a number of theorists and alternating between joan s historical and cultural context meltzer also explores the ways in which postmodern thinkers question subjectivity she argues that the way masculine subjects imagine joan betrays their fear of death and necessitates the role of women as cultural others enigmatic mysterious dark and impossible as such joan serves as a useful model of the limits and risks of subjectivity for meltzer she is both the first modern and the last medieval figure from the ecclesial jury that burned her to the theorists of today who deny their attraction to the supernatural the philosophical assumptions that inform joan s story as meltzer ultimately shows have changed very little fear classic reprint and fear by angelo mosso are insightful explorations into the psychology of fear utilizing both anecdotal is a question that has bedeviled the study of the mind for more than a century yet it is low on the research agenda of psychiatry basic science issues such as neuroimaging neurochemistry and genetics carry the day instead there is nothing wrong with basic science research but before studying the role of brain circuits or cerebral chemistry shouldn't we be able to specify how the various diseases present clinically catatonia is a human behavioral syndrome that for almost a century was buried in the poorly designated psychiatric concept of schizophrenia its symptoms are well known and some of them are serious catatonic patients may die as their temperatures accelerate they become dehydrated because they refuse to drink they risk inanition because they refuse to eat or move autistic children with catatonia may hit themselves repeatedly in the head we don't really know what catatonia is in the sense that we know what pneumonia is but we can identify it and it is eminently treatable clinicians can make these patients better on a reliable basis there are few other disease entities in psychiatry of which this is true so why has there been so little psychiatric interest in catatonia why is it simply not on the radar of most clinicians catatonia actually occurs in a number of other medical illnesses as well but it is certainly not on the radar of most internists or emergency physicians in the madness of fear drs shorter and fink seek to understand why this vast field of ignorance exists in the history of catatonia they see a remarkable story about how medicine flounders and then seems to find its way and it may help doctors and the public to recognize catatonia as one of the core illnesses in psychiatry god family work church responsibilities volunteer work what are the real disease entities in psychiatry this is a question that has bedeviled the study of the mind for more than a century yet it is low on the research agenda of psychiatry basic science issues such as neuroimaging neurochemistry and genetics carry the day instead there is nothing wrong with basic science research but before studying the role of brain circuits or cerebral chemistry shouldn't we be able to specify how the various diseases present clinically catatonia is a human behavioral syndrome that for almost a century was buried in the poorly designated psychiatric concept of schizophrenia its symptoms are well known and some of them are serious catatonic patients may die as their temperatures accelerate they become dehydrated because they refuse to drink they risk inanition because they refuse to eat or move autistic children with catatonia may hit themselves repeatedly in the head we don't really know what catatonia is in the sense that we know what pneumonia is but we can identify it and it is eminently treatable clinicians can make these patients better on a reliable basis there are few other disease entities in psychiatry of which this is true so why has there been so little psychiatric interest in catatonia why is it simply not on the radar of most clinicians catatonia actually occurs in a number of other medical illnesses as well but it is certainly not on the radar of most internists or emergency physicians in the madness of fear Drs Shorter and Fink seek to understand why this vast field of ignorance exists in the history of catatonia they see a remarkable story about how medicine flounders and then seems to find its way and it may help doctors and the public to recognize catatonia as one of the core illnesses in psychiatry
