Endodontic Therapy 1976 utilizing international perspectives this unprecedented collection of essays from leading authorities on refugee studies spotlights the realities and challenges of the global refugee population with increasing changes in the socio political climate of the world as well as with the rising numbers of natural disasters people of all ethnicities and nationalities are frequently forced from their homes and their homelands while there is a substantial body of work that addresses refugee policies post traumatic stress disorder and other specific issues there have been few attempts to understand refugee health or comprehend overall refugee adaptation until now this is the first work to address refugee issues worldwide addressing the psychological health human rights political public policy law economic social and personal aspects of this universal problem refugees worldwide also includes examples of first person refugee stories from around the world eye opening information not available in any other work drawing on the expertise of myriad international researchers theoreticians and practitioners from representative nations around the world this four volume set effectively speaks to a number of refugee issues from a truly global perspective

A History of Wine as Therapy 1963-01-01 eliminating race based mental health disparities offers concrete guidelines and evidence based best practices for addressing racial inequities and biases in clinical care perhaps there is no subject more challenging than the intricacies of race and racism in american culture more and more it has become clear that simply teaching facts about cultural differences between racial and ethnic groups is not adequate to achieve cultural competence in clinical care one must also consider less visible constructs including implicit bias stereotypes white privilege intersectionality and microaggressions as potent drivers of behaviors and attitudes in this edited volume three leading experts in race mental health and contextual behavior science explore the urgent problem of racial inequities and biases which often prevent people of color from seeking mental health services leading to poor outcomes if and when they do receive treatment in this much needed resource you ll find evidence based recommendations for addressing problems at multiple levels and best practices for compassionately and effectively helping clients across a range of cultural groups and settings as more and more people gain access to services that have historically been unavailable to them guidelines for cultural competence in clinical care are needed eliminating race based mental health disparities offers a comprehensive road map to help you address racial health disparities and improve treatment outcomes in your practice

Refugees Worldwide 2012-08-03 wine has always been a part of popular medicine bacchic medicine analyses the historical role of wine in the treatment of disease and preservation of health and also discusses the contemporary debate over the role of alcohol and wine in preventive medicine

U.S. Navy Medicine 1980 first multi year cumulation covers six years 1965 70

Eliminating Race-Based Mental Health Disparities 2019-11-01 the need for quality standards and rules of conduct concerning all aspects of the activities of psychology has long been acknowledged in particular over the last few years there has been a growing awareness of the need for and the advantage of

internationally recognized ethical standards particularly concerning research and practice and the well being of individuals and societies with this need in mind this volume provides the most comprehensive assembly of facts and visions across the entire field of psychological ethics that one could imagine the oxford handbook of international psychological ethics is the state of the art source for information on psychological ethics worldwide and offers an inclusive international review of contemporary and emerging ethical issues within the profession and science of psychology there is no comparable book on the market notwithstanding the importance and timeliness of the topics to be covered these include a concise history of ethical standards of psychology cutting edge developments and challenges in international psychological ethics such as the search for universal ethical standards ethical issues when working cross nationally with immigrants and refugees and ethical responses to security risks ethical developments and issues within specific geographical regions research utilizing the new media with its broad scope and perspective informed by a synthesis of international scholarship and practice this handbook will inform readers from around the world of existing and emerging issues and trends that confront psychological ethics

Navy Medicine 1980 from braille without borders and unite for sight to geekcorps and peaceworks humanitarian groups are working worldwide largely in undeveloped countries to better the lives of the residents whether they are empowering people with schools for the blind prosthetic limbs the devices to understand and use technology or the information to work for civil peace the men and women of these agencies offer tremendous talent to their causes great dedication and sometimes even risk their lives to complete their missions working in war or civil war zones humanitarians with nonprofits non governmental agencies and university connected centers and foundations have been injured kidnapped or killed now terrorist events and war crimes are more and more often bringing these self sacrificing workers into the national spotlight by media headlines their work is doubtless remarkable and so too are the stories of how they developed including the defining moments when their founders felt they could no longer stand by and do nothing in this set of books founders and top officials from humanitarian organizations established in the last 50 years spotlight how and why they began their organizations what their greatest victories and challenges have been and how they run the organizations down to where they get their funding and how they spend it to grow the group and its efforts led by chris e stout named humanitarian of the year by the american psychological association the contributors here come from across training disciplines including psychology medicine technology science politics social work and business stout who has worked in latin american terrorist zones in vietnam and along the amazon in ecuador with flying doctors of america has chosen to feature a sample of humanitarian groups across four primary areas medicine environment education and social justice he also concentrates on what he calls guerilla humanitarians those who step into unsafe or unhealthy conditions despite the dangers there is also a concentration on those that have been very successful with on the ground guerilla innovations without a lot of bureaucracy or baloney above all they are rebels with a cause whose actions speak louder than mere words stout explains they have all felt

a moral duty to serve as vectors of change in addition to being psychologically insightful these volumes hold invaluable practical information

