summary of pedagogy of the oppressed a comprehensive summary paulo freire's pedagogy of the oppressed is a combination of philosophical political and educational theories freire outlines a theory of oppression and the source of liberation in freire's view the key to liberation is the awakening of critical awareness and the thinking process in the individual this happens through a new type of education one which creates a partnership between the teacher and the student empowering the student to enter into a dialogue and begin the process of humanization through thought and its correlative action freire begins his book with a preface which introduces the idea of developing a critical consciousness in the oppressed freire introduces the problem of the fear of freedom in the oppressed which are affected by being submerged in a situation of oppression oppressed people must see outside themselves understand their situation and begin to think about their world this happens through dialogue in education freire makes it clear that his perspective is

radical and that to agree with his theories the reader must embrace change freire relates critical consciousness and the resulting synthesis of thought and action as a way to reclaim humanity to become humanized this freire contends is a fundamental drive of humanity while oppression is dehumanizing both for the oppressed and for the oppressors freire states that only the oppressed can save themselves and the oppressors from oppression and liberation must come from within the oppressed to be continued here is a preview of what you will get a full book summary an analysis fun quizzes quiz answers etc get a copy of this summary and learn about the book
