this is a timely volume in view of the considerable interest currently shown in the preservation of our cultural heritage and the extensive and growing literature on the subject unfortunately the latter is to be found in a wide variety of published sources some aimed at a very specific readership and therefore not all that accessible to those who need this resource the present volume draws together a spectrum of biodeterioration work from across the world to provide an overview of the materials examined and the methodologies employed to elucidate the nature of the problems as well as an extensive and current bibliographical resource on lichen biodeterioration biodeterioration of historical and culturally important stone substrata is a complex problem to be addressed easy risk free solutions are simply not available to be dealt with by other than a wide range of expertise successful resolution of this issue will inevitably require a multidisciplinary effort where biologists work in close cooperation with ecologists geologists geochemists crystallographers cultural property conservators archaeologists anthropologists and historians in order to recommend the most effective management scheme the advantage of this approach is obvious multidisciplinary management teams with good leadership can ask more appropriate questions while developing much more thoughtful and informed decisions

a survey of how highland society organised its farming communities exploited its resource base and interacted with its environment from prehistory to 1914 there has long been a view that the farming communities to be found in the highlands prior to the clearances were archaic forms the way in which they were organised the way in which they farmed the land and the technologies which they employed were all seen as taking shape during prehistory and then surviving relatively unchanged such a view first emerged first during the late nineteenth century and found repeated expression through a number of studies thereafter however its entrenchment in the literature was despite the fact that many ongoing studies have highlighted aspects of how the region changed from prehistory onwards this study confronts this conflict over the question of continuity discontinuity debate through an analysis of the cultural landscape starting with prehistory it examines the way in which the farming community was organised its institutional basis its strategies of resource use and how these impacted on landscape and the way in which it interacted with the challenges of its environment it carries these themes forward through the medieval and early modern periods rounding off the discussion with a substantive review of the gradual spread of commercial sheep farming and the emergence of the crofting townships over the eighteenth and nineteenth centuries throughout it draws out what changed and what was carried forward from each period so that we have a better understanding of the region's dynamic history as opposed to the ahistorical views that inevitably flow from a stress on cultural inertia key features the book provides a one stop text for the long term history of the highland countryside one nuanced in ways that address topical themes like landscape and environmental change it synthesises a great deal of work on the highland farming community during the medieval and early modern periods in terms of its institutional organisation resource exploitation landscape impacts and interactions with environment so as to produce an overall review from prehistory down to 1914 introduces new ideas and arguments that have not been treated or previewed in other published work such as in chapter 6 provides the most substantive review of the continuity discontinuity debate in the highland landscape currently available

this book is made up of contributions dealing with heritage stones from different countries around the world the stones are described as well as their use in vernacular and contemporaneous architecture heritage stones are those stones that have special significance in human culture examples include some very important stones that have been either neglected because they are no longer extracted or stones that have great significance in commercial terms but knowledge of their national and or international

heritage has not been well documented in this collection of articles we have tried to spread awareness of architectural heritage around the world the natural stones that have been used in its construction and the need to preserve historical quarries that once provided the source of such stones historical quarries are linked to regional culture and tradition because of the specific technical and aesthetical characteristics of heritage stones which have lasted for centuries these historical quarries should be preserved to be able to use the stones for the proper restoration of monuments and historical buildings to avoid negative actions that can be observed in many places in the restoration of buildings which are some times part of world heritage sites the final intention of this book is to continuously grow the interest on this fascinating subject of heritage stones

this first full account of amelia stone quinton 1833 1926 and the organization she cofounded the women s national indian association wnica offers a nuanced insight into the intersection of gender race religion and politics in our shared history author valerie sherer mathes shows how quinton like helen hunt jackson was a true force for reform and progress who was nonetheless constrained by the assimilationist convictions of her time the wnica which quinton cofounded with mary lucinda bonney in 1879 was organized expressly to press for a more just protective and fostering indian policy but also to promote the assimilation of the indian through christianization and civilization charismatic and indefatigable quinton garnered support for the wnica s work by creating strong working relationships with leaders of the main reform groups successive commissioners of indian affairs secretaries of the interior and prominent congressmen the wnica s powerful network of friends formed a hybrid organization religious in its missionary society origins but also political using its powers to petition and actively address public opinion mathes follows the organization as it evolved from its initial focus on evangelizing indian women and promoting victorian society s ideals of true womanhood through its return to its missionary roots establishing over sixty missionary stations supporting physicians and teachers and building houses chapels schools and hospitals with reference to quinton s voluminous writings including her letters speeches and newspaper articles as well as to wnica literature mathes draws a complex picture of an organization that at times ignored traditional indian practices and denied individual agency even as it provided dispossessed and impoverished people with health care and adequate housing and at the center of this picture we find quinton a woman and reformer of her time

a new collection of short stories by a master of the form with a common focus on the turmoils of romantic love ready aim on command the firing squad aims at the man backed against a full length mirror the mirror once hung in a bedroom but now it s

cracked and propped against a dumpster in an alley the condemned man has refused the customary last cigarette but accepted as a hood the black slip that was carelessly tossed over a corner of the mirror's frame the slip still smells faintly of a familiar fragrance so begins *Tosca* the first in this vivid collection of Stuart Dybek's love stories operatically dramatic and intimately lyrical grittily urban and impressionistically natural the varied fictions in *Paper Lantern* all focus on the turmoil of love as only Dybek can portray it an execution triggers the recollection of a theatrical romance then a social worker falls for his own client and lovers part as giddily perhaps as hopelessly as a kid trying to hang on to a boisterous kite a flaming laboratory evokes a steamy midnight drive across terrain both familiar and strange and an eerily ringing phone becomes the telltale signature of a dark betrayal each story is marked with contagious desire spontaneous revelation and ultimately resigned courage as one woman whispers when she sets a notebook filled with her sketches drifting out to sea someone will find you some of Dybek's characters recur in these stories while others appear only briefly throughout they and we are confronted with vaguely familiar scents and images reminiscent of love but strangely disconcerting so that we might wonder whether we are looking in a mirror or down the barrel of a gun after the ragged discharge Dybek writes when the smoke has cleared who will be left standing and who will be shattered into shards *Paper Lantern* brims with the intoxicating elixirs known to every love-struck lovelorn heart and it marks the magnificent return of one of America's most important fiction writers at the height of his powers
