Waste Water Engineering 1998

this volume is one of the two which offer a comprehensive course in those parts of theory and practice of plane and geodetic surveying that are most commonly used by civil engineers the first volume covers in 24 chapters the most common surveying operations each topic introduced is thoroughly described the theory is rigorously developed and a large number of numerical examples are included to illustrate its application general statements of important principles and methods are almost invariably given by practical illustration apart from illustrations of old and conventional instruments emphasis has been placed on new or modern instruments both for ordinary as well as precise work a good deal of space has been given to instrumental adjustments with thorough discussion of geometrical principles in each case many new advanced problems have also been added which will prove useful for competitive examinations

Water Supply Engineering 1995

contents part 1 working stress method 1
introduction 2 theory of reinforced beams and
slabs 3 shear and bond 4 torsion 5 doubly
reinforced beams 6 t and l beams 7 design of beams
and slabs 8 design of stair cases 9 reinforced
brick and hollow tile roofs 10 two way slabs 11
circular slabs 12 flat slabs 13 axially loaded
columns 14 combined direct and bending stresses 15
continuous and isolated footings 16 combined

~~footings 17 pile foundations 18 retaining walls~~
part 11 water tanks 19 domes 20 beams curved in
plan 21 water tanks 1 simple cases 22 water tanks
11 circular intze tanks 23 water tanks 111
rectangular tanks 24 water tanks iv underground
tanks part 111 miscellaneous structures 25
reinforced concrete pipes 26 bunkers and silos 27
chimneys 28 portal frames 29 building frames part
iv concrete bridges 30 aqueducts and box culverts
31 concrete bridges part v limit state design 32
design concepts 33 singly reinforced section 34
doubly reinforced sections 35 t and l beams 36
shear bond and torsion 37 design of beams and
slabs 38 axially loaded columns 39 columns with
uniaxial and biaxial bending 40 design of stair
cases 41 two way slabs 42 circular slabs 43 yield
line theory and design of slabs 44 foundations
part iv prestressed concrete and miscellaneous
topics 45 prestressed concrete 46 shrinkage and
creep 47 form work 48 tests for cement and
concrete

Surveying Vol. I 2005

the book has been prepared in the form of a complete package that includes the experiments which have been written very carefully meeting the standard adopted procedures descriptive figures that aid the understanding discussion sections that intrigues the analytical rational thinking objective questions portion a wide reference list for detailed study the language has been used keeping in view the wide readership which includes students demonstrators lecturers field personnel

~~others the selection of the experiments has been~~
done very precisely incorporating the very
important ones from the subject

Irrigation and Water Power Engineering 1992

including dams engineering hydrology and fluid
power engineering for the student of b e b tech
civil engg institution of engineers india u p s c
exam practising engineers

Soil Mechanics and Foundations 2005

the first edition of this treatise on irrigation
engineering duly subsidised by national book trust
government of india published in 1984 was highly
acclaimed by the engineering teachers and taughts
and its revised edition appeared in 1990 the
dynamism inherent in the subject necessitated
drastic changes in the text prompted by
theoverwhelming response of irrigation and
agriculture engineering students and practising
engineers in the country and abroad duly
patronised by the publications shri ravindra kumar
gupta managing director s chand company ltd new
delhi

Comprehensive Rcc.Designs 2005-12

designed primarily as a textbook for the

(Download Only)

~~undergraduate students of civil and agricultural~~
engineering this comprehensive and well written text covers irrigation system and hydroelectric power development in lucid language the text is organized in two parts part i irrigation engineering deals with the methods of water distribution to crops water requirement of crops soil water relationship well irrigation and hydraulics of well canal irrigation and different theories of irrigation canal design part ii water power engineering offers the procedures of harnessing the hydropotential of river valleys to produce electricity it also discusses different types of dams surge tanks turbines draft tubes power houses and their components the text emphasizes on the solutions of unsteady equations of surge tank and pipe carrying water to power house under water hammer situation it also includes computer programs for the numerical solutions of hyperbolic partial differential equations key features provides worked out examples and problems in si units presents all possible methods of design including ranga raju misri s new approach of canal design gives numerous illustrations to reinforce the understanding of the subject besides undergraduate students this book will also be of immense use to the postgraduate students of water resources engineering

Surveying: V. 2 2005-12

explore the fascinating world of surveying with this comprehensive mcq book designed to be your

~~ultimate learning companion whether you're a~~
student preparing for exams or a seasoned
professional seeking to refresh your knowledge
this book offers a structured approach to test
your understanding and expand your expertise

Building Construction 2003

primarily aimed to be an introductory text for the first course in surveying for civil architecture and mining engineering students this book now in its second edition is also suitable for various professional courses in surveying written in a simple and lucid language this book at the outset presents a thorough introduction to the subject different measurement errors with their types and nature are described along with measurement of horizontal distances and electronic distances measurements this text covers in detail the topics in levelling angles and directions and compass survey the functions and uses of different instruments such as theodolites tacheometers and stadia rods are also covered in the text besides the book elaborates different fields of surveying such as plane table surveying topographical surveying construction surveying and underground surveys finally the book includes a chapter on computer applications in surveying key features includes about 400 figures to explain the fundamentals of surveying uses si units throughout the book offers more than 170 fully solved examples including the questions generated from premier universities provides a large number of problems and answers at the end of each chapter
