minibooks walk you through all aspects of using your iphone meet the
 iphone stocking the iphone with itunes apps and add ons communications
 central making your iphone your personal assistant and letting iphone
 entertain you gets you up to speed with the latest iphone features
 including all the new features in the iwork apps for iphone explains how
 to make phone and facetime video calls exchange e mails texts and
 multimedia messages surf the web find the latest apps e books music and
 games shoot and share videos sync with icloud and much more helps you
 keep your iphone safe and happy as well as troubleshoot and fix common
 problems find a wealth of great ways to use your iphone at home at work
 or on the go with this fun and easy guide a comprehensive review of
 contemporary research in the vision sciences reflecting the rapid
 advances of recent years visual science is the model system for
 neuroscience its findings relevant to all other areas this essential
 reference to contemporary visual neuroscience covers the extraordinary
 range of the field today from molecules and cell assemblies to systems
 and therapies it provides a state of the art companion to the earlier
 book the visual neurosciences mit press 2003 this volume covers the
 dramatic advances made in the last decade offering new topics new
 authors and new chapters the new visual neurosciences assembles
 groundbreaking research written by international authorities many of the
 112 chapters treat seminal topics not included in the earlier book these
 new topics include retinal feature detection cortical connectomics new
 approaches to mid level vision and spatiotemporal perception the latest
 understanding of how multimodal integration contributes to visual
 perception new theoretical work on the role of neural oscillations in
 information processing and new molecular and genetic techniques for
 understanding visual system development an entirely new section covers
 invertebrate vision reflecting the importance of this research in
 understanding fundamental principles of visual processing another new
 section treats translational visual neuroscience covering recent
 progress in novel treatment modalities for optic nerve disorders macular
 degeneration and retinal cell replacement the new visual neurosciences
 is an indispensable reference for students teachers researchers
 clinicians and anyone interested in contemporary neuroscience associate
 editors marie burns joy geng mark goldman james handa andrew ishida
 george r mangun kimberley mcallister bruno olshausen gregg recanzone
 mandyam srinivasan w martin usrey michael webster david whitney sections
 retinal mechanisms and processes organization of visual pathways
 subcortical processing processing in primary visual cortex brightness
 and color pattern surface and shape objects and scenes time motion and
 depth eye movements cortical mechanisms of attention cognition and
 multimodal integration invertebrate vision theoretical perspectives
 molecular and developmental processes translational visual neuroscience
