in one economics many recipes leading economist dani rodrik argues that neither globalizers nor antiglobalizers have got it right while economic globalization can be a boon for countries that are trying to dig out of poverty success usually requires following policies that are tailored to local

economic and political realities rather than obeying the dictates of the international globalization establishment a definitive statement of rodrik s original and influential perspective on economic growth and globalization one economics many recipes shows how successful countries craft their own unique strategies and what other countries can learn from them to most proglobalizers globalization is a source of economic salvation for developing nations and to fully benefit from it nations must follow a universal set of rules designed by organizations such as the world bank the international monetary fund and the world trade organization and enforced by international investors and capital markets but to most antiglobalizers such global rules spell nothing but trouble and the more poor nations shield themselves from them the better off they are rodrik rejects the simplifications of both sides showing that poor countries get rich not by copying what washington technocrats preach or what others have done but by overcoming their own highly specific constraints and far from conflicting with economic science this is exactly what good economics teaches

a leading authority on economic globalization argues that industrialization in the core countries of northwest europe and its overseas settlements combined with a worldwide revolution in transportation to produce deindustrialization and an antiglobal backlash in industrially lagging poorer countries in globalization and the poor periphery before 1950 jeffrey williamson examines globalization through the lens of both the economist and the historian analyzing its economic impact on industrially lagging poor countries in the nineteenth and early twentieth centuries williamson argues that industrialization in the core countries of northwest europe and their overseas settlements combined with a worldwide revolution in transportation created an antiglobal backlash in the periphery the poorer countries of eastern and southern europe the middle east africa asia and latin america during the first global century from about 1820 to 1913 and the antiglobal autarkic interwar period from 1914 to 1940 new methods of transportation integrated world commodity markets and caused a boom in trade between the core and the periphery rapid productivity growth which lowered the price of manufactured goods led to a soaring demand in the core countries for raw materials supplied by the periphery when the boom turned into bust after almost a century and a half the gap in living standards between the core and the periphery was even wider than it had been at the beginning of the cycle the periphery argues williamson obeyed the laws of motion of the international economy synthesizing and summarizing fifteen years of williamson s pioneering work on globalization the book documents these laws of motion in the periphery assesses their distribution and growth consequences and examines the response of trade policy in these regions

globalization and national economic welfare makes an original powerful and timely contribution to a highly topical issue that affects all countries by showing why globalization is unsustainable in the long term without fundamental changes in existing attitudes and institutions the book analyzes one of the most important aspects of economic policy at the beginning of the twenty first century how to overcome the growing threat that inequalities created by globalization pose both nationally and internationally to economic progress and political stability economic problems from corporate fraud and bankruptcies to the high social costs of the adjustments that globalization imposes on individual countries are becoming increasingly international and consequently demand action at the supranational level yet the effective institutional framework for dealing with these problems remains national in contrast to the neo liberal approach the author argues that the state as the only form of organization that has the power to reconcile conflicts of interest nationally and internationally has a critical role to play in ensuring that globalization does not end in failure and war
