MySQL RDBMS

2019-03-20

mysql postgresql

MySQL

2015-07-29

MySQL is a relational database management system (RDBMS) that uses Structured Query Language (SQL) to manage data. It is widely used for web applications and data storage. MySQL is known for its speed and reliability, and it is supported by a large community of users and developers.

C 2

2018-06-01

The C programming language was developed in 1973 by Dennis Ritchie at Bell Labs. It is a general-purpose, procedural, imperative programming language that supports structured programming, data abstraction, and low-level memory manipulation. C is the foundation for many other programming languages, including C++, Java, and JavaScript. The C standard library provides a set of functions for performing common tasks, such as file I/O, string manipulation, and memory management.

FLY

2016-09

FLY is a lightweight, fast, and easy-to-use web framework for PHP. It is designed to be a drop-in replacement for Laravel, but with a much simpler and more intuitive API. FLY is built on top of the Symfony framework and provides a set of tools and libraries for building web applications.
