Chorister's manual 1968 this early work by c whitaker wilson is both expensive and hard to find in its first edition it details the qualities and varieties of classical music and contains chapters on concertos the symphony the overture and much more this fascinating work is thoroughly recommended for inclusion on the bookshelf of all with an interest in composers and the history of classical music many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce we are republishing these classic works in affordable high quality modern editions using the original text and artwork

The Musical Times and Singing-class Circular 1880 barbara owen has prepared the first work to present in a single volume the registrational practices of organists from 1550 to 1800 along with the many stoplists and discussions of performance traditions the book discusses the religious and political context for each period are region and how these affected the work of composers and organ builders full promo description barbara owen has compiled and intelligently analyzed all of the available information on registration practices from the late renaissance to classical times into a coherently organized and cogently presented text the depth of research the thoroughness of approach and the practical nature of the material make this text unique at the present time christopher young indiana university it is rare to find a book that combines such careful scholarship with a practical focus that makes it accessible to performing musicians as well as research specialists sharon l gorman notes here is the first single book to present registrational practices of organists from c 1550 to 1800 each of the four parts of the book the renaissance and the early high and late baroque starts with a brief description of the political and religious climate of the period

and the way it affected organ building and the music composed at the time within each historical period Owen provides for each country a list of the active composers and information about representative organs including their locations dates builders and stoplists she then discusses the registrational practices in each area in relation to contemporary musical styles and forms referring to sources such as scores and treatises in light of the historical evidence Owen advises organists on adapting the earlier principles and practices to modern instruments in order to perform baroque organ works in a style appropriate to their period and region with its comprehensive geographic historical and musicological approach the registration of baroque organ music will long remain an invaluable source book for teachers and performers

Musical Times and Singing Class Circular 1880 the role of design in the formation of the silicon valley ecosystem of innovation California's silicon valley is home to the greatest concentration of designers in the world corporate design offices at flagship technology companies and volunteers at nonprofit NGOs global design consultancies and boutique studios research laboratories and academic design programs together they form the interconnected network that is silicon valley Apple products are famously designed in California but as Barry Katz shows in this first ever extensively illustrated history the role of design in silicon valley began decades before Steve Jobs and Steve Wozniak dreamed up Apple in a garage offering a thoroughly original view of the subject Katz tells how design helped transform silicon valley into the most powerful engine of innovation in the world from Hewlett Packard and Ampex in the 1950s to Google and Facebook today design has provided the bridge between research and development art and engineering technical performance and human behavior Katz traces the origins of all of the leading consultancies including IDEO Frog and Lunar and shows the process by which some of the world's most influential companies came to place design at the center

of their business strategies at the same time universities foundations and even governments have learned to apply design thinking to their missions drawing on unprecedented access to a vast array of primary sources and interviews with nearly every influential design leader including douglas engelbart steve jobs and don norman katz reveals design to be the missing link in silicon valley s ecosystem of innovation