United States Navy Medical Newsletter 1980 daniel l schacter chairman of harvard university s psychology department is internationally recognised as one of the world s authorities on memory explains that just as the seven deadly sins the seven memory sins appear routinely in everyday life and why it is a good thing that they happen and surprisingly vital to a keen mind the author explains how transience reflects a weakening of memory over time how absent mindedness occurs when failures of attention sabotage memory and how blocking happens when we can t retrieve a name we know well three other sins involve distorted memories misattribution assigning a memory to the wrong source suggestibility implanting false memories and bias rewriting the past based on present beliefs the seventh sin persistence concerns intrusive recollections that we cannot forget even when we wish we could daniel schacter illustrates decades of research into memory lapses with compelling and often bizarre examples for example the violinist who placed a priceless stradivarius on top of his car before driving off and the national memory champion who was plagued by absentmindedness this book also explores recent research such as the imaging of the brain that actually shows memories being formed together the stories and scientific findings examined in how the mind forgets and remembers will reassure everyone from twenty somethings who find their lives too busy to those in their fifties and sixties who are worried about early alzheimers beautifully written this original book provides a fascinating new look at our brains and what we more generally think of as our minds

Bacchic Medicine 2016-09-27 wine science principles and applications fifth edition delivers in depth information and expertise in a single science focused volume including all the complexities and nuances of creating a quality wine product from variety to the chemistry that transforms grape to fruit to wine the book presents sections on the most important information regarding wine laws authentication the latest technology used in wine production and expert insights into the sensory appreciation of wine and its implications in health this book is ideal for anyone seeking to understand the science that produces quality wines of every type presents thorough explanations of viticulture and winemaking principles from grape to taste bud addresses historical developments in wine production notably sparkling wines provides techniques in grapevine breeding notably crispr compares production methods in a framework that provides insights into the advantages and disadvantages of each

Neighbors at War: Anthropological Perspectives on Yugoslav Ethnicity, Culture, and History 2012-07-25 in this widely used course text and practitioner resource from Walsh provides a state of the art framework for understanding resilience in families and how to foster it illuminating the complex interplay of biopsychosocial influences in risk and resilience she identifies key transactional processes that enable struggling families to grow stronger and more resourceful case illustrations demonstrate Walsh's collaborative approach with diverse families facing a wide range of crisis situations and chronic multistress challenges the book features practice principles tools and guidelines as well as programmatic applications new to this edition incorporates the latest practice advances and resilience research chapter on assessment tools and strategies chapter on disruptive transitions across the family life cycle expanded coverage of war related and collective trauma

The Oxford Handbook of International Psychological Ethics 2008-11-30 in this widely used course text and practitioner resource from Walsh provides a state of the art framework for understanding resilience in families and how to foster it illuminating the complex interplay of biopsychosocial influences in risk and resilience she identifies key transactional processes that enable struggling families to grow stronger and more resourceful case illustrations demonstrate Walsh's collaborative approach with diverse families facing a wide range of crisis situations and chronic multistress challenges the book features practice principles tools and guidelines as well as programmatic applications new to this edition incorporates the latest practice advances and resilience research chapter on assessment tools and strategies chapter on disruptive transitions across the family life cycle expanded coverage of war related and collective trauma

The New Humanitarians 2011-12-01 this timely much needed resource identifies gaps in our understanding of the effects of exposure to violence on children and sets a direction for future research to support interventions and violence prevention

How the Mind Forgets and Remembers 1972 bridges community practice and clinical practice by collecting 33 chapters from social workers psychologists and psychiatrists that outline and illustrate the state of the art designed specifically for clinicians making the transition to community based work provided by publisher

Endodontic Therapy 2009-05-01 hundreds of thousands of children are forced or legally recruited combatants in no fewer than 70 warring parties across the

world in addition to these child soldiers thousands of youth voluntarily participate in politically related conflict why how and in what capacities are such large numbers of teenagers involved in war and how are they affected adolescents and war brings together world experts in an evidence based volume to thoroughly understand and document the intricacies of youth who have had substantial involvement in political violence contributors argue that the assumption that youth are automatically debilitated by the violence they experience is much too simplistic effective care for youth must include an awareness of their motives and beliefs the roles they played in the conflict their relationships with others and the opportunities available to them after their experiences with war the book suggests that the meaning youth make of a conflict may protect them from mental harm for example palestinian teens who were actively engaged in the first intifada have fared better than bosnian teens who were virtual sitting ducks to the sniper and grenade launches of the hidden forces during the siege of sarajevo covering youth involvement in conflicts in afghanistan angola sierra leone mozambique northern ireland israel palestine and bosnia the volume will be of interest to psychologists sociologists and political scientists and should be adopted for courses in social psychology crisis intervention and international conflict
