excerpt from a manual of essay writing this little book aims at giving more systematic guidance in the art of essay writing than is usually attempted many teachers i am aware are sceptical as to the value of such an attempt they feel the importance of spontaneity and individuality and they are rightly of opinion that an essay cannot possess these qualities if it proceeds rigidly on lines laid down for the writer by somebody else on the other hand it must be matter of common experience that much of the time spent on the writing of essays is fruitless because it is aimless and it seems to me that without introducing any rules that would fetter individuality something may be done in several directions to make the practice of essay writing both easier

and more fruitful than it is at present first i believe that a good many hints on style and treatment may profitably be given without attempting to lay down arbitrary rules one may say that there are certain positive qualities which every good essay ought to possess and these may be usefully indicated in particular in every essay which undertakes to prove anything the argument ought to be clear orderly and logical and hints may be given on the construction and setting forth of a consecutive argument about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
