the traditional approach that dave o sullivan was taught in university was to look at the site of pain perform some mobilisations if appropriate and then load the area usually with eccentrics but what happens when you use this approach with real life patients dave noticed some patients responded and got better slowly with time but he also noticed others didn't respond as the textbooks would have us believe but what if there was another way to look at the human body that considered the whole person in front of you and not just the site of pain this book is that alternative and dave o sullivan the current england rugby league physiotherapist outlines his 12 step tried and tested in the professional sport return to play discharge method that he uses to get consistent results with both professional athletes and his own private practice patients this method will allow you to ethically rapidly raise your retention rates referrals revenue and reputation so you can become the go to physio in your town by getting consistent long lasting results that have a meaningful impact on your patients lives
