**AdS/CFT, (Super-)Virasoro, Affine (Super-)
Algebras** 2019-04-01 the de gruyter studies in
mathematical physics are devoted to the publication of
monographs and high level texts in mathematical
physics they cover topics and methods in fields of
current interest with an emphasis on didactical
presentation the series will enable readers to
understand apply and develop further with sufficient
rigor mathematical methods to given problems in
physics for this reason works with a few authors are
preferred over edited volumes the works in this series
are aimed at advanced students and researchers in
mathematical and theoretical physics they can also
serve as secondary reading for lectures and seminars
at advanced levels

Mathematical Models of Convection 2020-08-24
the revised edition gives a comprehensive
mathematical and physical presentation of fluid flows
in non classical models of convection relevant in
nature as well as in industry after the concise coverage
of fluid dynamics and heat transfer theory it discusses
recent research this monograph provides the
theoretical foundation on a topic relevant to
metallurgy ecology meteorology geo and astrophysics
aerospace industry chemistry crystal physics and
many other fields

Hamiltonian Perturbation Solutions for Spacecraft Orbit
Prediction 2021-05-10 analytical solutions to the
orbital motion of celestial objects have been nowadays
mostly replaced by numerical solutions but they are
still irreplaceable whenever speed is to be preferred to
accuracy or to simplify a dynamical model in this book
the most common orbital perturbations problems are

discussed according to the lie transforms method which is the de facto standard in analytical orbital motion calculations

Wilson Lines in Quantum Field Theory 2019-12-02

the objective of this book is to get the reader acquainted with theoretical and mathematical foundations of the concept of wilson loops in the context of modern quantum field theory it offers an introduction to calculations with wilson lines and shows the recent development of the subject in different important areas of research within the historical context

Nonconservative Stability Problems of Modern Physics

2021-03-08 this updated revision gives a complete and topical overview on nonconservative stability which is essential for many areas of science and technology ranging from particles trapping in optical tweezers and dynamics of subcellular structures to dissipative and radiative instabilities in fluid mechanics astrophysics and celestial mechanics the author presents relevant mathematical concepts as well as rigorous stability results and numerous classical and contemporary examples from non conservative mechanics and non hermitian physics new coverage of ponderomotive magnetism experimental detection of ziegler s destabilization phenomenon and theory of double diffusive instabilities in magnetohydrodynamics

Geophysical Modelling of the Polar Motion

2020-10-26 polar motion is an important geophysical process and difficult to understand given the various parameters involved but it is of key importance to our

climate and climate change understanding and modeling also has implications on key technologies such as space geodesy and satellite navigation additionally long term polar motion has close links to decadal climate change and ice cap development it also reflects the global circulation in the hydro atmospheric layers and the internal properties of the earth therefore the topic is of primary interest for geophysics as well as climatology

Stories in Midwifery - epub 2021-02-01 stories in midwifery 2nd edition presents an insightful collection of personal stories as told by a range of women midwives students health professionals and family members this unique resource offers midwifery students and practicing midwives an extraordinary perspective on a range of topics related to birthing and midwifery including continuity of care perinatal mental health complex pregnancies homebirth and assisted reproductive techniques among others available as a print or ebook this valuable resource builds empathy and understanding and provides examples of innovative approaches to woman centred care with a focus on reflection inquiry and action the teaching and learning strategies assist in developing skills attitudes and mindfulness for working in partnership with women in various settings including the home community hospitals clinics and birth centres most importantly stories in midwifery provides a much needed consumer voice for women their families and their midwives including 18 chapters each presenting a variety of stories from women midwives and families

around a range of topics related to birthing and midwifery 24 video stories embedded in the ebook present personal accounts from a range of lived experiences reflection inquiry and action provide the framework for the teaching and learning strategies for each story aimed at undergraduate and postgraduate levels weblinks references and readings are included for further reading and research transcripts of all interviews are included in the back of the book an ebook included in all print purchases

2021-04 voici anatole il a peut être l'air d'un minimelon sur pattes mais il est en fait un hanneton rayé il sait faire plein de choses comme euh donner des gros câlins mais anatole rêve de plus il rêve d'avoir un superpouvoir c'est juste que le hanneton rayé ne semble avoir aucun talent spécial un roman graphique drôle et inspirant pour découvrir les incroyables capacités des insectes
Anatole le hanneton ne mord pas!

2024-05-01T00:00:00-04:00 jembedall is a Joomla component and plugin that you can purchase from goldengravel.eu something you can add to your website and start embedding videos, images, and more other features to your site. The role of the component is mainly to configure the data you are embedding using the plugin, but it also offers support for downloading files and generating ebooks. The package is easy to configure, and to work with some features, you have to be configured. There is a configuration section just for that in the backend in order to be embedded and used properly in the frontend. Other features are integrated, and you just use them as they are, even so you may set some details right using the CSS attached to the predefined or user-defined strings used for embed code on your Joomla site. Purchase it and download the package for your Joomla version, then install it in order to have a powerful tool to embed videos from YouTube.

google vimeo metacafe veoh dailymotion redtube and others documents images and google forms used for quiz you can also embed facebook pages plugins images and videos community builder advanced searches prezi and scribd documents starting with the 1.3 version you can configure and embed any number of conditional forms and you can configure the open graph protocol and twitter cards data with all the data and thumbnails ready for facebook and all the sites the online manual and the generated ebook based on it are very detailed about each feature but you can always ask questions when you don't understand something or they are not clear enough the only condition to embed the videos and files is that they have to be online upload your videos on youtube or vimeo for example and upload your files the documents can be portable document format pdfs word docs power point spreadsheets and any other documents recognized by google docs on your server or google servers and embed them into your sites the path of the document does not have to be some on docs.google.com but that works fine it works as well they are on any other website but you have to enter the full path of the file you can define configure and embed any number of jquery images sliders into your site you can define and use any number of popups on your Joomla site you can embed google maps and direction into your site you can define and configure file packages they can contain any number of files the visitors can download for free or for money paypal payment included you can define configure and embed

community builder advanced searches this component works with any cb version since jembedall version 1 3 the search results can open in the same window in a different window or in a modal window beyond that you can give every user several powerful tools they can save the search forms and search results they can embed that saved search results as users lists they can use cb privacy a tool that restricts access to some fields or even the users on searches you can embed facebook pages posts videos and images depending on the facebook privacy in many cases all this have to be public for everyone to see but you can also embed some plugins facebook activity comments facepile likebox and recommendations starting with the 1 5 version you can generate and download e books based on your website content the paypal payment was modified and extended you can create shopping carts for files you want sell and the generated e books
